The **HARTING eCatalogue / eShop** can be found on our homepage at **www.HARTING.com** or at the direct link **www.eCatalogue.HARTING.com**.

The HARTING e-Catalogue is your platform for conveniently selecting individual products as well as configuring complete solutions. Our comprehensive product pages provide you with all necessary technical information and CAD files in various formats for downloading. You may also contact our technical sales department directly.

Find out about **product innovations and news** on the start page of the HARTING e-Catalogue or go directly to **www.product-news.HARTING.com**.

Registered users can take advantage of MyHARTING to check on availability or prices, and to place or track their orders. Here, your customized "HARTING history" provides you with a list of your inquiries, quotations and more.

Sign up now for your free e-Catalogue account at HARTING!

www.eShop.HARTING.com

Product samples: Fast-track delivery to your desk, free of charge

The new free express sample service in the HARTING eCatalogue allows customers to order samples immediately, easily and completely free of charge. A broad selection is now available. If a product is unavailable, the system offers alternative products with similar features that can be requested at a mouse click.

The free samples are shipped within 24 hours at no cost to you. This service enables tremendous flexibility, especially in the design phase of projects.

General information

It is the customer's responsibility to check whether the components illustrated in this catalogue also comply with different regulations from those stated in special fields of applications.

We reserve the right to modify designs or substance of content in order to improve quality, keep pace with technological advancement or meet particular requirements in production.

No part of this catalogue may be reproduced in any form (print, photocopy, microfilm or any other process) or processed, duplicated or distributed by means of electronic systems without the prior written consent of HARTING Technology Group, Espelkamp. We are bound by the German version only.

Transforming customer wishes into concrete solutions

The HARTING Technology Group is skilled in the fields of electrical, electronic and optical connection, transmission and networking technology, as well as in manufacturing, mechatronics and software creation. The Group uses these skills to develop customized solutions and products such as connectors for energy and data-transmission/data-networking applications, including, for example, mechanical engineering, rail technology, wind energy plants, factory automation and the telecommunications sector. In addition, HARTING also produces electro-magnetic components for the automobile industry and offers solutions in the field of housing technology and shop systems.

The HARTING Group currently comprises 58 sales companies and production plants worldwide employing a total of about 5,300 staff.

HARTING Subsidiary

HARTING Representation

We aspire to top performance.

Connectors ensure functionality. As core elements of electrical and optical termination, connection and infrastructure technologies, they are essential in enabling the modular construction of devices, machines and systems across an extremely wide range of industrial applications. Their reliability is a crucial factor guaranteeing smooth functioning in the manufacturing area, telecommunications, applications in medical technology – in short, connectors are at work in virtually every conceivable application area. Thanks to the ongoing development of our technologies, our customers enjoy investment security and benefit from durable, long-term functionality.

Wherever our customers are, we're there.

Increasing industrialization is creating growing markets that are characterized by widely diverging demands and requirements. What these markets all share in common is the quest for perfection, increasingly efficient processes and reliable technologies. **HARTING** is providing these technologies – in Europe, the Americas and Asia. In order to implement customer requirements in the best possible manner, the **HARTING** professionals at our international subsidiaries engage in up-close, partnership-based interaction with our customers, right from the very early product development phase.

Our on-site staff form the interface to the centrally coordinated development and production departments. In this way, our customers can rely on consistently high, superior product quality – worldwide.

Our claim: Pushing Performance.

HARTING provides more than optimally attuned components. In order to offer our customers the best possible solutions, on request **HARTING** contributes a great deal more and is tightly integrated into the value-creation process.

From ready-assembled cables through to control racks or ready-to-go control desks. Our aim is to generate maximum benefit for our customers – with no compromises!

Quality creates reliability – and warrants trust.

The **HARTING** brand stands for superior quality and reliability – worldwide. The standards we set are the result of consistent, stringent quality management that is subject to regular certifications and audits.

EN ISO 9001, the EU Eco-Audit and ISO 14001:2004 are key elements here. We take a proactive stance towards new requirements, which is why **HARTING** is the first company worldwide to have obtained the new IRIS quality certificate for rail vehicles.

HARTING technology creates added value for customers.

Technologies by **HARTING** are at work worldwide. **HARTING's** presence stands for smoothly functioning systems powered by intelligent connectors, smart infrastructure solutions and sophisticated network systems. Over the course of many years of close, trust-based cooperation with its customers, the **HARTING** Technology Group has become one of the leading specialists globally for connector technology. We offer individual customers specific and innovative solutions that go beyond the basic standard functionalities. These tailored solutions deliver sustained results, ensure investment security and enable customers to achieve significant added value.

Opting for HARTING opens up an innovative, complex world of concepts and ideas.

In order to develop and produce connectivity and network solutions serving an exceptionally wide range of connector applications in a professional and cost-effective manner, **HARTING** not only commands the full array of conventional tools and basic technologies. Above and beyond these capabilities, **HARTING** is constantly harnessing and refining its broad base of knowledge and experience to create new solutions that also ensure continuity. To secure its lead in know-how, **HARTING** draws on a wealth of sources from its in-house research and applications.

Salient examples of these sources of innovative knowledge include microstructure technologies, 3D design and connection technolo-

gy, high-temperature and ultrahigh-frequency applications that are finding use in telecommunications and automation networks, in the automotive industry, or in industrial sensor and actuator applications, RFID and wireless technologies, in addition to packaging and housing made of plastics, aluminum and stainless steel.

HARTING overcomes technological limitations.

