# RP1D

#### 1-phase PCB mount DC switching solid state relays

#### Main features

- · DC Solid State Relay for PCB mounting
- · Rated operational current: Up to 8 ADC
- Rated operational voltage: Up to 350 VDC
- Surface mount technology
- · Flexible encapsulation for extended life
- Control voltage: 4.25 to 32 VDC
- · Isolation (Input to Output): 4000 VACrms

### Description

The DC switching relay for PCB mounting is used in applications where there is a need for fast switching of small DC loads with a high input/output insulation of more than 4000 VACrms.

The DC switching relay always switches on and off in accordance with the applied control voltage.

#### **Applications**

These relays can be used to switch heaters, motors, valves or solenoids

#### Main functions

- DC switching
- Ratings up to 8 ADC / 60 VDC, 1 ADC / 350 VDC
- · DC control voltage

O:此零件所有材料中含有的该有害物低于GB/T 26572的限定。

X: 此零件某种材料中含有的该有害物高于GB/T 26572的限定。

#### Note:

1. A filter is required to meet the Class A limits of EN55011: A filter (capacitor or snubber) could be necessary from 60 / 350 VDC supply to chassis Ground. A filter (capacitor or snubber) could be necessary from 24 VDC input to chassis Ground.

Attention: This product has been designed for class A equipment. Use of the product in domestic environments may cause radio interference, in which case the user may be required to employ additional mitigation methods.

- 2. It is recommended that the control input lines are installed together (i.e. a 2 core cable) to ensure acceptable susceptability to RF (Radio Frequency) is maintained. The manufacturer has set a maximum allowable deviation when under RF exposure of <1% FSD.
- Performance Criteria 1 (PC1): No degradation of performance or loss of function is allowed when the product is operated as intended.
- Performance Criteria 2 (PC2): During the test, degradation of performance or partial loss of function is allowed. However when the test is complete the product should return operating as intended by itself.
- Performance Criteria 3 (PC3): Temporary loss of function is allowed, provided the function can be restored by manual operation of the controls.
