## US2:30CUCB32A1VA

2-speed 3-phase motor starter Size 0 Two separate windings Constant or variable torque Solid-state overload relays Low SPD OLR range 0.75-3.4A High SPD OLR range 3-12A 110-120/220-240VAC 60HZ coil Enclosure NEMA type (open) No enclosure

product brand name	Class 30
design of the product	Full-voltage two speed motor starter
special product feature	ESP200 overload relay; Dual voltage coil
General technical data	
weight [lb]	8 lb
Height x Width x Depth [in]	7 × 10 × 3 in
touch protection against electrical shock	Not finger-safe
installation altitude [ft] at height above sea level maximum	6560 ft
ambient temperature [°F]	
during storage	-22 +149 °F
during operation	-4 +104 °F
ambient temperature	
<ul> <li>during storage</li> </ul>	-30 +65 °C
during operation	-20 +40 °C
country of origin	Mexico
Horsepower ratings	
yielded mechanical performance [hp] for 3-phase AC motor	
<ul> <li>at 200/208 V rated value</li> </ul>	2 hp
<ul> <li>at 220/230 V rated value</li> </ul>	2 hp
<ul> <li>at 460/480 V rated value</li> </ul>	5 hp
• at 575/600 V rated value	5 hp
Contactor	
size of contactor	NEMA controller size 0
number of NO contacts for main contacts	6
operating voltage for main current circuit at AC at 60 Hz maximum	600 V
operational current at AC at 600 V rated value	18 A
mechanical service life (operating cycles) of the main contacts typical	1000000
Auxiliary contact	
number of NC contacts at contactor for auxiliary contacts	2
number of NO contacts at contactor for auxiliary contacts	2
number of total auxiliary contacts maximum	8
contact rating of auxiliary contacts of contactor according to UL	345VA@115VAC / 768VA@240VAC
Coil	
type of voltage of the control supply voltage	AC
control supply voltage	
• at AC at 60 Hz rated value	110 240 V
holding power at AC minimum	8 W
apparent pick-up power of magnet coil at AC	218 VA
apparent holding power of magnet coil at AC	25 VA

operating range factor control supply voltage rated value of	01
magnet coil percental drop-out voltage of magnet coil related to the input	50 %
voltage	
ON-delay time	19 29 ms 10 24 ms
OFF-delay time Overload relay	10 24 1115
product function	Yes
<ul><li>overload protection</li><li>phase failure detection</li></ul>	Yes
asymmetry detection	Yes
ground fault detection	Yes
test function	Yes
external reset	No
reset function	Manual, automatic and remote
trip class	CLASS 5 / 10 / 20 (factory set) / 30
adjustable current response value current of overload relay	
for low rotational speed	0 3 A
• for high rotational speed	3 12 A
tripping time at phase-loss maximum	3 s
relative repeat accuracy	1 %
product feature protective coating on printed-circuit board	Yes
number of NC contacts of auxiliary contacts of overload relay	1
number of NO contacts of auxiliary contacts of overload relay	1
operational current of auxiliary contacts of overload relay	
• at AC at 600 V	5 A
• at DC at 250 V	1 A
contact rating of auxiliary contacts of overload relay according to UL	5
insulation voltage (Ui)	
<ul> <li>with single-phase operation at AC rated value</li> </ul>	600 V
<ul> <li>with multi-phase operation at AC rated value</li> </ul>	300 V
with multi-phase operation at AC rated value Mounting/wiring	300 V
	300 V vertical
Mounting/wiring	
Mounting/wiring mounting position	vertical
Mounting/wiring mounting position fastening method	vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in
Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side	vertical Surface mounting and installation Screw-type terminals
Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for	vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in
Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [Ibf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply	vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU
Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf-in] for supply         type of connectable conductor cross-sections at line-side for         AWG cables single or multi-stranded         temperature of the conductor for supply maximum permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder	vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU Screw-type terminals
Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf-in] for supply         type of connectable conductor cross-sections at line-side for         AWG cables single or multi-stranded         temperature of the conductor for supply maximum permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf-in] for load-side outgoing feeder	vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU Screw-type terminals 20 20 lbf-in
Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf-in] for supply         type of connectable conductor cross-sections at line-side for         AWG cables single or multi-stranded         temperature of the conductor for supply maximum permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf-in] for load-side outgoing feeder         type of connectable conductor cross-sections for AWG cables         for load-side outgoing feeder	vertical Surface mounting and installation Screw-type terminals 20 20 lbf in 1 75 °C AL or CU Screw-type terminals 20 20 lbf in 1
Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables	vertical Surface mounting and installation Screw-type terminals 20 20 lbf in 1 75 °C AL or CU Screw-type terminals 20 20 lbf in 1 75 °C
Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder single or multi-stranded temperature of the conductor for load-side outgoing feeder	vertical Surface mounting and installation Screw-type terminals 20 20 lbf in 1 75 °C AL or CU Screw-type terminals 20 20 lbf in 1
Mounting/wiring           mounting position           fastening method           type of electrical connection for supply voltage line-side           tightening torque [lbf·in] for supply           type of connectable conductor cross-sections at line-side for           AWG cables single or multi-stranded           temperature of the conductor for supply maximum permissible           material of the conductor for supply           type of electrical connection for load-side outgoing feeder           tightening torque [lbf·in] for load-side outgoing feeder           type of connectable conductor cross-sections for AWG cables           for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           temperature of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           type of electrical connection of magnet coil	vertical         Surface mounting and installation         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         Screw-type terminals
