

Low Profile Switching Power Supply Type SPM5BC DIN Rail Mounting

CARLO GAVAZZI

- Universal input 90~264 VAC
- Short circuit protection
- Internal input filter
- Charger for lead-acid batteries
- Battery polarity protection
- Installation on DIN Rail

Product Description

The SPM5BC battery chargers are a range of power supply units with charge lead-acid batteries optimising their performance and duration. Based on switch-mode technology, they produce an output

voltage stabilized at a preset value, even when not being charged. Made in plastic low profile housing they feature Universal input 90~264VAC, integrated short circuit protection and battery polarity protection.

Block Diagrams

Pin Assignement and Front Controls

Pin No.	Designation	Description
1, 2	RDY	A normal open relay contact for DC ON level control
3	-	Negative output terminal
4	+	Positive output terminal
5	L	Input terminals (phase conductor, no polarity at DC input)
6	N	Input terminals (neutral conductor, no polarity at DC input)
LED	DC ON	Operation indicator LED
LED	BAT FAIL	Battery reverse indicator LED

Installation

Ventilation and cooling	Ventilation/Cooling Normal convection. All sides 25mm free space For cooling recommended.
Connector size range	AWG24-12 (0.2~2.5mm ²) flexible/solid cable. Connector can withstand torque at maximum 0.67Nm (6 pound-inches). 7mm stripping at cable end recommends. Use copper conductors only, 60/70°.
General tolerance	0.00 [0.00] - 30.00 [1.18] 30.00[1.18] - 120.00[4.72]
Installation	Easy snap-on mounting onto the DIN-Rail (TS35/7.5 or TS/35/15); unit sits safely and firmly on the rail; no tools required even to remove.
