General description

The Ha-VIS FE SFP Transceiver MM L2 is the high performance and cost-effective module for serial optical data communication applications specified for multimode of 155 Mbit/s. It operates with +3.3 V power supply. The module is intended for multimode fiber, operates at a nominal wavelength of 1310 nm and complies with Multi-Source Agreement (MSA) Small Form Factor Pluggable (SFP). Each module consists of a transmitter optical subassembly, a receiver optical subassembly and an electrical subassembly. All of them are housed in a plastic package and the combination produces a reliable component.

The module is a duplex LC connector transceiver designed to provide an ATM/SONET OC-3/SDH STM-1 compliant link for 155 Mbit/s short reach applications. The characteristics are performed in accordance with Telcordia Specification GR-468-CORE.
