Data sheet

SITOP PSU8600/3AC/24VDC/20A PN

SITOP PSU8600 3AC 20 A PN stabilized power supply input: 400-500 V 3 AC output: 24 V DC/20 A with PN/IE connection web server integrated OPC UA server integrated *Ex approval no longer available*

| Input | |
|--|---|
| type of the power supply network | 3-phase AC |
| supply voltage at AC | |
| minimum rated value | 400 V |
| maximum rated value | 500 V |
| • initial value | 320 V; Derating 320 360 and 530 575 V |
| • full-scale value | 575 V |
| design of input wide range input | Yes |
| operating condition of the mains buffering | at Vin = 400 V; Prioritized supply of the output in case of power failure selectable via DIP switch (only in conjunction with CNX8600 expansion module) |
| buffering time for rated value of the output current in the event of power failure minimum | 15 ms |
| operating condition of the mains buffering | at Vin = 400 V; Prioritized supply of the output in case of power failure selectable via DIP switch (only in conjunction with CNX8600 expansion module) |
| line frequency | |
| 1 rated value | 50 Hz |
| 2 rated value | 60 Hz |
| line frequency | 47 63 Hz |
| input current | |
| at rated input voltage 400 V | 1.4 A |
| at rated input voltage 500 V | 1.1 A |
| current limitation of inrush current at 25 °C maximum | 14 A |
| I2t value maximum | 1.2 A ² ·s |
| fuse protection type | none |
| • in the feeder | Required: 3-pole connected miniature circuit breaker 6 16 A characteristic C or circuit breaker 3RV2011-1DA10 (setting 3 A) or 3RV2711-1DD10 (UL 489) |
| Output | |
| voltage curve at output | Controlled, isolated DC voltage |
| number of outputs | 1 |
| output voltage at DC rated value | 24 V |
| output voltage | |
| at output 1 at DC rated value | 24 V |
| relative overall tolerance of the voltage | 3 % |
| relative control precision of the output voltage | |
| on slow fluctuation of input voltage | 0.2 % |
| on slow fluctuation of ohm loading | 0.1 % |
| residual ripple | |
| • maximum | 100 mV |
| voltage peak | |
| • maximum | 200 mV |

| product function output voltage adjustable type of output voltage setting display version for normal operation type of signal at output behavior of the output voltage when switching on response delay maximum type of outputs connection voltage increase time of the output voltage • maximum output current • rated value • per output • at output 1 rated value • rated range supplied active power typical short-term overload current • at short-circuit during operation typical duration of overloading capability for excess current • at short-circuit during operation product feature • bridging of equipment number of parallel-switched equipment resources for increasing the power Efficiency efficiency efficiency in percent power loss [W] • at rated output voltage for rated value of the output current typical • during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical | Yes via potentiometer or IE/PN interface; Derating > 24 V: 4%/V; max. 480 W overall system 3-color LED for operating state device; LED for operating mode manual/remote 4 LEDs for communication PROFINET; 3-color LED for operating state output Relay contact (changeover contact, contact current capacity DC 60 V/0.3 A) for "Operating state OK" No overshoot of Vout (soft start) 1 s Simultaneous connecting-in of all outputs after device booting or delay time of 25 ms, 100 ms or "load-optimized" for sequential cutting-in of the outputs via DIP switches can be set (only with expansion module CNX8600) 500 ms 20 A 20 A |

| rated range supplied active power typical short-term overload current | 0 20 A; +50 +60 °C: Derating 2.5%/K; no derating in connection with expansion module CNX8600 and total load of the outputs at the basic device max. 240 W |
| supplied active power typical short-term overload current • at short-circuit during operation typical duration of overloading capability for excess current • at short-circuit during operation product feature • bridging of equipment number of parallel-switched equipment resources for increasing the power Efficiency efficiency in percent power loss [W] • at rated output voltage for rated value of the output current typical • during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | expansion module CNX8600 and total load of the outputs at the basic device max. 240 W |
| short-term overload current • at short-circuit during operation typical duration of overloading capability for excess current • at short-circuit during operation product feature • bridging of equipment number of parallel-switched equipment resources for increasing the power Efficiency efficiency in percent power loss [W] • at rated output voltage for rated value of the output current typical • during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | 480 W |
| at short-circuit during operation typical duration of overloading capability for excess current • at short-circuit during operation product feature • bridging of equipment number of parallel-switched equipment resources for increasing the power efficiency efficiency efficiency in percent power loss [W] • at rated output voltage for rated value of the output current typical • during no-load operation maximum closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | |
| duration of overloading capability for excess current • at short-circuit during operation product feature • bridging of equipment number of parallel-switched equipment resources for increasing the power Efficiency efficiency in percent power loss [W] • at rated output voltage for rated value of the output current typical • during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | |
| at short-circuit during operation product feature bridging of equipment number of parallel-switched equipment resources for increasing the power ifficiency efficiency efficiency in percent power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | 60 A; only in operation without CNX8600 extension module |
| product feature • bridging of equipment number of parallel-switched equipment resources for increasing the power ifficiency efficiency efficiency in percent power loss [W] • at rated output voltage for rated value of the output current typical • during no-load operation maximum closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | |
| bridging of equipment number of parallel-switched equipment resources for increasing the power ifficiency efficiency efficiency in percent power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | 25 ms |
| number of parallel-switched equipment resources for increasing the power ifficiency efficiency in percent power loss [W] • at rated output voltage for rated value of the output current typical • during no-load operation maximum closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | |
| the power Ifficiency efficiency efficiency in percent power loss [W] • at rated output voltage for rated value of the output current typical • during no-load operation maximum closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | Yes; suitable output characteristics via DIP switch can be selected |
| efficiency efficiency in percent power loss [W] • at rated output voltage for rated value of the output current typical • during no-load operation maximum closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | 2 |
| efficiency in percent power loss [W] • at rated output voltage for rated value of the output current typical • during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | |
| ower loss [W] • at rated output voltage for rated value of the output current typical • during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | 93 % |
| at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | |
| relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | 34 W |
| relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | 12 W |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of | |
| | 0.1 % |
| | 0.4 % |
| setting time | |
| - | 10 ms |
| Protection and monitoring | |
| | max. 35 V (max. 500 ms) |
| <u> </u> | Yes |
| design of short-circuit protection | Electronic overload shutdown; optional constant-current operation can be selected via DIP switch |
| | 2 20 A |
| • | via potentiometer or IE/PN interface |
| switching characteristic | |
| of the excess current | la >1.0<1.5 x la threshold permissible for 5 s; la limit (= 1.5 x la threshold) permissible for 200 ms |
| of the current limitation | la limit (= 1.5 x la threshold) permissible for 5 s, afterwards la threshold continuous |
| | via sensor or IE/PN interface |
| · | Non-electrically isolated 24 V input (signal level "high" at > 15 V) |
| | Total system overloadable 150% la rated to 5 s/min |
| · · · · · · · · · · · · · · · · · · · | |
| | |
| | Ethernet/PROFINET |
| | |
| | |
| design of the interface • PROFINET protocol | 3-color LED for operating state device; 3-color LED for operating state output Ethernet/PROFINET Yes Yes |

