

Application Note**AP22615/AP22815 Application Information and Demo Board User Guide**

Description

The AP22815/615 is a 3A single channel current-limited high-side power switch with output OVP optimized for USB and other hot-swap applications which need to have over voltage protection from output to protection the system. The AP22815/615 complies with USB standards and is available with both polarities of Enable input. AP22815 supports fixed current-limited feature, while AP22615 equips adjustable current-limited feature optimized for applications that require precision current limiting support. It supports USB PD3.0 fast role swap function. The output voltage could recovery to USB valid voltage range within 110us during USB PD fast role swap event.

The device has fast short-circuit and output over-voltage response time for improved overall system robustness. Both TSOT25 and TSOT26 packages integrate discharge circuitry inside OUT pin. They provide a complete protection solution for applications subject to heavy capacitive loads and the prospect of short circuit, and offer output over-voltage protection, reverse current blocking, over-current, over-temperature and short-circuit protection, as well as controlled rise time and under-voltage lockout functionality. A 7ms deglitch capability on the open-drain Flag output prevents false over-current/over-voltage/over-temperature reporting and does not require any external components.

The AP22815 is available in a standard Green TSOT25 packages with RoHS compliant. The AP22615 is available in a standard Green TSOT26 packages with RoHS compliant.

Applications

- Integrated Load Switches in Ultrabook PC
- Power Up/Down Sequencing in Ultrabook PC
- Notebook, Netbook, Tablet PC, Set-Top Box
- SSD (Solid State Drives)
- Consumer Electronics
- USB Charger

- Telecom Systems

Features

- Input Voltage Range: 3.0V ~ 5.5V
- 40mΩ on-resistance
- Built-in soft-start with 2.1 ms typical rise time
- Fault report (FLG) with blanking time (7ms typ)
- Accurate Adjustable Current Limit, 0.4A~4.0A (AP22615 only)
- ESD protection: 2KV HBM, 200V MM
- Active low or active high enable
- Protection
 - Output Over-Voltage with Auto Recovery
 - Over Current with Auto Recovery
 - Short Circuit with Auto Recovery
 - Over temperature with Auto Recovery
- Output Reverse Voltage Protection
- Fast Role Swap function
- Thermally Efficient Low Profile Package
- **Totally Lead-Free & Fully RoHS compliant (Notes 1 & 2)**
- **Halogen and Antimony Free. "Green" Device (Note 3)**
- UL Recognized, File Number E322375
- IEC60950-1 CB Scheme Certified

