NOTES :

1. Pulse width<u><</u>300us, Duty cycle<u><</u>2%

2. Essentially independent of operating temperature typical characteristics.

 Repetitive rating, pulse width limited by junction temperature T<sub>J(MAX)</sub>=150°C. Ratings are based on low frequency and duty cycles to keep initial T<sub>J</sub> =25°C.

4. The maximum current rating is package limited.

5.  $R_{\Theta JA}$  is the sum of the junction-to-case and case-to-ambient thermal resistance where the case thermal reference is defined as the solder mounting surface of the drain pins. Mounted on a 1 inch<sup>2</sup> with 2oz.square pad of copper.

6. The test condition is L=0.1mH,  $I_{AS}$ =30A,  $V_{DD}$ =25V,  $V_{GS}$ =10V, Starting T\_J=25°C

7. Guaranteed by design, not subject to production testing.