| Safety | |
|---|---|
| galvanic isolation between input and output | Yes |
| galvanic isolation | Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 |
| operating resource protection class | Class I |
| leakage current | |
| • maximum | 3.5 mA |
| protection class IP | IP20 |
| Approvals | |
| certificate of suitability | |
| CE marking | Yes |
| UL approval | Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259; cCSAus |
| CSA approval | (CSA C22.2 No. 60950-1, UL 60950-1) Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259; cCSAus (CSA C22.2 No. 60950-1, UL 60950-1) |
| • cCSAus, Class 1, Division 2 | No |
| • ATEX | No |
| certificate of suitability | |
| • IECEx | No |
| NEC Class 2 | No |
| ULhazloc approval | No |
| FM registration | No |
| type of certification CB-certificate | Yes |
| certificate of suitability | |
| EAC approval | Yes |
| • C-Tick | No |
| certificate of suitability shipbuilding approval | Yes |
| shipbuilding approval | ABS, DNV GL |
| Marine classification association | |
| American Bureau of Shipping Europe Ltd. (ABS) | Yes |
| French marine classification society (BV) | No |
| • DNV GL | Yes |
| Lloyds Register of Shipping (LRS) | No |
| Nippon Kaiji Kyokai (NK) | No |
| EMC | |
| standard | |
| for emitted interference | EN 55022 Class B |
| for mains harmonics limitation | EN 61000-3-2 |
| for interference immunity | EN 61000-6-2 |
| environmental conditions | |
| ambient temperature | |
| during operation | -25 +60 °C; with natural convection |
| during transport | -40 +85 °C |
| during storage | -40 +85 °C |
| environmental category according to IEC 60721 | Climate class 3K3, 5 95% no condensation |
| Mechanics | |
| type of electrical connection | Plug-in terminals with screwed connection |
| • at input | L1, L2, L3, PE: Plug-in terminal with 1 screwed connection each for 0.2 4 mm² single-wire / fine stranded |
| • at output | Output: plug-in terminals with 2 screw connectors for 0.2 4 mm 2 ; 0 V: screw terminal with 3 screw connectors for 0.2 4 mm 2 |
| • for auxiliary contacts | RST (Reset): Plug-in terminal (together with alarm signal) with 1 screwed connection for 0.2 1.5 mm² |
| for signaling contact | 11, 12, 14 (alarm signal): Plug-in terminal (together with Reset) with 1 screwed connection each for 0.2 1.5 mm² |
| product function | V |
| removable terminal at input | Yes |
| removable terminal at output | Yes |
| design of the interface for communication | PROFINET/Ethernet: two RJ45 sockets (2-port switch) |
| suitability for interaction modular system | Yes |
| width of the enclosure | 80 mm |
| height of the enclosure depth of the enclosure | 125 mm |
| | 150 mm |

| required spacing | |
|--|---|
| • top | 50 mm |
| • bottom | 50 mm |
| ● left | 0 mm |
| right | 0 mm |
| net weight | 1.8 kg |
| product feature of the enclosure housing can be lined up | Yes |
| fastening method | Snaps onto DIN rail EN 60715 35x15 |
| electrical accessories | Expansion modules CNX8600, buffer modules BUF8600, module UPS8600 |
| mechanical accessories | Device identification label 20 mm × 7 mm, TI-grey 3RT2900-1SB20 |
| MTBF at 40 °C | 298 979 h |
| other information | Specifications at rated input voltage and ambient temperature +25 °C (unless otherwise specified) |