Drawing on the comprehensive resources of the group's technology pool, **HARTING** devises practical solutions for its customers. Whether this involves industrial networks for manufacturing automation, or hybrid interface solutions for wireless telecommunication infrastructures, 3D circuit carriers with microstructures, or cable assemblies for high-temperature applications in the automotive industry – **HARTING** technologies offer not only components, but comprehensive solutions attuned to individual customer requirements and preferences. The range of cost-effective solutions covers ready-to-use cable configurations, completely assembled backplanes and board system carriers, as well as fully wired and tested control panels.

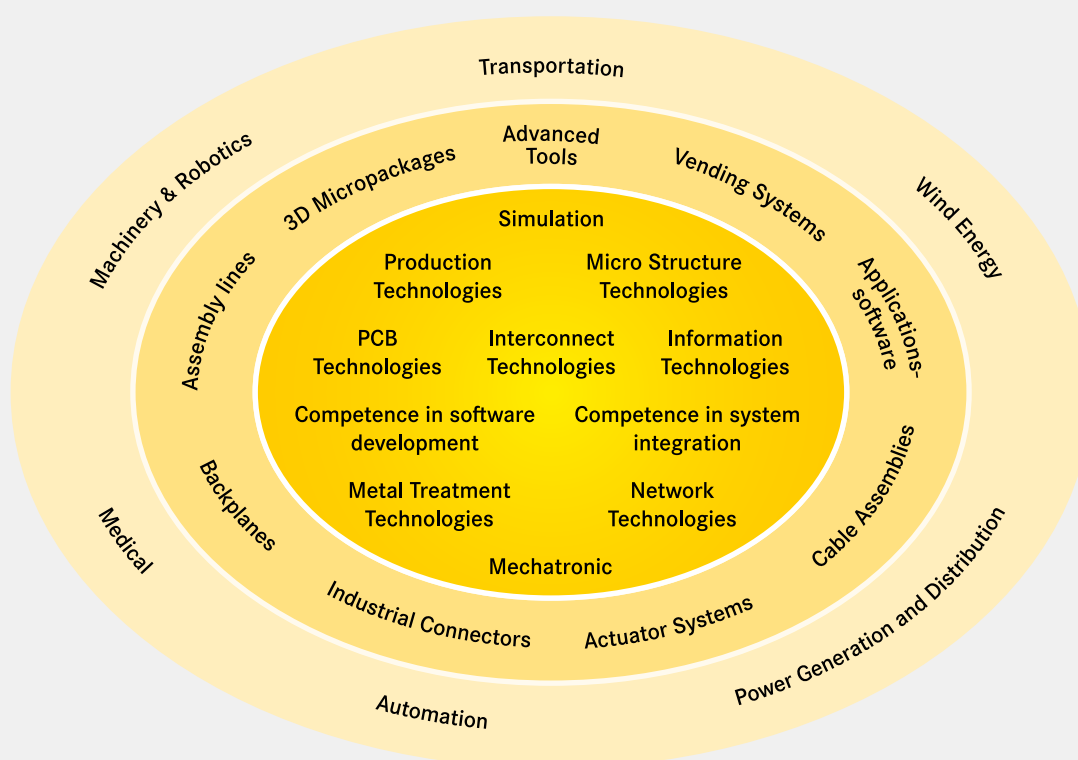

In order to ensure the future-proof design of RF and EMC-compatible interface solutions, the central **HARTING** laboratory (certified to EN 45001) employs simulation tools, as well as experimental, testing and diagnostics facilities all the way to scanning electron microscopes. In addition to product and process suitability considerations, lifecycle and environmental aspects play a key role in the selection of materials and processes.

HARTING's knowledge is practical know-how that generates synergy effects.

HARTING commands decades of experience with regard to the applications conditions involved in connections in telecommunications, computer, network and medical technologies, as well as industrial automation technologies, e.g. in the mechanical engineering and plant engineering areas, in addition to the power generation industry and the transportation sector. **HARTING** is highly

conversant with the specific application areas in all of these technology fields. In every solution approach, the key focus is on the application. In this context, uncompromising, superior quality is our hallmark. Every new solution found invariably flows back into the **HARTING** technology pool, thereby enriching our resources. And every new solution we go on to create will draw on this wealth of resources in order to optimize each and every individual solution. **HARTING** is synergy in action.

