

LI-ION BATTERY 600MAH 3.7V

DESCRIPTION

This Li-ion battery is small, light and durable! Trough standard JST 2mm female connector it will give you normal 3.7V that will power your projects whole day (and night). With all this battery has a built-in system for protection from too high voltage (prevents overcharging), too low voltage and short circuit. That's how it protects the battery and secures its longer work and protects you from the danger of this battery!

Warning: This battery must be charged with special charger principle **CC/CV** - like the charger recommended under. Li-ion batteries are dangerous! Read our tutorial ([link right above](#)) before use.
