## Data sheet

## US2:17HUG82WH15

Non-reversing motor starter, Size 3, Three phase full voltage, Solid-state overload relay, OLR amp range 25-100A, Combination type, 100A fusible disconnect, 100A/600V fuse clip, Encl NEMA type 4X 304 S-Steel, Water/dust tight noncorrosive, Extra-wide enclosure

product brand name	Class 17
design of the product	Non-reversing motor starter with fusible disconnect
special product feature	ESP200 overload relay
General technical data	
weight [lb]	82 lb
Height x Width x Depth [in]	36 × 24 × 8 in
touch protection against electrical shock	NA for enclosed products
installation altitude [ft] at height above sea level maximum	6560 ft
ambient temperature [°F]	
<ul> <li>during storage</li> </ul>	-22 +149 °F
during operation	-4 +104 °F
ambient temperature	
<ul> <li>during storage</li> </ul>	-30 +65 °C
during operation	-20 +40 °C
country of origin	USA
Horsepower ratings	
yielded mechanical performance [hp] for 3-phase AC motor	
• at 200/208 V rated value	0 hp
• at 220/230 V rated value	0 hp
• at 460/480 V rated value	50 hp
• at 575/600 V rated value	5 hp
Contactor	
size of contactor	NEMA controller size 3
number of NO contacts for main contacts	3
operating voltage for main current circuit at AC at 60 Hz maximum	600 V
operational current at AC at 600 V rated value	90 A
mechanical service life (operating cycles) of the main contacts typical	500000
Auxiliary contact	
number of NC contacts at contactor for auxiliary contacts	0
number of NO contacts at contactor for auxiliary contacts	1
number of total auxiliary contacts maximum	7
contact rating of auxiliary contacts of contactor according to UL	10A@600VAC (A600), 5A@600VDC (P600)
Coil	
type of voltage of the control supply voltage	AC
control supply voltage	
• at AC at 50 Hz rated value	380 440 V
• at AC at 60 Hz rated value	440 480 V
holding power at AC minimum	14 W
apparent pick-up power of magnet coil at AC	310 VA

apparent holding power of magnet coil at AC     26 VA       operating range factor control supply voltage rated value of     0.85 1.1	
magnet coil	
percental drop-out voltage of magnet coil related to the input voltage 50 %	
ON-delay time 26 41 ms	
OFF-delay time 14 19 ms	
Overload relay	
product function	
overload protection     Yes	
phase failure detection     Yes	
asymmetry detection Yes	
ground fault detection     Yes	
• test function Yes	
external reset Yes	
reset function Manual, automatic and remote	
trip class CLASS 5 / 10 / 20 (factory set) / 30	
adjustable current response value current of the current- dependent overload release     25 100 A	
tripping time at phase-loss maximum 3 s	
relative repeat accuracy 1 %	
product feature protective coating on printed-circuit board Yes	
number of NC contacts of auxiliary contacts of overload relay 1	
number of NO contacts of auxiliary contacts of overload relay 1	
operational current of auxiliary contacts of overload relay	
• at AC at 600 V 5 A	
• at DC at 250 V 1 A	
contact rating of auxiliary contacts of overload relay according to UL 5A@600VAC (B600), 1A@250VDC (R300)	
insulation voltage (Ui)	
• with single-phase operation at AC rated value 600 V	
with multi-phase operation at AC rated value     300 V	
Disconnect Switch	
response value of switch disconnector 100A / 600V	
design of fuse holder Class R fuse clips	
design of fuse holder     Class R fuse clips       operating class of the fuse link     Class R	
design of fuse holder     Class R fuse clips       operating class of the fuse link     Class R       Enclosure     Enclosure	
design of fuse holder     Class R fuse clips       operating class of the fuse link     Class R       Enclosure     design of the housing       dustproof, waterproof & resistant to corrosion	
design of fuse holder     Class R fuse clips       operating class of the fuse link     Class R       Enclosure     design of the housing       design of the housing     dustproof, waterproof & resistant to corrosion       Mounting/wiring	
design of fuse holder     Class R fuse clips       operating class of the fuse link     Class R       Enclosure     design of the housing       design of the housing     dustproof, waterproof & resistant to corrosion       Mounting/wiring     vertical	
design of fuse holder       Class R fuse clips         operating class of the fuse link       Class R         Enclosure       design of the housing         design of the housing       dustproof, waterproof & resistant to corrosion         Mounting/wiring       mounting position         fastening method       Surface mounting and installation	
design of fuse holder       Class R fuse clips         operating class of the fuse link       Class R         Enclosure       design of the housing         design of the housing       dustproof, waterproof & resistant to corrosion         Mounting/wiring       mounting position         restening method       Surface mounting and installation         type of electrical connection for supply voltage line-side       Box lug	
design of fuse holder       Class R fuse clips         operating class of the fuse link       Class R         Enclosure       design of the housing         design of the housing       dustproof, waterproof & resistant to corrosion         Mounting/wiring       mounting position         restening method       surface mounting and installation         type of electrical connection for supply voltage line-side       Box lug         tightening torque [lbf-in] for supply       120 120 lbf-in	
design of fuse holder       Class R fuse clips         operating class of the fuse link       Class R         Enclosure       design of the housing         design of the housing       dustproof, waterproof & resistant to corrosion         Mounting/wiring       mounting position         restening method       Surface mounting and installation         type of electrical connection for supply voltage line-side       Box lug	
design of fuse holder       Class R fuse clips         operating class of the fuse link       Class R         Enclosure       design of the housing         design of the housing       dustproof, waterproof & resistant to corrosion         Mounting/wiring       mounting position         restening method       Surface mounting and installation         type of electrical connection for supply voltage line-side       Box lug         tightening torque [lbf-in] for supply       120 120 lbf-in         type of connectable conductor cross-sections at line-side for       1x (14 1/0 AWG)	
design of fuse holder       Class R fuse clips         operating class of the fuse link       Class R         Enclosure       design of the housing       dustproof, waterproof & resistant to corrosion         Mounting/wiring       mounting position       vertical         fastening method       Surface mounting and installation         type of electrical connection for supply voltage line-side       Box lug         tightening torque [lbf-in] for supply       120 120 lbf-in         type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded       1x (14 1/0 AWG)

type of connectable conductor cross-sections at contactor for AWG cables for auxiliary contacts single or multi-stranded	1x (12 AWG), 2x (16 14 AWG), 2x (18 16 AWG)
temperature of the conductor at contactor for auxiliary contacts maximum permissible	75 °C
material of the conductor at contactor for auxiliary contacts	CU
type of electrical connection at overload relay for auxiliary contacts	Screw-type terminals
tightening torque [lbf-in] at overload relay for auxiliary contacts	7 10 lbf·in
type of connectable conductor cross-sections at overload relay for AWG cables for auxiliary contacts single or multi-stranded	2x (20 14 AWG)
temperature of the conductor at overload relay for auxiliary contacts maximum permissible	75 °C
material of the conductor at overload relay for auxiliary contacts	CU
Short-circuit current rating	
design of the fuse link for short-circuit protection of the main circuit required	10kA@600V (Class H or K); 100kA@600V (Class R or J)
certificate of suitability	NEMA ICS 2; UL 508; CSA 22.2, No.14