Benefits

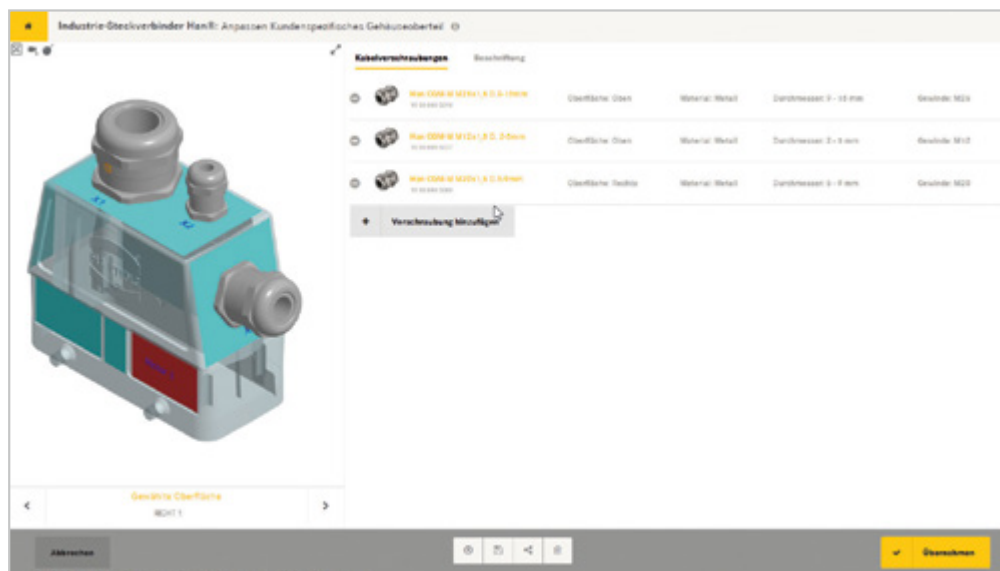

- Full flexibility to place cable entries on three sides of the hood
- Positioning of cable entries from diameter M12 x 1.5 to M40 x 1.5
- Configurations of both complete cable glands as well as single threads are possible
- Eight positions available for laser inscription identifying the component as well as for cable designation
- Direct download option for drawings and 3D models created with the configurator

- Perfect fit solutions without compromise due to new customising functions
- Time savings by downloading 3D data of the complete interface, with data available immediately after configuration
- Short delivery time due to fully automated manufacturing of your connector configuration
- Efficient collaboration due to myHARTING dashboard management with save and share functions

The Han® Configurator is an online tool for the design of industrial connectors. It enables users to quickly and easily design the optimal interface for their application.

With the new customising function of the Han® Configurator, we are again expanding the scope for tailor-made products based on the Han® portfolio.

The user can define the number, size and position of cable entries. They can also apply individual laser markings to identify cables and equipment. Immediately after completion, the design data is available for download and the user can order the custom-fit solution. Engineering processes will not be interrupted as small quantities, even down to batches of one, are possible.

Learn more:
www.HARTING.com/configurator

Automated manufacturing of customised connectors

The Han® Configurator represents a continuous process, ranging from design and product development right up to the production environment for the manufacture of the connectors. For the customer, design support shortens the time between design and delivery of the component. HARTING benefits from the “digital twins” of the interfaces that manage their manufacturing processes.

Once the design has been completed, the user receives the 3D data, type sheets and parts lists that make up the created solution, allowing them to transfer it to their own engineering environment.

From a customer's perspective, the Han® Configurator expands the variety of available solutions. The user can be sure that they will receive the best possible product for their task.

Description of possibilities

Cable glands M12 - M40
3 sides of the hood

Laser printing on 8 sides of the hood

Number of contacts

1

200 A 1.500 V 8 kV 2

Connectors for battery storage market

Single locking lever

Features

- Fulfils requirements according to the newest standards of the battery storage market
- Finger safe male and female contacts
- Compact construction type
- Housing 360° rotatable even when mounted

Technical characteristics

Number of contacts	1
Rated current	200 A
Rated voltage	1500 V
Rated impulse voltage	8 kV
Pollution degree	2
Insulation resistance	$>10^8 \Omega$
Contact resistance	$\leq 0.3 \text{ m}\Omega$
Limiting temperature	-40 ... +125 °C
Number of relockings	≥ 500
Degree of protection acc. to IEC 60529	IP20
Material (hood/housing)	Polyamide (PA)
Colour (hood/housing)	RAL 9005 (jet black), RAL 3001 (signal red)
Material (contacts)	Copper alloy
Material (accessories)	Thermoplastic polyurethane (TPU)
Material flammability class acc. to UL 94	V-0

Derating

Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

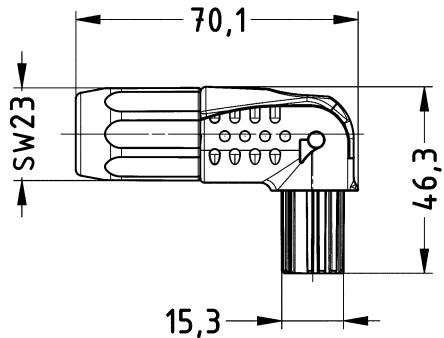

Measuring and testing techniques acc. to IEC 60512-5-2

Han

Features

- High density of contacts
- For requirements up to 250 V / 10 A
- Time saving rapid termination by use of crimping contacts
- Gold and silver contacts available

Technical characteristics

Number of contacts	55, 75, 107
Rated current	10 A
Rated voltage	250 V
Rated impulse voltage	4 kV
Pollution degree	3
Insulation resistance	$>10^{10} \Omega$
Limiting temperature	-40 ... +125 °C
Mating cycles	≥ 500
Material (insert)	Polycarbonate (PC)
Colour (insert)	RAL 7032 (pebble grey)
Material flammability class acc. to UL 94	V-0

Derating

Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Han

Number of contacts

1

200 A 1.000 V 8 kV 3

Features

- Power module for big cross-sections up to 70 mm²
- High rated voltage up to 1300 V
- IP20 protection for female and male module (by using male contacts with protective cap)
- Compatible to the Han® 300 A module
- Easy removal of the contacts

Technical characteristics

Number of contacts	1
Rated current	200 A
Rated voltage	1000 V
Rated impulse voltage	8 kV
Pollution degree	3
Rated voltage	1000 V AC, 1300 V DC
Insulation resistance	>10 ¹⁰ Ω
Contact resistance	≤0.3 mΩ
Limiting temperature	-40 ... +125 °C
Mating cycles	≥500
Material (insert)	Polycarbonate (PC)
Colour (insert)	RAL 7032 (pebble grey)
Material (contacts)	Copper alloy
Material flammability class acc. to UL 94	V-0
RoHS	compliant with exemption

