

M5StickC Plus2 with Watch Accessories

SKU:K016-H2

Description

M5StickC Plus2 with Watch Accessories is a watch kit that includes an M5StickC Plus2, a wristband, a LEGO-compatible adapter, and a wall-mounting accessory. In addition to displaying time, it can also be used for applications such as sports activity monitoring and smart home control. When combined with the M5Stack HAT hardware ecosystem, it offers even more possibilities for smart wearable devices.

There is no doubt about the powerful capabilities of the **M5StickC Plus2**. As the second generation of M5StickC Plus, M5StickC Plus2 is equipped with a 240*135 color LCD screen, ESP32-PICO-V3-02 chip, MPU6886 6-axis IMU, SPM1423 digital microphone, BM8563 RTC chip, and IR emitter.

The HY2.0-4P interface at the bottom of the M5StickC Plus2 allows for connection to M5Stack's sensor series products, enabling customization of various functions. The [8P@2.54mm](#) expansion interface on the top can be directly connected with M5Stack HAT series products, providing users with more development possibilities.
