

HOLDER FOR 18650 LITHIUM BATTERY

Weight 10 g

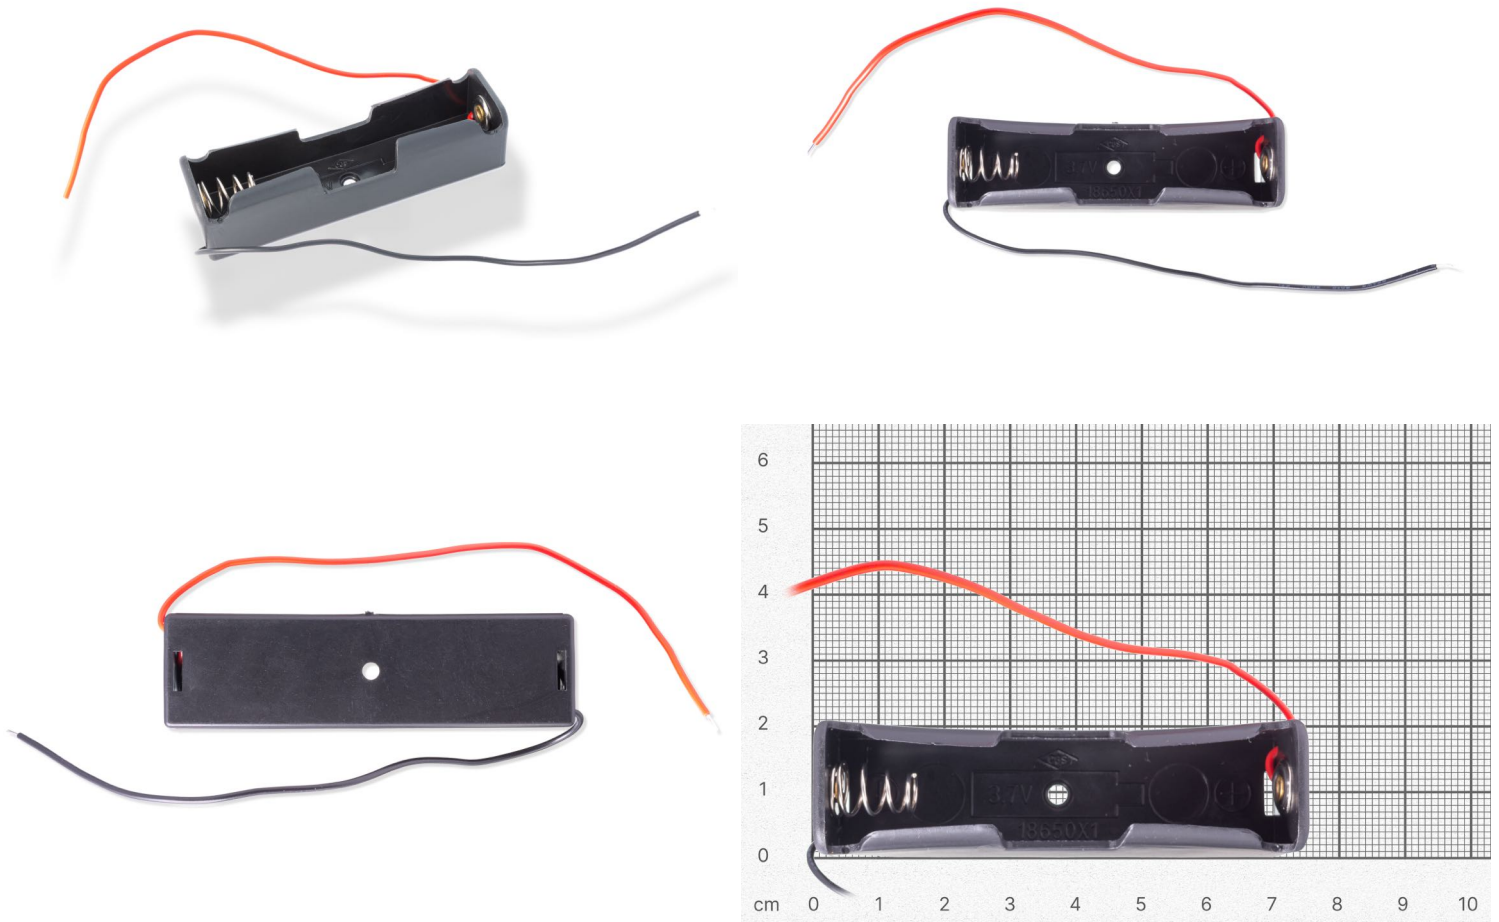

DESCRIPTION

18650 battery holder allows easy use of lithium batteries in 18650 packaging. Otherwise, soldering these types of batteries is not recommended because the high temperature makes them lose their capacity. If you do not have a spot welding machine, we recommend that you get this kind of battery holder and you won't have any problems with the loss of capacity, and it will allow you to use the batteries easily.