Specifications and approvals

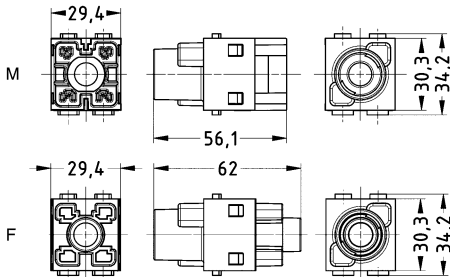

EN 50124-1
EN 60664-1
IEC 61984
DNV GL

Details

For more technical details (i.e. number of crimping operations or crimping position) see eCatalogue

Han

Number of contacts

36

10 A 400 V 6 kV 3

Features

- 36 Han D[®] contacts up to 400 V
- Suitable for transmitting power (10 A) and signals in one module
- e.g. for three phase AC motors including feedback for all six axes of a robot

Technical characteristics

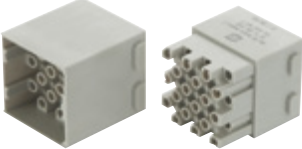

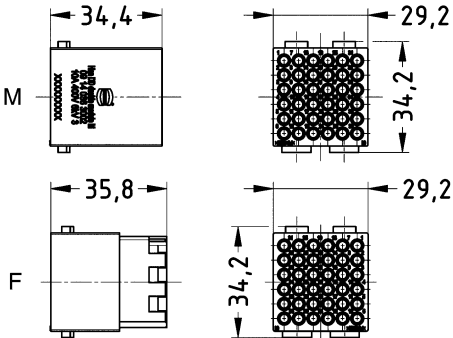

Number of contacts	36
Rated current	10 A
Rated voltage	400 V
Rated impulse voltage	6 kV
Pollution degree	3
Insulation resistance	>10 ¹⁰ Ω
Contact resistance	≤3 mΩ
Limiting temperature	-40 ... +125 °C
Mating cycles	≥500
Mating cycles with other HMC components	≥10000
Material (insert)	Polycarbonate (PC)
Colour (insert)	RAL 7032 (pebble grey)

100 A 830 V 8 kV 3

Han

Features

- Crimp or axial screw termination available
- Unlock of contacts with a screw driver from mating side
- Separate axial screw contacts can be terminated without any special tools directly to the wire

Technical characteristics

Number of contacts	1
Rated current	100 A
Rated voltage	830 V
Rated impulse voltage	8 kV
Pollution degree	3
Rated voltage acc. to UL	600 V
Insulation resistance	$>10^{10} \Omega$
Contact resistance	$\leq 0.3 \text{ m}\Omega$
Limiting temperature	-40 ... +125 °C
Mating cycles	≥ 500
Material (insert)	Polycarbonate (PC)
Colour (insert)	RAL 7032 (pebble grey)
Material (contacts)	Copper alloy
Material flammability class acc. to UL 94	V-0
RoHS	compliant, compliant with exemption

Derating

Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques acc. to IEC 60512-5-2

Drawing
(dimensions in mm)

Stripping length 13 mm

Technical characteristics

Input voltage	24 V DC ±10 %
Current consumption	100 mA
Limiting temperature	-20 ... +55 °C
Relative humidity	5 ... 95 %
Material (insert)	Polycarbonate (PC)
Colour (insert)	RAL 7032 (pebble grey)
Material flammability class acc. to UL 94	V-0

Specifications and approvals

EN 61000-6-2
EN 61000-6-4
EN 61010-1
EN 61010-2-030
EN 61326-1

Details

Must be sourced with PELV or SELV acc. EN 50178.
Voltage source must be galvanically isolated from power mains.

Identification	Part number Male	Drawing (dimensions in mm)
<p>Han-Modular®, HEM module, Modbus RTU Communication interface for the use in combination with 09 80 504 1200</p> 	09 80 316 0100	 <p>Interface : <i>har-flexicon</i>®, 2-pin RS 485 Modbus RTU/slave: <i>har-flexicon</i>®, 3-pin</p>

Number of contacts

6+

35 A 400/690 V 6 kV 3
35 A 500 V 6 kV 3

Features

- Suitable for power supply applications
- Crimp termination

Technical characteristics

Number of contacts	6
Rated current	35 A
Rated voltage conductor-earth	400 V
Rated voltage conductor-conductor	690 V
Rated impulse voltage	6 kV
Pollution degree	3
Rated voltage acc. to UL	600 V
Rated voltage acc. to CSA	600 V
Insulation resistance	>10 ¹⁰ Ω
Contact resistance	≤1 mΩ
Limiting temperature	-40 ... +125 °C
Mating cycles	≥500
Material (insert)	Polycarbonate (PC)
Colour (insert)	RAL 7032 (pebble grey)
Material (contacts)	Copper alloy
Material flammability class acc. to UL 94	V-0

Han

Features

- Application with socket and data connector (RJ45, USB)
- Compact design for easy installation in single or double frame
- Suitable for data module in HIFF-size
- Screening shield to optimise EMC protection

Technical characteristics

Mounting depth	30 mm
Supply voltage	250 V AC
Nominal frequency	50 Hz, 60 Hz
Nominal current	13 A, 10 A
Material (hood/housing)	Thermoplastic
RoHS	compliant

Specifications and approvals

Identification	Conductor cross-section (mm²)	Part number

Connector for food+beverage industry
Screw locking

Han

Features

- "Easy-to-Clean" design
- Certified by Ecolab
- IP6K9K acc. to ISO 20653
- Inserts for Data / Signal / Power / Hybrid
- Han® 3 A inserts adaptable

