2-speed 3-phase motor starter Size 1 3/4 One winding consequent pole Constant or variable torque Solid-state overload relays Low SPD OLR range 10-40a High SPD OLR range 10-40a 110V 50HZ / 120V 60HZ coil Enclosure NEMA type (open) No enclosure

product brand name	Class 30
design of the product	Full-voltage two speed motor starter
special product feature	ESP200 overload relay; Half-size controller
General technical data	
weight [lb]	8 lb
Height x Width x Depth [in]	7 × 10 × 3 in
touch protection against electrical shock	Not finger-safe
installation altitude [ft] at height above sea level maximum	6560 ft
ambient temperature [°F]	
during storage	-22 +149 °F
during operation	-4 +104 °F
ambient temperature	
during storage	-30 +65 °C
during operation	-20 +40 °C
country of origin	Mexico
Horsepower ratings	
yielded mechanical performance [hp] for 3-phase AC motor	
• at 200/208 V rated value	10 hp
• at 220/230 V rated value	10 hp
• at 460/480 V rated value	15 hp
• at 575/600 V rated value	15 hp
Contactor	
size of contactor	Controller half size 1 3/4
number of NO contacts for main contacts	6
operating voltage for main current circuit at AC at 60 Hz maximum	600 V
operational current at AC at 600 V rated value	40 A
mechanical service life (operating cycles) of the main contacts typical	1000000
Auxiliary contact	
number of NC contacts at contactor for auxiliary contacts	2
number of NO contacts at contactor for auxiliary contacts	2
number of total auxiliary contacts maximum	8
contact rating of auxiliary contacts of contactor according to UL	345VA@115VAC / 768VA@240VAC
Coil	
type of voltage of the control supply voltage	AC
control supply voltage	
• at AC at 50 Hz rated value	110 V
• at AC at 60 Hz rated value	120 V
holding power at AC minimum	8 W
apparent pick-up power of magnet coil at AC	218 VA

