

# CA18EAxxBPxIO - IO-Link

## Capacitive Proximity Sensors with IO-Link communication

### Description

The new generation of CA18EA...IO sensors are a complete family of high performance capacitive sensors for detection of most solid or liquid targets in industrial applications such as Plastic & Rubber, Agriculture, Food & Beverage and Materials handling. The 4<sup>th</sup> Generation of TRIPLESIELD™ technology provides increased immunity to electromagnetic interference (EMI), especially to frequency drives, and improves immunity to humidity and dust.

The sensor housing has the IP69K rating as well as approval by ECOLAB for cleaning and disinfection agents.

On-board IO-Link communication opens up a variety of functions, such as easy communication and customization of advanced parameter settings.

### Benefits

- **A complete family.** Available in M18 in a robust Stainless Steel AISI316L housing with an operation of 2-10 mm flush or 3-15 mm non-flush.
- **Enhanced EMC performance:** 4<sup>th</sup> Generation TRIPLESIELD™
- **Easy customization to specific OEM requests:** different cable lengths and materials, special labelling: customized pig-tail solutions with special cables and connectors are possible on request..
- **The output** can be operated either as a switching output or in IO-Link mode.
- **Fully configurable via output IO-Link v 1.1.** Electrical outputs can be configured as PNP / NPN / Push-Pull / External input, normally open or normally closed.
- **Timer functions** can be set, such as ON-delay, Off-delay, and one shots.
- **Logging functions:** Temperatures, detecting counter, power cycles and operating hours.
- **Detection modes** Single point, two point and windows mode.
- **Analogue output:** In IO-Link mode the sensor will generate 16 bit analogue process data output representing the dielectric value measured by the sensor.

### Applications

- Detection not only of the level of plastic pellets in plastic moulding machines but also the dielectric value of the pellets to ensure correct manufacturing.
- Detection not only of the wood pellets in pellet burners but also the density of the wood pellets.

### Main functions

- The sensor can be operated in IO-Link mode once connected to an IO-Link master or in standard I/O mode.
- Adjustable parameters via IO-Link interface:
  - ▶ Sensing distance and hysteresis.
  - ▶ Sensing modes: single point or two point or window mode.
  - ▶ Timer functions, e.g.: On-delay, Off delay, One shot leading edge or trailing edge.
  - ▶ Logic functions such as: AND, OR, X-OR and SR-FF.
  - ▶ External input.
  - ▶ Logging functions: Maximum temperatures, minimum temperatures, operating hours, operating cycles, power cycles, minutes above maximum temperature, minutes below minimum temperature, etc.

\* The IP69K test according to DIN 40050-9 for high-pressure, high-temperature wash-down applications. The sensor must not only be dust tight (IP6X), but also able to withstand high-pressure and steam cleaning. The sensor is exposed to high pressure water from a spray nozzle that is fed with 80°C water at 8'000– 10'000 KPa (80–100bar) and a flow rate of 14–6L/min. The nozzle is held 100 –150 mm from the sensor at angles of 0°, 30°, 60° and 90° for 30s each. The test device sits on a turntable that rotates with a speed of 5 times per minute. The sensor must not suffer any damaging effects in appearance or function from the high pressure water function.

## TRIPLESIELD™

Exceeding the norms for capacitive sensors.

## Mechanics/electronics

### Connection

|                  |                                                                     |
|------------------|---------------------------------------------------------------------|
| <b>Cable</b>     | 2 m, 4 wire, 4 x 0,34 mm <sup>2</sup> , Ø5.2 mm Oil proof PVC, grey |
| <b>Plug (M1)</b> | M12 x 1, 4 pin male                                                 |

### Wiring

| BN    | BK    | WH    | BU   | A           | B      |
|-------|-------|-------|------|-------------|--------|
| Brown | Black | White | Blue | OUT/IO-Link | IN/OUT |

### Housing

|                      |                                   |               |
|----------------------|-----------------------------------|---------------|
| <b>Body</b>          | Stainless steel AISI316L          |               |
| <b>Front</b>         | PBT, White (30% glass-reinforced) |               |
| <b>Cable gland</b>   | Grilamid TR 55, Black             |               |
| <b>Nuts</b>          | Stainless steel AISI316L          |               |
| <b>Trimmer shaft</b> | Nylon, Blue                       |               |
| <b>Light guides</b>  | Grilamid TR 55, Transparent       |               |
| <b>Dimensions</b>    | M18 x 1                           | Thread        |
| <b>Thread length</b> | 47 mm                             | Non-flush     |
|                      | 55 mm                             | Flush         |
| <b>Total length</b>  | 70 mm                             | Housing       |
| <b>Weight</b>        | ≤ 170 g                           | Cable version |
|                      | ≤ 93 g                            | Plug version  |

## Compatibility and conformity

### Approvals and markings

|                   |                                                                                           |                                                                          |
|-------------------|-------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|
| General reference | Sensor designed according to EN60947-5-2 and EN60947-1                                    |                                                                          |
| MTTF <sub>d</sub> | 114.6 years @ 40°C (+104°F)                                                               | ISO 13849-1, SN 29500                                                    |
| CE-marking        |          |                                                                          |
| Approvals         |  (UL508) |                                                                          |
| Other Approvals   |          | Topax 56, Topaz AC1, Topaz MD3, Topaz CL1, Topactiv OKTO, P3-hypochloran |

### IO-Link

|                        |                                                  |
|------------------------|--------------------------------------------------|
| IO-Link revision       | 1.1                                              |
| Transmission rate      | COM2 (38.4 kbaud)                                |
| SDCI-Norm              | IEC 61131-9                                      |
| Profile                | Smart sensor profile 2nd edition, common profile |
| Min. cycle time        | 5 ms                                             |
| SIO mode               | Yes                                              |
| Min. master port class | A (4-pin)                                        |
| Process data length    | 32 bit                                           |

## Delivery contents and accessories

### Delivery contents

Capacitive sensor: CA18EAxxBPxIO  
2 x M18 nuts  
Screwdriver  
Packaging: Carton box

### Accessories

Connector type CONB14NF-...W -series.  
Mounting Brackets AMB18-S.. (straight), AMB18-A.. (angled)