Technical characteristics

Limiting temperature	-40 ... +125 °C
Mating cycles	≥500
Degree of protection acc. to IEC 60529	IP67, in locked position, IP6K9K acc. to ISO 20653
Material (hood/housing)	Polypropylen
Colour (hood/housing)	Black, Blue
Material (seal)	EPDM, Silicone
Colour (seal)	Blue

Standard hoods/housings for industrial connectors
Double locking lever

Han

Features

- Reduces the number of connector interfaces required on the machine (with up to 8 Han Modular® inserts in one housing)
- Han-Easy Lock® bracket (cross) or metal bracket (longitudinal) available
- Cable entries can be designed variably (up to M50) using the hood configurator

Technical characteristics

Limiting temperature	-40 ... +125 °C
Degree of protection acc. to IEC 60529	IP65
Type rating acc. to UL 50 / UL 50E	4, 4X, 12

Ha-VIS eCon 2000 Advanced 8 ports.....

New 3.4

Switch

Features

- Unmanaged Plug & Play Gigabit Switch
- Robust and miniaturised Ethernet interface ix Industrial®
- Flat design for DIN rail or wall mounting
- Optimised for imaging processes and other data intensive applications
- Full Gigabit Ethernet Non Blocking switch architecture according to IEEE 802.3

Technical characteristics

Series	Ha-VIS eCon 2000
Element	Industrial Ethernet Switches
Specification	Unmanaged
Total number of ports	5
Operating temperature	-40 ... +70 °C
Storage temperature	-40 ... +85 °C
Degree of protection acc. to IEC 60529	IP30, when mated
Nominal voltage	24 V DC, 48 V DC
Power consumption	3.1 W @ 24 V DC, 3.4 W @ 48 V DC
10/100/1000 Mbit/s (ix Industrial®-Ports)	5 x
Transmission standard	10BASE-Te, 100BASE-TX EEE, 1000BASE-T EEE
Auto-negotiation	Yes
Auto-polarity	Yes
Auto-MDI(X)	Yes
Transmission physics	Twisted Pair, Cat. 5
Data rate	10 Mbit/s, 100 Mbit/s, 1000 Mbit/s
Transmission length	100 m
Material (hood/housing)	Aluminium (anodised)

New products for Single Pair Ethernet (SPE)

Single Pair Ethernet – the new transmission technology using only one wire pair

Introduction

The current IEEE standards

New TCP/IP-based transmission methods that use only one copper pair will replace old bus systems and analogue interfaces like the 20 mA current loop. They should also seamlessly connect sensor/actuator networks to Ethernet-based automation networks (such as PROFINET).

IEEE 802.3 is developing various transmission standards for this purpose. These include, firstly, the 100BASE-T1 in IEEE 802.3bw for 100 Mbit/s transmissions as well as the IEEE 802.3bp 1000BASE-T1 Gigabit version. It also defines a standard for remote power supply called Power over Data Line (PoDL) (IEEE 802.3bu). The combination of data and power using very small connectors and single pair cables enables miniaturisation, higher data rates and modularisation for simple as well as complex systems. IEEE is currently working on a further standard for even higher data rates up to 10 Gbit/s (IEEE 802.3ch), which are required for high-resolution sensors and video transmissions. A standard for only 10 Mbit/s (IEEE 802.3cg) is also released. This standard is highly relevant for many industries, since it enables transmission distances of up to 1,000 metres.

Single Pair Ethernet transmission length and speed

Legend:

- Standard final released
- Standard in progress
- HARTING internal tested transmission length

Overview of the relevant SPE/T1 standards for industry (status 3/2020)

Data transmission speed	Bandwidth	Protocol acc. to	Status	Cabling acc. to	Link length	Note
10 Mbit/s	20 MHz	IEEE802.3cg	available	10BASE-T1	1000 m	shielded
100 Mbit/s	200 MHz	IEEE802.3bw	available	100BASE-T1	40 m	shielded
1 Gbit/s	600 MHz	IEEE802.3bp	available	1000BASE-T1	40 m	shielded
additional remote power supply		IEEE802.3bu	available			

Standards are essential – even for interfaces

The successful and large-scale implementation of SPE requires the consistent compatibility of devices, cables and connectors. Standardised and harmonised interfaces are the key for all manufacturers so that they can jointly develop an SPE product ecosystem consisting of sensors, actuators, controllers and connection technology. Users can then create suitable automation solutions with these components and be sure of their investment.

The mating face is described as a standard under IEC 63171-6. It is specially designed for use in environmental conditions up to M₃L₃C₃E₃.

The various transmission speeds (bit rates) and ranges for SPE and the requirements up to M₃L₃C₃E₃ result in an extensive product range for SPE connectors, which HARTING will cover as follows:

- IP20 products for use in protected zones, in control cabinets or within devices with:
 - PCB sockets – horizontal and vertical/straight and angled
 - Cable plugs – initially with crimp contacts, later also as IDC version
 - Preassembled cords, also available in over-moulded version
- IP65/67 products for use in industrial environments
 - Same/similar PCB sockets as IP20, but with M8 or M12 housing with threaded and PushPull locking added
 - Matching M8 or M12 cable sockets
 - Preassembled cords, also available in over-moulded version
- IP65/67 SnapIn variants
 - Sockets, plugs and cords with flexible plastic protective housings provide very compact space-saving solutions for devices and distributors

All HARTING T1 Industrial connectors are based on the same SPE data container, in the form of a contact carrier with shield plate. This delivers consistent stability and high performance, identical assembly sequences and plug-in compatibility between the different HARTING T1 Industrial IPxx variants. For example, the user can plug SPE IP20 cords onto T1 M8 or M12 sockets for measuring and testing purposes.

