

ZENER DIODE SET

DESCRIPTION

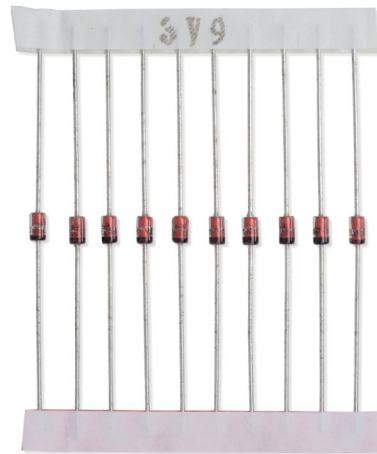

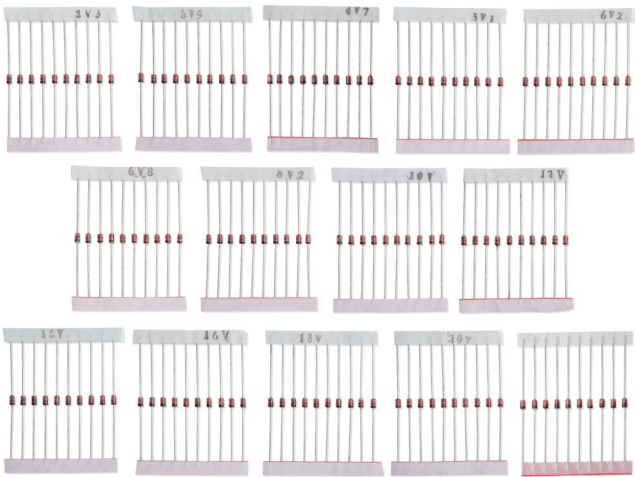

Zener diodes are a special type of semiconductor diode – devices that allow current to flow in one direction only, while also allowing current to flow in the opposite direction, but only when exposed to enough voltage. This set consists of 140 pieces of 14 different values, 10 pieces each.

FEATURES

- Package: THT
- Zener voltage: 3.3V, 3.9V, 4.7V, 5.1V, 6.2V, 6.8V, 8.2V, 10V, 12V, 15V, 16V, 18V, 20V, 24V
- Quantity: 140 pieces in total, 10 of each value
- Power: 1W