Mounting/wiring           mounting position           fastening method           type of electrical connection for supply voltage line-side           tightening torque [lbf·in] for supply           type of connectable conductor cross-sections at line-side for           AWG cables single or multi-stranded           temperature of the conductor for supply maximum permissible           material of the conductor for supply           type of electrical connection for load-side outgoing feeder           tightening torque [lbf·in] for load-side outgoing feeder           type of connectable conductor cross-sections for AWG cables           for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of connectable conductor cross-sections for AWG cables           for load-side outgoing feeder single or multi-stranded           temperature of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           type of electrical connection of magnet coil           tightening torque [lbf·in] at magnet coil	vertical         Surface mounting and installation         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in
Mounting/wiring           mounting position           fastening method           type of electrical connection for supply voltage line-side           tightening torque [lbf·in] for supply           type of connectable conductor cross-sections at line-side for           AWG cables single or multi-stranded           temperature of the conductor for supply maximum permissible           material of the conductor for supply           type of electrical connection for load-side outgoing feeder           tightening torque [lbf·in] for load-side outgoing feeder           type of connectable conductor cross-sections for AWG cables           for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           temperature of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           type of electrical connection of magnet coil	vertical         Surface mounting and installation         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         Screw-type terminals
Mounting/wiring           mounting position           fastening method           type of electrical connection for supply voltage line-side           tightening torque [lbf·in] for supply           type of connectable conductor cross-sections at line-side for           AWG cables single or multi-stranded           temperature of the conductor for supply maximum permissible           material of the conductor for supply           type of electrical connection for load-side outgoing feeder           tightening torque [lbf·in] for load-side outgoing feeder           type of connectable conductor cross-sections for AWG cables           for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           temperature of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           type of electrical connection of magnet coil           tightening torque [lbf·in] at magnet coil           tightening torque [lbf·in] at magnet coil	vertical         Surface mounting and installation         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in
Mounting/wiring           mounting position           fastening method           type of electrical connection for supply voltage line-side           tightening torque [lbf·in] for supply           type of connectable conductor cross-sections at line-side for           AWG cables single or multi-stranded           temperature of the conductor for supply maximum permissible           material of the conductor for supply           type of electrical connection for load-side outgoing feeder           tightening torque [lbf·in] for load-side outgoing feeder           type of connectable conductor cross-sections for AWG cables           for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           temperature of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           type of electrical connection of magnet coil           tightening torque [lbf·in] at magnet coil           type of connectable conductor cross-sections of magnet coil for           AWG cables single or multi-stranded           temperature of the conductor at magnet coil maximum	vertical         Surface mounting and installation         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in         2
Mounting/wiring           mounting position           fastening method           type of electrical connection for supply voltage line-side           tightening torque [lbf-in] for supply           type of connectable conductor cross-sections at line-side for           AWG cables single or multi-stranded           temperature of the conductor for supply maximum permissible           material of the conductor for supply           type of electrical connection for load-side outgoing feeder           tightening torque [lbf-in] for load-side outgoing feeder           type of connectable conductor cross-sections for AWG cables           for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of electrical connection of magnet coil           temperature of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           type of connectable conductor cross-sections of magnet coil           tightening torque [lbf-in] at magnet coil           type of connectable conductor at magnet coil maximum           permissible           material of the conductor at magnet coil maximum           permissible           mater	vertical         Surface mounting and installation         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in         2         75 °C