A complete SPE cable portfolio is being prepared so that complete cabling based on SPE and HARTING T1 Industrial can also be implemented. Corresponding standards are also being worked on for the cables which describe the basic structure and the assured performance:

Data transmission speed	Bandwidth	Cable standard	Laying procedure	Core structure	Typical cores	Note
1 Gbit/s	600 MHz	IEC 61156-11	unmoved	solid wire	AWG23/1 and 22/1	shielded
1 Gbit/s	600 MHz	IEC 61156-12	moved	stranded wire	AWG26/7	shielded
10 Mbit/s	20 MHz	IEC 61156-13	unmoved	solid wire	AWG18...16	shielded
10 Mbit/s	20 MHz	IEC 61156-14	moved	stranded wire	AWG22...26	shielded

Notice: According to IEC 61156-1x, the SPE cables are modified accordingly for use in different MICE environments and for special applications. Cables suitable for drag chains, torsion cables, outdoor cables and SPE cables can thus be used in railway applications.

The HARTING T1 Industrial cabling components shown here are the basis portfolio. They enable the SPE/T1 interfaces to be integrated onto devices and the power supply connection for these devices. HARTING's T1 Industrial portfolio will be successively expanded. Thanks to its forward-looking design, it can also be expanded for applications in the direction of 10 Gbit/s.

Number of contacts

2

+ shielding

Inter-
face

Features

- Internationally standardised mating face acc. to IEC 63171-6
- For the construction of future-proof and standardised Single Pair Ethernet (SPE) communication networks with standardised cabling according to ISO / IEC 11801 and TIA 42
- Designed for industrial applications up to M₃L₃C₃E₃ environmental conditions
- Meets all IEEE 802.3 requirements for SPE
- Robust industrial design with 360° shielding, locking lever protection and high mating cycles
- Suitable for remote power supply for all Power over Data Line (PoDL) classes

Technical characteristics

Number of contacts	2
Additional contacts	+ shielding
Rated current	4 A
Rated voltage	60 V DC
Test voltage U _{DC}	1 kV (contact-contact), 2.25 kV (contact-ground)
Contact resistance	≤20 mΩ
Shielding resistance	≤100 mΩ
Limiting temperature	-40 ... +85 °C
Mating cycles	≥1000
Degree of protection acc. to IEC 60529	IP20
Transmission characteristics	600 MHz, Bandwidth
Data rate	10 Mbit/s, 100 Mbit/s, 1 Gbit/s
Moisture Sensitivity Level (MSL)	1, acc. to ECA/IPC/JEDEC J-STD-020D
Process Sensitivity Level (PSL)	R0, acc. to ECA/IPC/JEDEC J-STD-020D
RoHS	compliant

Specifications and approvals

IEC 63171-6
 IEEE 802.3bu (remote power supply over PoDL = Power over Data Line)
 IEEE 802.3cg (10BASE-T1)
 IEEE 802.3bw (100BASE-T1)
 IEEE 802.3bp (1000BASE-T1)

Details

Unmating under electrical load with 1.5 A / 60 V. 50 cycles for each polarity.

Cable diameter	5.5 ... 7.2 mm
Transmission characteristics	Cat. 6 _A , Class E _A up to 500 MHz
Data rate	10 Mbit/s, 100 Mbit/s, 1 Gbit/s, 2.5 Gbit/s, 5 Gbit/s, 10 Gbit/s
Insertion force	≤25 N
Withdrawal force	≤25 N
Material (insert)	Polyamide (PA)
Colour (insert)	Black
Material (contacts)	Copper alloy
Surface (contacts)	Au over Ni
Material flammability class acc. to UL 94	V-0
RoHS	compliant

Specifications and approvals

IEC 61076-3-124
UL 1977 ECBT2.E102079
CSA-C22.2 No. 182.3 ECBT8.E102079

<div><p>HARTING ix Industrial®, Data, Cable connector, IDC termination, Fully shielded, 360° shielding contact, for AWG 24 and conductor diameters from 1.1 - 1.25 mm, Pack contents: Packaging with 100 pieces</p></div>	09 45 181 2562 XL	<div></div>

Number of contacts

10

Inter-
face

Features

- Miniaturised interface for signals and bus systems in acc. to IEC 61076-3-124 type B, suitable for industrial use
- Robust industrial design
- 360° shielding
- 5000 mating cycles
- Very small and space saving interface

Technical characteristics

Number of contacts	10
Rated current	1.5 A
Rated voltage	50 V AC, 60 V DC
Test voltage $U_{r.m.s.}$	0.5 kV
Contact resistance	$\leq 30\text{ m}\Omega$
Shielding resistance	$\leq 100\text{ m}\Omega$
Limiting temperature	-40 ... +85 °C
Storage temperature	-30 ... +60 °C
Mating cycles	≥ 5000
Conductor cross-section	AWG 28/7 ... AWG 22/7, AWG 28/7 ... AWG 26/7, AWG 24/7
Wire outer diameter	$\leq 1.55\text{ mm}$, 0.95 ... 1.05 mm, 1.1 ... 1.25 mm
Degree of protection acc. to IEC 60529	IP20
Retention force	$\geq 80\text{ N}$ locking
Cable diameter	5.5 ... 7.2 mm
Insertion force	$\leq 25\text{ N}$
Withdrawal force	$\leq 25\text{ N}$
Material (insert)	Polyamide (PA)
Colour (insert)	Black
Material (contacts)	Copper alloy
Surface (contacts)	Au over Ni
Material flammability class acc. to UL 94	V-0
RoHS	compliant