apparent holding power of magnet coil at AC	25 VA
operating range factor control supply voltage rated value of	01
magnet coil	· 1
percental drop-out voltage of magnet coil related to the input voltage	50 %
ON-delay time	19 29 ms
OFF-delay time	10 24 ms
Overload relay	
product function	
overload protection	Yes
phase failure detection	Yes
asymmetry detection	Yes
ground fault detection	Yes
test function	Yes
external reset	No
reset function	Manual, automatic and remote
trip class	CLASS 5 / 10 / 20 (factory set) / 30
adjustable current response value current of overload relay	
for low rotational speed	10 40 A
for high rotational speed	10 40 A
tripping time at phase-loss maximum	3 s
relative repeat accuracy	1%
product feature protective coating on printed-circuit board	Yes
number of NC contacts of auxiliary contacts of overload relay	1
number of NO contacts of auxiliary contacts of overload relay	1
operational current of auxiliary contacts of overload relay	
at AC at 600 V	5 A
• at DC at 250 V	1A
contact rating of auxiliary contacts of overload relay according to UL	5
insulation voltage (Ui)	
	600 \/
• with single-phase operation at AC rated value	600 V 200 V
<ul><li>with single-phase operation at AC rated value</li><li>with multi-phase operation at AC rated value</li></ul>	600 V 300 V
with single-phase operation at AC rated value     with multi-phase operation at AC rated value Mounting/wiring	300 V
with single-phase operation at AC rated value     with multi-phase operation at AC rated value Mounting/wiring mounting position	300 V vertical
with single-phase operation at AC rated value     with multi-phase operation at AC rated value Mounting/wiring mounting position fastening method	300 V vertical Surface mounting and installation
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side	300 V vertical Surface mounting and installation Screw-type terminals
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply	300 V vertical Surface mounting and installation Screw-type terminals 45 45 lbf-in
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side	300 V vertical Surface mounting and installation Screw-type terminals
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for	300 V vertical Surface mounting and installation Screw-type terminals 45 45 lbf-in
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded	300 V vertical Surface mounting and installation Screw-type terminals 45 45 lbf-in 1
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible	300 V vertical Surface mounting and installation Screw-type terminals 45 45 lbf-in 1 75 °C
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply	300 V vertical Surface mounting and installation Screw-type terminals 45 45 lbf·in 1 75 °C AL or CU
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder	300 V vertical Surface mounting and installation Screw-type terminals 45 45 lbf-in 1 75 °C AL or CU Screw-type terminals
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables	300 V vertical Surface mounting and installation Screw-type terminals 45 45 lbf in 1 75 °C AL or CU Screw-type terminals 45 45 lbf in
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder type of connectable conductor for load-side out	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf in         1
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder tightening torque feeder single or multi-stranded temperature of the conductor for load-side outgoing feeder top	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C
with single-phase operation at AC rated value     with multi-phase operation at AC rated value      Mounting/wiring      mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf·in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for supply     type of electrical connection for load-side outgoing feeder     tightening torque [lbf·in] for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     tightening torque [lbf·in] for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     tightening torque [lbf·in] for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of the conductor for load-side outgoing feeder     type of the conductor for load-side outgoing feeder     type and the conductor for load-side outgoing feeder     temperature of the conductor for load-side outgoing feeder     maximum permissible     material of the conductor for load-side outgoing feeder	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder type of electrical connection for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of the conductor for load-side outgoing feeder type of the conductor for load-side outgoing feeder temperature of the conductor for load-side outgoing feeder type of the conductor for load-side outgoing feeder temperature of the conductor for load-side outgoing feeder temperature of the conductor for load-side outgoing feeder type of electrical connection of magnet coil	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf in         1         Screw-type terminals         Screw-type terminals         Screw-type terminals
with single-phase operation at AC rated value     with multi-phase operation at AC rated value      Mounting/wiring      mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf·in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for supply     type of electrical connection for load-side outgoing feeder     tightening torque [lbf·in] for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     tightening torque [lbf·in] for load-side outgoing feeder     type of connectable conductor for supply     type of electrical connection for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of the conductor for load-side outgoing feeder     type of the conductor for load-side outgoing feeder     type of electrical connection of magnet coil     type of electrical connection of magnet coil     type of electrical connection of magnet coil	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf·in] at magnet coil type of connectable conductor cross-sections of magnet coil for AWG cables single or multi-stranded temperature of the conductor for supply feeder type of electrical connection of magnet coil type of electrical connection of magnet coil for AWG cables single or multi-stranded temperature of the conductor cross-sections of magnet coil for AWG cables single or multi-stranded temperature of the conductor cross-sections of magnet coil for AWG cables single or multi-stranded temperature of the conductor at magnet coil maximum	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in         2
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder type of connectable conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder twpe of connectable conductor for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf·in] at magnet coil tightening torque [lbf·in] at magnet coil material of the conductor at magnet coil maximum permissible	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in         2         75 °C
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf-in] at magnet coil type of connectable conductor at magnet coil maximum permissible material of the conductor at magnet coil	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf·in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf·in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf·in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf·in         2         75 °C         CU         Screw-type terminals         5 12 lbf·in         2         75 °C         CU
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder type of electrical connection for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf-in] at magnet coil type of connectable conductor at magnet coil maximum permissible material of the conductor at magnet coil type of electrical connection for auxiliary contacts	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in         2         75 °C         CU         Screw-type terminals         5 12 lbf-in         2         75 °C         CU         Screw-type terminals
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder type of electrical connection for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf·in] at magnet coil type of connectable conductor at magnet coil maximum permissible material of the conductor at magnet coil type of electrical connection for auxiliary contacts tightening torque [lbf·in] at contactor for auxiliary contacts	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in         2         75 °C         CU         Screw-type terminals         10 15 lbf-in
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor ross-sections for AWG cables for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf-in] at magnet coil type of connectable conductor at magnet coil type of electrical connection for auxiliary contacts tightening torque [lbf-in] at contactor for auxiliary contacts type of electrical connection for auxiliary contacts type of electrical connection for auxiliary contacts type of connectable conductor at magnet coil	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf-in         2         75 °C         CU         Screw-type terminals         10 15 lbf-in
with single-phase operation at AC rated value     with multi-phase operation at AC rated value  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf-in] at magnet coil type of connectable conductor at magnet coil maximum permissible material of the conductor at magnet coil type of electrical connection for auxiliary contacts tightening torque [lbf-in] at contactor for auxiliary contacts type of connectable conductor cross-sections at contactor for AWG cables single or multi-stranded temperature of the conductor at magnet coil type of electrical connection for auxiliary contacts type of connectable conductor cross-sections at contactor for AWG cables for auxiliary contacts single or multi-stranded temperature of the conductor cross-sections at contactor for AWG cables for auxiliary contacts single or multi-stranded temperature of the conductor cross-sections at contactor for AWG cables for auxiliary contacts single or multi-stranded temperature of the conductor cross-sections at contactor for AWG cables for auxiliary contacts single or multi-stranded temperature of the conduc	300 V         vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf in         1         75 °C         AL or CU         Screw-type terminals         45 45 lbf in         1         75 °C         AL or CU         Screw-type terminals         5 45 lbf in         1         75 °C         AL or CU         Screw-type terminals         5 12 lbf in         2         75 °C         CU         Screw-type terminals         10 15 lbf in         1

contacts	
tightening torque [lbf·in] at overload relay for auxiliary contacts	7 10 lbf·in
type of connectable conductor cross-sections at overload relay for AWG cables for auxiliary contacts single or multi-stranded	2
temperature of the conductor at overload relay for auxiliary contacts maximum permissible	75 °C
material of the conductor at overload relay for auxiliary contacts	CU
Short-circuit current rating	
design of the fuse link for short-circuit protection of the main circuit required	10
design of the short-circuit trip	Thermal magnetic circuit breaker
maximum short-circuit current breaking capacity (Icu)	
• at 240 V	14 kA
• at 480 V	10 kA
• at 600 V	10 kA
certificate of suitability	NEMA ICS 2; UL 508; CSA 22.2, No.14
