## Data sheet

## 6XV1871-2S

Flexible bus cable (4-core), sold by the meter, unassembled Industrial Ethernet FC TP festoon cable 2x2 (PROFINET type B), TP installation cable for festoon suspension, 4-core shielded Cat5e, sold by the meter, min. 5 million bending cycles, delivery unit max. 1000 m, minimum order quantity 20 m.

| suitability for use   | For continuous motion in a trailing cable, festoon mounting                            |  |  |
|---|--|--|--|
| cable designation   | 2YY (ST) CY 2x2x0,75/1,5 LI GN SF/UTP  |  |  |
| lectrical data  |  |  |  |
| attenuation factor per length                                 |  |  |  |
| • at 10 MHz / maximum   | 0.063 dB/m   |  |  |
| • at 100 MHz / maximum  | 0.213 dB/m   |  |  |
| impedance   |  |  |  |
| • at 1 MHz 100 MHz  | 100 Ω  |  |  |
| relative symmetrical tolerance                                |  |  |  |
| • of the characteristic impedance at 1 MHz 100 MHz            | 5 %  |  |  |
| near-end crosstalk per length                                 |  |  |  |
| • at 1 MHz 100 MHz  | 0.5 dB/m   |  |  |
| transfer impedance per length / at 10 MHz                     | 100 mΩ/m   |  |  |
| loop resistance per length / maximum                          | 120 mΩ/m   |  |  |
| operating voltage   |  |  |  |
| RMS value   | 80 V   |  |  |
| NVP value in percent  | 66 %   |  |  |
| nechanical data   |  |  |  |
| number of electrical cores                                    | 4  |  |  |
| design of the shield  | Overlapped aluminum-clad foil, sheathed in a braided screen of tin-plated copper wires |  |  |
| type of electrical connection / FastConnect                   | Yes  |  |  |

| security information  |  |  |  |
| security information  | Siemens provides products and solutions with industrial cybersecurity functions  |  |  |
|   | that support the secure operation of plants, systems, machines and networks.<br>In order to protect plants, systems, machines and networks against cyber<br>threats, it is necessary to implement – and continuously maintain – a holistic,<br>state-of-the-art industrial cybersecurity concept. Siemens' products and<br>solutions constitute one element of such a concept. Customers are responsible<br>for preventing unauthorized access to their plants, systems, machines and<br>networks. Such systems, machines and components should only be connected<br>to an enterprise network or the internet if and to the extent such a connection is<br>necessary and only when appropriate security measures (e.g. firewalls and/or<br>network segmentation) are in place. For additional information on industrial<br>cybersecurity measures that may be implemented, please visit<br>www.siemens.com/cybersecurity-industry. Siemens' products and solutions<br>undergo continuous development to make them more secure. Siemens strongly<br>recommends that product updates are applied as soon as they are available |  |  |

and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