Identification

Part number

Drawing (dimensions in mm)

HARTING ix Industrial®,
Signal,
Cable connector,
Solder termination,
Fully shielded, 360° shielding contact,
for AWG 28/7 - 22/7 and conductor diameters
up to 1.55 mm,
Pack contents:
Packaging with 100 pieces

09 45 181 9000 XL

HARTING ix Industrial®,
Signal,
Cable connector,
IDC termination,
Fully shielded, 360° shielding contact,
for AWG 28/7 - 26/7 and conductor diameters
from 0.95 - 1.05 mm,
Pack contents:
Packaging with 100 pieces

09 45 181 9001 XL

HARTING ix Industrial®,
Signal,
Cable connector,
IDC termination,
Fully shielded, 360° shielding contact,
for AWG 24 and conductor diameters
from 1.1 - 1.25 mm,
Pack contents:
Packaging with 100 pieces

09 45 181 9002 XL

Identification	Part number	
Assembly tool, for HARTING ix Industrial® to assemble the single wire to the IDC and the cable strain relief crimping	09 45 800 0181	
Removal tool, for HARTING ix Industrial® as pull-out aid for close-fitting ix Industrial® connectors	09 45 800 0182	

Inter-
face

Features

- PushPull housing (bulkhead mounting) with HARTING PushPull technology
- Small, space-saving PushPull interfaces in IP65 / IP67
- High packing density (spacing 25 x 18 mm)

Technical characteristics

Limiting temperature	-40 ... +70 °C
Mating cycles	≥750
Locking type	PushPull
Degree of protection acc. to IEC 60529	IP65 / IP67
Material (hood/housing)	Polybutylene terephthalate (PBT)
Colour (hood/housing)	Black
Material (seal)	PTS
Colour (seal)	Yellow
Material flammability class acc. to UL 94	V-0

Details

Can be combined with HARTING ix Industrial® jacks, angled, horizontal, vertical, types A and B

Identification

HARTING Mini PushPull,
Bulkhead mounted housing,
Without board locks,
Available as from Q3/2020

Part number

09 51 521 0001

Drawing (dimensions in mm)

Number of contacts

8

+ 2x GND

Features

- Small, space-saving PushPull interfaces in IP65 / IP67
- Easy handling of ix Industrial patch cords in switch cabinets or sets
- Miniaturised Ethernet data interface for industry in acc. to IEC 61076-3-124, type A

Technical characteristics

Number of contacts	8
Additional contacts	+ 2x GND
Rated current	1.5 A
Rated voltage	50 V AC, 60 V DC
Test voltage $U_{r.m.s.}$	0.5 kV
Contact resistance	$\leq 30 \text{ m}\Omega$
Shielding resistance	$\leq 100 \text{ m}\Omega$
Limiting temperature	-40 ... +70 °C
Storage temperature	-30 ... +60 °C
Mating cycles	≥ 750
Locking type	PushPull
Degree of protection acc. to IEC 60529	IP65 / IP67
Transmission characteristics	Cat. 6A, Class EA up to 500 MHz
Data rate	10 Mbit/s, 100 Mbit/s, 1 Gbit/s, 2.5 Gbit/s, 5 Gbit/s, 10 Gbit/s
Insertion force	$\leq 25 \text{ N}$
Withdrawal force	$\leq 25 \text{ N}$
Material (insert)	Liquid crystal polymer (LCP)
Colour (insert)	Black
Material (hood/housing)	Polybutylene terephthalate (PBT)
Colour (hood/housing)	Black
Material (seal)	PTS
Colour (seal)	Yellow
Material (contacts)	Copper alloy
Material flammability class acc. to UL 94	V-0

Inter-
face

Features

- HARTING PushPull (V14) technology
- 360° shielding
- Field assembly
- No side cutter needed anymore – integrated cutting blades behind the IDC contacts cut the wires to the correct length
- Wide range IDC for solid and stranded wires from AWG 26 to AWG 22
- Suitable for all PoE versions

Technical characteristics

Number of contacts	4
Limiting temperature	-40 ... +85 °C
Mating cycles	≥750
Conductor cross-section	0.14 ... 0.34 mm² Stranded, 0.22 ... 0.32 mm² Solid
Conductor cross-section	AWG 26/7 ... AWG 22/7 Stranded, AWG 24/1 ... AWG 22/1 Solid
Wire outer diameter	0.8 ... 1.6 mm
Degree of protection acc. to IEC 60529	IP65, IP67
Cable diameter	6.5 ... 9.5 mm
Transmission characteristics	Cat. 5, Class D up to 100 MHz
Data rate	10 Mbit/s, 100 Mbit/s
Material (hood/housing)	Zinc die-cast
Surface (hood/housing)	Nickel plated

Insulation resistance	$>10^8 \Omega$
Contact resistance	$\leq 10 \text{ m}\Omega$
Degree of protection acc. to IEC 60529	IP65 / IP67, when mated
Transmission characteristics	Cat. 5, Class D up to 100 MHz

Technical characteristics

Tightening torque	1 Nm Lock nut
Material (contacts)	Copper alloy
Surface (contacts)	Gold plated
RoHS	compliant with exemption

Specifications and approvals

IEC 61076-2-114

Identification

Circular connectors M8,
PCB connector,
Straight,
for front mounting,
Reflow soldering termination (THR),
Shielded,
Pack contents:
incl. housing

Part number
Female

M12 system cables with PushPull and screw lock

A new portfolio of over-moulded M12 system cables

Our product line of over-moulded M12 system cables will be expanded. HARTING offers the best system cable for every application: in both straight and angled versions. In addition to the unshielded system cables with screw locking, the time-saving PushPull interlock is now also available for shielded assemblies with A-, D- and X-coding. Thus, customers benefit from the advantages of PushPull connectors for over-moulded cable assemblies.

