EP3000AC48TE Rectifier

3000W Output at 48-58V_{dc}

Key Features

Highly efficient rectifier

Efficiency $\geq 95\%$

Highly rugged rectifier

Exclusively designed to take care of wide line fluctuations and extreme climatic conditions prevailing typically in rural/ semi-urban areas ("B" & "C" telecom Circles) of India

- A Can withstand up to 500V_{ac} (Line-Neutral) continuously without any damage (for battery floated application)
- A. Can withstand 96 hrs of salt spray test (as per ASTM B117), Special protective coating on the PCBs and superior plating on the metal parts
- A Operation up to +70°C

Optimum power performance

Constant power between 176V ... 300V ac, linearly de-rated power between 175V ... 90V ac

Compact and light

Six rectifiers can be accommodated in one row (23" shelf) implying more compact system

Product Description

The rectifier EP3000AC48TE is a high Efficiency, single phase, hot- pluggable, fan-cooled rectifier and battery charger for stand - alone use or for working in parallel as part of a DC power system equipped with advanced digital controller. The constant output power (3000W i.e. 55.5A at 54V) characteristic supplies the specified power over the full output voltage range (48 to 58V_{dc}). It's backwardly compatible to earlier version of EP rectifier i.e. EP2500AC48/ EP3000AC48.

There is a digital communication (RS-485 bus) between rectifier and controller which allows flexible system design.

Compliant to RoHS Directive 2011/65/EU and amended Directive (EU) 2015/863

Compliant to REACH Directive (EC) No 1907/2006

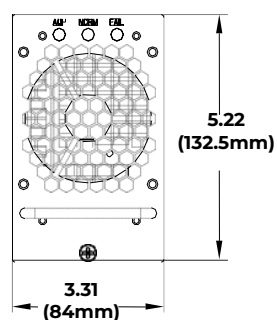

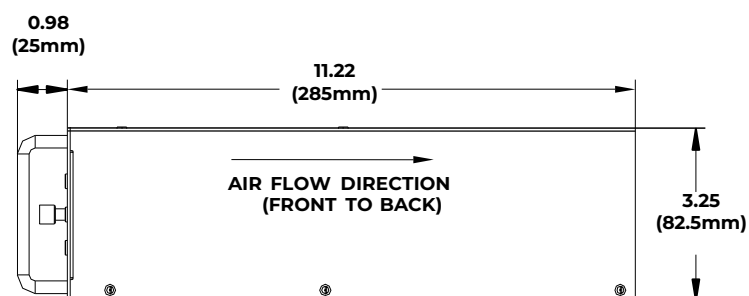

UL and cUL approved to UL/CSA[†]62368-1, TUV (EN62368-1), CE[§] Mark (for LVD) and CB Report available

Applications

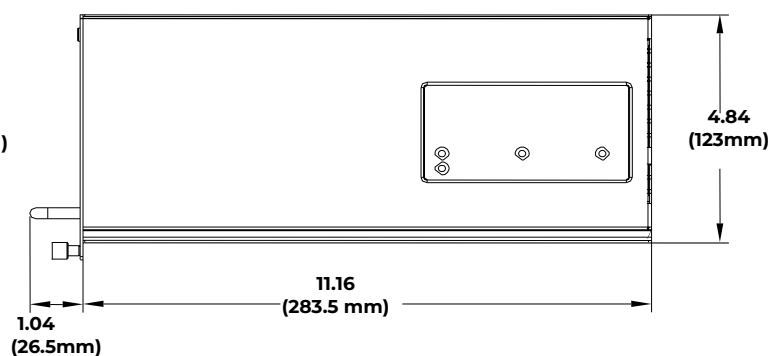

The typical applications for this rectifier are both in indoor and outdoor environments and include:

- Telecommunication Equipment Power
- Wireless Cell Site Power Systems
- Central Office Power Plants
- Base Station Power Plants
