

Quectel EG06 Series

IoT/M2M-optimized LTE-A Cat 6 LGA Module

Quectel EG06 is a series of LTE Advanced category 6 modules optimized specially for M2M and IoT applications. Having adopted the 3GPP Rel. 11 LTE technology, it delivers data rates up to 300 Mbps downlink and 50 Mbps uplink.

Designed in the LGA form factor, the series comes in 4 models (EG06-E, EG06-A, EG06-AUTL and EG06-EA) for different target regions and these models nearly cover all the mainstream carriers worldwide.

EG06 supports Qualcomm® IZat™ location technology Gen8C Lite (GPS, GLONASS, BeiDou, Galileo and QZSS). The integrated GNSS greatly simplifies product design, and provides quicker, more accurate and reliable positioning.

A rich set of Internet protocols, industry-standard interfaces and abundant functionalities (USB drivers for Windows 7, Windows 8/8.1, Windows 10, Linux, Android) extend the applicability of the module to a wide range of M2M and IoT applications such as industrial router, home gateway, set top box, industrial PDA, rugged tablet PC, video surveillance and digital signage, etc.

Key Features

- ✓ LTE-A Cat 6 module with LGA form factor, optimized for M2M and IoT applications
- ✓ Support LTE-A carrier aggregation
- ✓ Worldwide LTE-A and UMTS/HSPA(+) coverage
- ✓ Multi-constellation GNSS receiver available for applications requiring fast and accurate fixes in any environment
- ✓ Feature refinements: supports DFOTA and DTMF
- ✓ MIMO technology meets demands on data rate and link reliability in modem wireless communication systems

Notes:

- * Under Development.
- Supported.
- ① Excluding Japan and CMCC.
- ② LTE-FDD B29 and B32 support receiving only, and are only for secondary component carrier in 2CA.
- ③ Supports 400 Mbps DL peak data rate with 256-QAM modulation.
