Product Description

µ-Processor based level controller for liquids with a wide sensitivity range (like sewage water, chemicals, salt water etc.). The controller has a separate output for alarm indication in case of a tank running dry or if an overflow condition occurs.
8A SPDT/SPST relay output, NO/NC.
Sensitivity control by potentiometer level in 3 ranges.

Mode of Operation

Connection cable
2, 3, 4 or 5 conductor PVC cable, normally screened. Cable length: max. 100 m. The resistance between the cores and the ground must be at least 500k. Normally, it is recommended to use a screened cable between probe and controller, e.g. where the cable is placed in parallel to the load cables (mains). The screen has to be connected to Y5 (reference).

Example 1
The diagram shows the level control connected as max. and min. control, i.e. registration of 2 levels + 2 alarm levels. The relays react to the low alternating current created when the electrodes are in contact with the liquid.
The reference (Ref) must be connected to the container or if the container consists of a non-conductive material, to an additional electrode. (To be connected to pin Y5).
In the diagram this electrode is shown by the dotted line.)
The alarm outputs utilize electrodes on Y4 for HiHi alarm - and Y1 for LoLo alarm outputs.

Operation Diagram

Function: Filling or Emptying
The Multifunction Controller can be used as a minimum-maximum control for two systems, a filling system and a emptying system, with the same kind of liquid to be measured and one common pump.

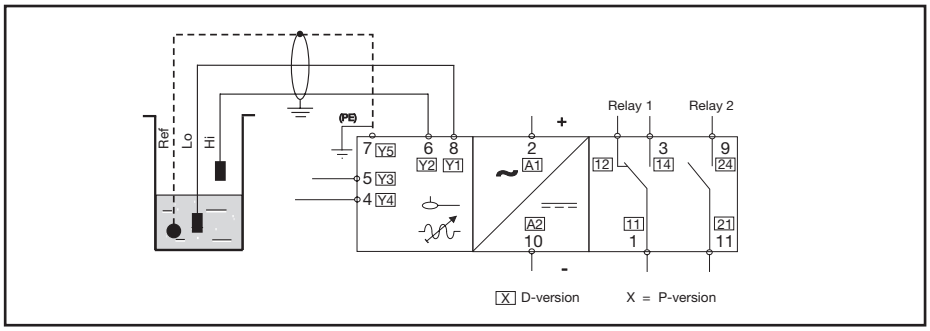
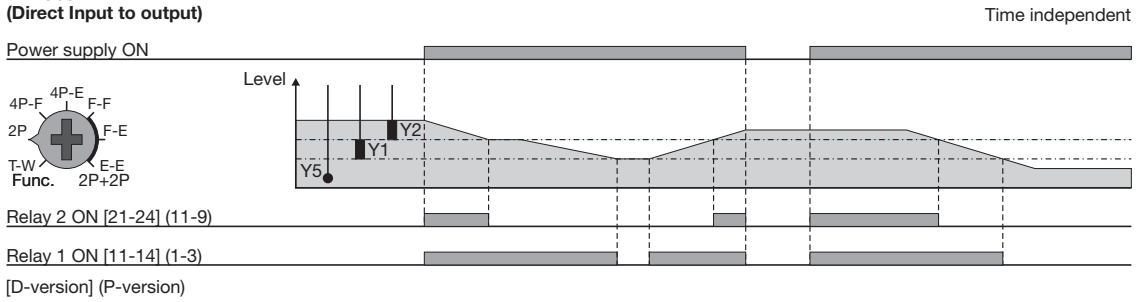
Operation Diagram

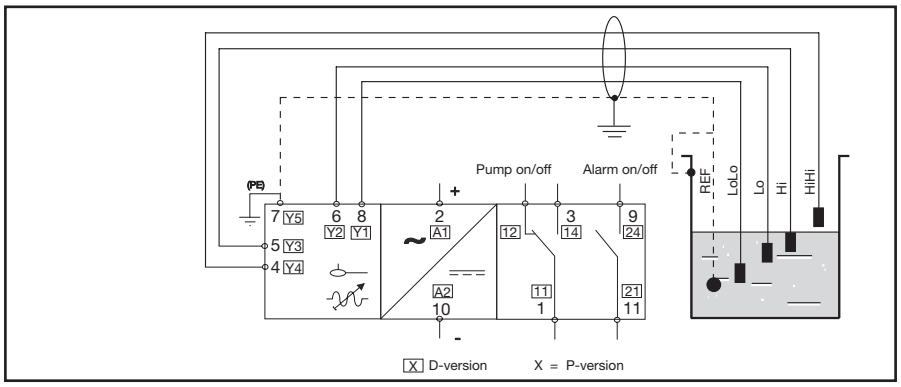
Function: Direct input- output
The Multifunction Controller can be used as direct input/ output, where each of the two inputs (electrodes) controls an individual relay output:
Electrode no. 1 = Relay no. 1
Electrode no. 2 = Relay no. 2.



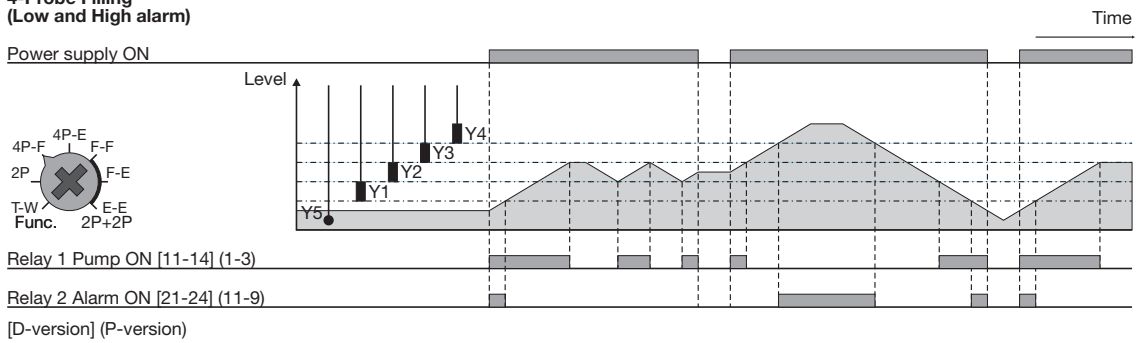
2-Probe
(Direct Input to output)



Function: Filling or Emptying with high and low alarms
The Multifunction Controller can be used as a minimum-maximum control filling or emptying system, with HiHi and LoLo Alarm output.



4-Probe Filling
(Low and High alarm)



4-Probe Emptying
(Low and High alarm)