Mounting/wiring           mounting position           fastening method           type of electrical connection for supply voltage line-side           tightening torque [lbf-in] for supply           type of connectable conductor cross-sections at line-side for           AWG cables single or multi-stranded           temperature of the conductor for supply maximum permissible           material of the conductor for supply           type of electrical connection for load-side outgoing feeder           tightening torque [lbf-in] for load-side outgoing feeder           tightening torque [lbf-in] for load-side outgoing feeder           type of connectable conductor cross-sections for AWG cables           for load-side outgoing feeder single or multi-stranded           temperature of the conductor for load-side outgoing feeder           maximum permissible           material of the conductor for load-side outgoing feeder           type of electrical connection of magnet coil           tightening torque [lbf-in] at magnet coil           type of connectable conductor cross-sections of magnet coil for           AWG cables single or multi-stranded           temperature of the conductor at magnet coil maximum           permissible	vertical         Surface mounting and installation         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in         2         75 °C         CU         Screw-type terminals         10 15 lbf-in
Mounting/wiring           mounting position           fastening method           type of electrical connection for supply voltage line-side           tightening torque [lbf-in] for supply           type of connectable conductor cross-sections at line-side for           AWG cables single or multi-stranded           temperature of the conductor for supply maximum permissible           material of the conductor for supply           type of electrical connection for load-side outgoing feeder           tightening torque [lbf-in] for load-side outgoing feeder           type of connectable conductor cross-sections for AWG cables           for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of connectable conductor for load-side outgoing feeder           type of electrical connection of magnet coil           temperature of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           type of connectable conductor cross-sections of magnet coil           tightening torque [lbf-in] at magnet coil           type of connectable conductor at magnet coil maximum           permissible           material of the conductor at magnet coil maximum           permissible           mater	vertical         Surface mounting and installation         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in         2         75 °C         CU         Screw-type terminals         5 12 lbf-in         2         75 °C         CU         Screw-type terminals
Mounting/wiring           mounting position           fastening method           type of electrical connection for supply voltage line-side           tightening torque [lbf-in] for supply           type of connectable conductor cross-sections at line-side for           AWG cables single or multi-stranded           temperature of the conductor for supply maximum permissible           material of the conductor for supply           type of electrical connection for load-side outgoing feeder           tightening torque [lbf-in] for load-side outgoing feeder           type of connectable conductor cross-sections for AWG cables           for load-side outgoing feeder single or multi-stranded           temperature of the conductor for load-side outgoing feeder           type of cleatrical connection of magnet coil           type of electrical connection of magnet coil           tightening torque [lbf-in] at magnet coil           type of connectable conductor at magnet coil maximum           permissible           material of the conductor at magnet coil           type of electrical connection for auxiliary contacts           type of electrical connection for auxiliary contacts	vertical         Surface mounting and installation         Screw-type terminals         20 20 lbf·in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf·in         1         75 °C         AL or CU         Screw-type terminals         5 °C         AL or CU         Screw-type terminals         5 12 lbf·in         2         75 °C         CU         Screw-type terminals         1 15 lbf·in         1 15 lbf·in
Mounting/wiring           mounting position           fastening method           type of electrical connection for supply voltage line-side           tightening torque [lbf-in] for supply           type of connectable conductor cross-sections at line-side for           AWG cables single or multi-stranded           temperature of the conductor for supply maximum permissible           material of the conductor for supply           type of electrical connection for load-side outgoing feeder           tightening torque [lbf-in] for load-side outgoing feeder           type of connectable conductor cross-sections for AWG cables           for load-side outgoing feeder single or multi-stranded           temperature of the conductor for load-side outgoing feeder           material of the conductor for load-side outgoing feeder           maximum permissible           material of the conductor for load-side outgoing feeder           type of electrical connection of magnet coil           type of connectable conductor cross-sections of magnet coil for           AWG cables single or multi-stranded           temperature of the conductor at magnet coil maximum           permissible           material of the conductor at magnet coil           type of electrical connection for auxiliary contacts           tightening torque [lbf-in] at contactor for auxiliary contacts	vertical         Surface mounting and installation         Screw-type terminals         20 20 lbf in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf in         1         75 °C         AL or CU         Screw-type terminals         20 20 lbf in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf in         2         75 °C         CU         Screw-type terminals         10 15 lbf in         1

tightening torque [lbf·in] at overload relay for auxiliary contacts	7 10 lbf·in
type of connectable conductor cross-sections at overload relay for AWG cables for auxiliary contacts single or multi-stranded	2
temperature of the conductor at overload relay for auxiliary contacts maximum permissible	75 °C
material of the conductor at overload relay for auxiliary contacts	CU
Short-circuit current rating	
design of the fuse link for short-circuit protection of the main circuit required	10
design of the short-circuit trip	Thermal magnetic circuit breaker
maximum short-circuit current breaking capacity (Icu)	
• at 240 V	14 kA
• at 480 V	10 kA
• at 600 V	10 kA
certificate of suitability	NEMA ICS 2; UL 508; CSA 22.2, No.14
