- Supports Bluetooth / Zigbee / IEEE 802.15.4 / ISM 2.4 GHz / ISM 5.8 GHz

General Description

The Delta 37 is a terminal mount swivel blade antenna, designed as a solution for Wi-Fi 6E applications, offering full support for Wi-Fi 6E and Wi-Fi 7 bands (2.4G, 5G, 6G) as well as comprehensive coverage of 5G New Radio (NR), 4G LTE, and 3G UMTS bands. Beyond these, it caters to Ultra-Wideband (UWB) frequencies from 2.6 GHz to 8 GHz, encompassing UWB Bands 1-8 for high bandwidth, low latency communication.

As an omnidirectional monopole antenna, the Delta 37 provides consistent reception in all directions, while its ground plane independence offers greater flexibility in mounting locations.

Terminated with either an SMA male or Reverse Polarity SMA Male connector, the swivel knuckle design allows the antenna to be positioned to take best advantage of the incoming signal, allowing straight, 45° and 90° positions along with 360° rotation.

Additional Considerations

- Omnidirectional monopole
- Adjustable mount allows positioning for best signal
- Ground Plane independent

NOTE: For each frequency band, Siretta provides a traffic light indication to show the suitability of the antenna for use at that frequency band. Determination of exactly what makes an antenna good or bad at any frequency is subjective.

The view presented is that of Siretta's engineering team having taken into account the efficiency and VSWR measurements. The end user is advised to use their own criteria and/or testing to confirm suitability.
