

TW5790 High-Precision Smart GNSS Antenna with L-Band PPP-RTK SDK

Calian's High Precision Tallysman **Smart GNSS antennas** integrate advanced receivers with High Precision Tallysman GNSS antennas, connecting Position, Navigation and Timing resources to host systems over digital interfaces.

Calian Smart GNSS SDK's are a plug and play evaluation platform for Calian's Smart Antennas, with tools such as: TruPrecision Software, short term complimentary augmentation subscription services and simple connection to a PC.

The TW5790 SDK supports the TW5790 High Precision GNSS Smart Antenna with L-Band PPP-RTK. TW5790 incorporates the u-Blox ZED-F9R GNSS receiver and NEO-D9S L-Band receiver. It features:

- MQTT client for PointPerfect PPP-RTK Corrections over LBand or terrestrial network (<6cm accuracy)
- NTRIP client for RTK Rover Configurations; local or Point One Navigation Polaris RTK or Swift Navigation Skylark corrections (cm-level accuracy)
- NMEA monitoring, satellite visibility and signal strength, GNSS status monitoring, Inertial Measurement Unit (IMU) monitoring and logging tools, with visual state heat-map
- Status console to pinpoint issues between antenna, connections and network corrections
- Complimentary trials of u-blox PointPerfect PPP-RTK service, Swift Navigation Skylark Cx Precise Positioning service and Point One Navigation Polaris RTK Service

Calian TW5790 High Precision Smart GNSS Antenna with L-Band SDK

TW5790 Smart GNSS Antenna

TruPrecision Software

Complimentary corrections trials

TW5790 SDK includes:

- 1x Calian TW5790 Dual Frequency Precision Smart Antenna/Receiver with L-Band receiver (USB or RS-232 see ordering information)
- 1x 23-0067-14: 10 cm ground plane
- Calian TruPrecision Application for PointPerfect IP correction streaming
- Trial subscriptions: PointPerfect PPP-RTK (60 days); Swift Navigation Skylark Cx (6 months); Point One Navigation Polaris RTK (2 weeks)

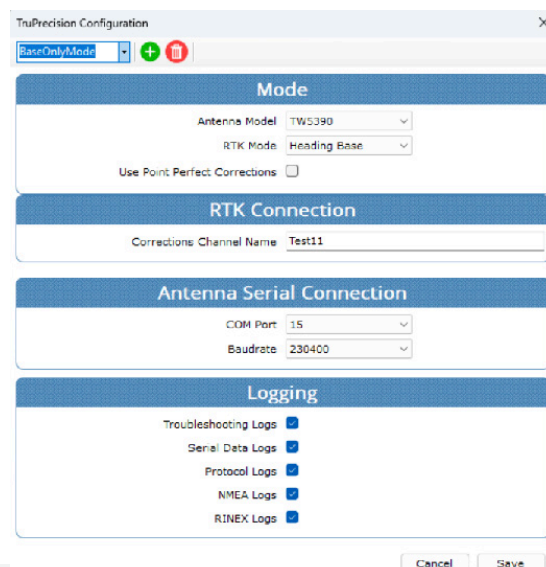

Ordering Information:

- 33-TP5790SDK-1 (USB) (33-5790-19-10-OS USB);
- 33-TP5790SDK-2 (RS-232) (33-5790-29-10-05-PC0 RS-232 + Serial to USB Converter)

The TruPrecision SDK application is a Windows application which provides an autonomous connection to stream PointPerfect, Swift Navigation Skylark and PointOne Polaris corrections and decryption keys to the TW5790 Smart Antenna, which also provides a Virtual COM Port to allow customers to connect their existing applications to the Calian Tallysman Smart GNSS Antenna high precision “corrected” position data output. The position data may be either NMEA or UBX formatted messages. ROS2® Drivers are available for integration with ROS2 open framework projects.

About Calian

We keep the world moving forward. Calian® helps people communicate, innovate, learn and lead safe and healthy lives. Every day, our employees live our values of customer commitment, integrity, innovation and teamwork to engineer reliable solutions that solve complex problems. That's Confidence. Engineered. A stable and growing 40-year company, we are headquartered in Ottawa with offices and projects spanning North American, European and international markets. Visit calian.com to learn about innovative healthcare, communications, learning and cybersecurity solutions.