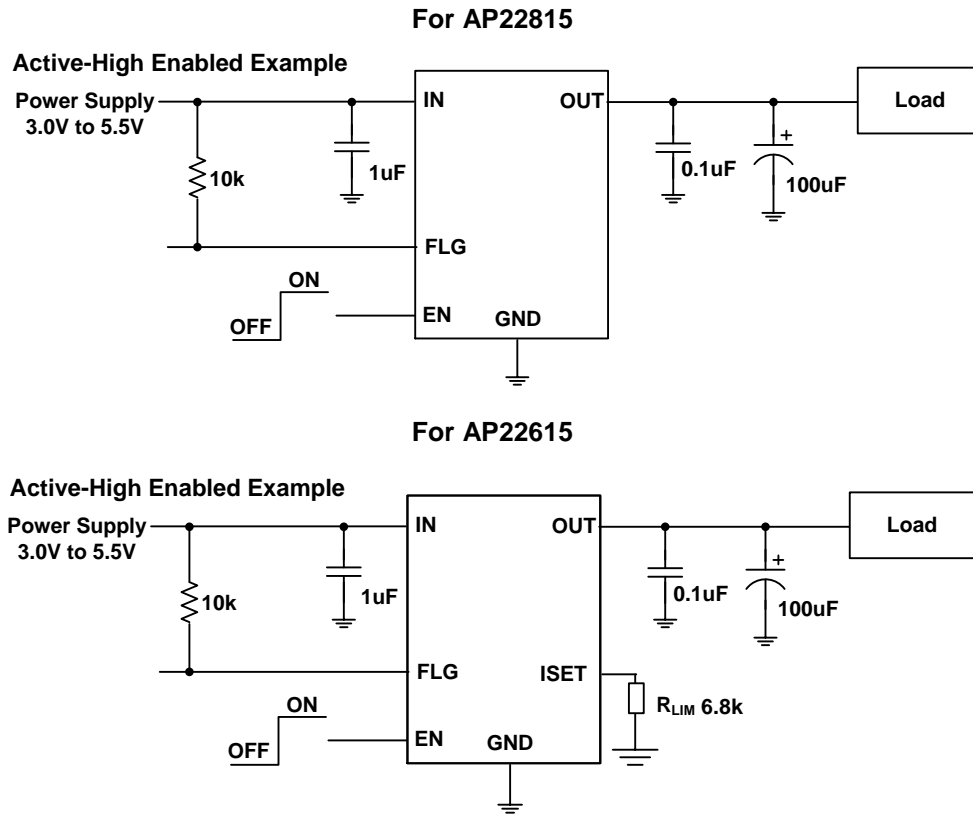

Notes: 1. No purposely added lead. Fully EU Directive 2002/95/EC (RoHS) & 2011/65/EU (RoHS 2) compliant.
2. See http://www.diodes.com/quality/lead_free.html for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.
3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.

Application Note

AP22615/AP22815 Application Information and Demo Board User Guide

Typical Applications Circuit

Note: If applying 1 μ F input capacitor will lead to large V_{IN} spike, it's recommended to use 10 μ F capacitor instead.

Absolute Maximum Ratings

Symbol	Parameter		Ratings	Units
ESD HBM	Human Body ESD Protection		2000	V
ESD MM	Machine Model ESD Protection		200	V
V_{IN}	Input Voltage		-0.3 to 6.0	V
V_{OUT}	Output Voltage (V_{OUT} to GND, V_{OUT} to V_{IN})		-0.3 to 28	V
V_{EN}	Enable Voltage		-0.3 to ($V_{IN} + 0.3$)	V
V_{ISET}	ISET Voltage		-0.3 to ($V_{IN} + 0.3$)	V
I_L	Load Current		Internal Limited	A
$T_{J(max)}$	Maximum Junction Temperature		150	$^{\circ}$ C
T_{ST}	Storage Temperature		-65 to +150	$^{\circ}$ C
$R_{\theta JA}$	Thermal Resistance, Junction to Ambient	TSOT25	85	$^{\circ}$ C/W
		TSOT26	80	
$R_{\theta JC}$	Thermal Resistance, Junction to Case	TSOT25	32	$^{\circ}$ C/W
		TSOT26	30

Application Note

AP22615/AP22815 Application Information and Demo Board User Guide

Quick Start Guide

The AP22615/AP22815(Power Switch) evaluation modules (EVM) provide a means for the user to evaluate quickly the functionality and electrical performance of the AP22615/AP22815 device. All inputs and outputs are brought out to test points for control and monitoring. All passive components are included on the EVM for device operation. The input pin should be connected to an external supply; the output should be connected to a load.

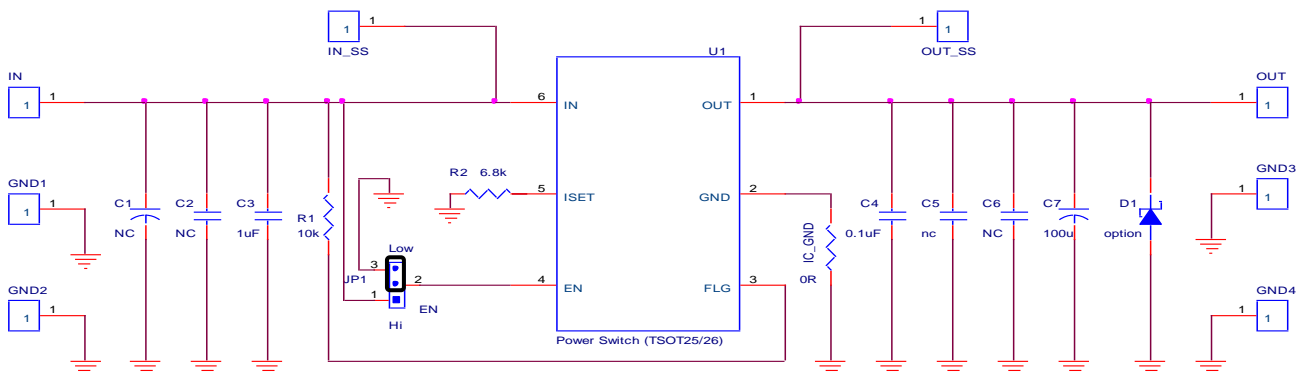

1. Connect a +5V power supply between IN and GND terminals.
2. Connect an adjustable current or resistive load to OUT1 and GND terminals.
3. Turn on the power supply.
4. Increase the load current of OUT and observe that the load current will stop increasing after reaching certain level. That is an indication that the device is limiting the load current.
5. Use an oscilloscope or a voltage meter to check that FLAG pin become low when the current limit is reached.

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