The cabling solutions have been tested and certified for the entire industrial environment. The key factors are IP protection, plug-in safety, robustness, vibration resistance and EMC safety.

HARTING offers a comprehensive product range of pre-assembled, shielded M12 system cables. The A-coded connectors enable sensors and actuators to be connected quickly. But HARTING also offers pre-assembled, tested system cables for Ethernet communications. A suitable solution is already available using the D-coded connectors with their transmission rate of

up to 100 Mbit/s. System cables with X-coded connectors can be used for even more data-hungry applications in automation environments. Transfer rates of up to 10 Gigabit can be achieved with this cabling solution.

In addition to the standardised lengths and solutions, customised variants can also be implemented.

1x 2x AWG 26/7
HARTING T1 Industrial Overmoulded
HARTING T1 Industrial Overmoulded

Features

- Internationally standardised mating face acc. to IEC 63171-6
- For the construction of future-proof and standardised Single Pair Ethernet (SPE) communication networks with standardised cabling according to ISO / IEC 11801 and TIA 42
- Designed for industrial applications up to M₃L₃C₃E₃ environmental conditions
- Meets all IEEE 802.3 requirements for SPE
- Robust industrial design with 360° shielding, locking lever protection and high mating cycles
- Suitable for remote power supply for all Power over Data Line (PoDL) classes
- Very flexible, overmoulded cable with a small footprint

Technical characteristics

Number of cores	2
Core structure	1x 2x AWG 26/7
Connector 1	HARTING T1 Industrial, Overmoulded
Connector 2	HARTING T1 Industrial, Overmoulded
Rated current	4 A
Rated voltage	60 V DC
Test voltage U _{DC}	1 kV (contact-contact), 2.25 kV (contact-ground)
Contact resistance	≤20 mΩ
Shielding resistance	≤100 mΩ
Limiting temperature	-40 ... +80 °C unmoved, -25 ... +80 °C moved
Mating cycles	≥1000
Degree of protection acc. to IEC 60529	IP20
Transmission characteristics	600 MHz, Bandwidth
Data rate	10 Mbit/s, 100 Mbit/s, 1 Gbit/s
Material (cable)	PUR (polyurethane)
Colour (cable)	Yellow

Specifications and approvals

IEC 63171-6
IEEE 802.3bu (remote power supply over PoDL = Power over Data Line)

Cable

HARTING DualBoot RJ45 Cat. 6_A PUR system cables

4x 2x AWG 26/7
HARTING DualBoot RJ45
HARTING DualBoot RJ45

Features

- Transmission of up to 10 Gbit/s
- Overmoulded
- Locking lever protection
- Flexible, space saving
- HARTING DualBoot RJ45 is compatible with Han-Modular®

Technical characteristics

Number of cores	8
Core structure	4x 2x AWG 26/7
Connector 1	HARTING DualBoot RJ45
Connector 2	HARTING DualBoot RJ45
Limiting temperature	-40 ... +80 °C unmoved, -40 ... +80 °C moved
Transmission characteristics	Cat. 6 _A , Class E _A up to 500 MHz
Data rate	10 Mbit/s, 100 Mbit/s, 1 Gbit/s, 2.5 Gbit/s, 5 Gbit/s, 10 Gbit/s
Material (cable)	PUR (polyurethane)
Colour (cable)	Grey, Green
RoHS	compliant

Specifications and approvals

UN/ECE-R 118
UL 1863 DUXR.E470046

Cable

4x 2x AWG 26/7

Features

- Suitable for generic cabling
- For drag chain applications
- Highly EMC resistant
- Oil resistancy
- Flame retardant, halogen free and RoHS compliant

Technical characteristics

Number of cores	8
Core structure	4x 2x AWG 26/7
Rated voltage	100 V
Test voltage $U_{r.m.s.}$	2 kV Wire / wire / shielding
Limiting temperature	-40 ... +70 °C unmoved, -40 ... +70 °C moved
Conductor resistance @ 20 °C	≤140 Ω/km
Insulation resistance @ 20 °C	≥1000 MΩ x km
Signal run time @ 20 °C	≤5.13 ns/m
Impedance @ 100 MHz	100 Ω ±10 %
Cable diameter	6.5 ... 7.1 mm
Minimum bending radius	10x Cable diameter, (repeated bending), 5x Cable diameter, (singular bending)
Drag chain compatible	Yes
Bending cycles	≥ 5.000.000 @ 15x Cable diameter @ traversing distance ≤ 1 m @ speed ≤ 0.3 m/s @ acceleration ≤ 6 m/s ²
Tensile strenght	≤15 N/mm ²
Transmission characteristics	Cat. 6 _A , Class E _A up to 500 MHz
Data rate	10 Mbit/s, 100 Mbit/s, 1 Gbit/s, 2.5 Gbit/s, 5 Gbit/s, 10 Gbit/s
Material (cable)	PUR (polyurethane)
Colour (cable)	Black
RoHS	compliant
