

PRM Series™

Panel Rack Mount Power Connectors

Available in 2 position

Amphenol Sine Systems' **PRM Series™ (Panel Rack Mount) Connectors**, available in both Plugs and Receptacles, are a quick-connect power connector solution for use in panel rack mount network applications. **Our quick-connect design enables denser installations, faster deployments and upgrades.**

Quick-Connect Design

Simple Plug & Play
Stackable Footprint
Optimal Wire Management

Vs.

Ring Terminal Design

Multi-Step Install Process
Time Consuming
Non-Optimal Wire Management

Market Applications: Telecommunications Infrastructure, Data Centers, Broadband

Features & Benefits

- Field Installable w Standard Crimpers
- Stackable / Reduced Footprint / In-Line Wire Design
- Faster Installations / Replacements
- Keyed to prevent mis-mating/reverse polarity
- RADSOK®* and SureSocket™ Contacts
- Panel receptacles can be customized to your specific application

Technical Specifications

Operating Temperature	-40°C to +125°C
Current (Amperage)	Up to 70A
Maximum Voltage	250V
Minimum Mating Cycles	>500
Contact Sizes	2.4mm: 0.216 (5.5mm); 4.0mm: 0.315 (8mm)
Number/Size of Contacts	2/ 2.4mm (SureSocket™) or 4.0mm (RADSOK®)
Contacts	SureSocket™ Spring: Copper Alloy, Gold-Plated RADSOK® Spring: Copper Alloy, Silver-Plated
Contact Barrel Range	2.4mm: 10-20AWG; 4.0mm: 6-16AWG
Housing Body	GF PA 6/6
Flame Rating	UL94 V-0

*RADSOK Male 4.0mm are Touch-Proof for added safety

Confidence In Every Connection

The unique design of our **SureSocket™ Contacts**, available in 2.4mm with a wire range of 10-20AWG, **provides a secure 360° of mating surface area** to its mated machined pin. This distributes even forces over a high percentage of the mating surface, creating a smooth, even engagement effort with low insertion and extraction forces as well as low contact resistance. This also contributes to excellent performance in vibration applications with resistance to typical fretting corrosion.

Key Features

- Longer contact life
- Low contact resistance
- Low insertion & extraction forces
- Increased immunity to shock & vibration
- Contact Area Extends 360° Around Pins
- Higher amperage in a compact design

Technical Specifications

Operating Temperature	-40°C to +125°C
Contact Body	Copper Alloy, Silver-Plated
Contact Spring	Copper Alloy, Gold Flash
Max. Current (AMP)	Socket #SC000612 / 35A / 10-12AWG Socket #SC000624 / 25A / 12-14AWG Socket #SC000692 / 16A / 14-16AWG Socket #SC000706 / 12A / 18-20AWG
Termination Type	Crimp
Mating Cycles	<500 matings and unmatings
RoHS	Compliant

Derating Curves - IEC 60512-5-2 Test 5b

R RADSOK® R8S

High Voltage, High Current Contact System

The RADSOK® R8S is a further development of the extremely reliable RADSOK® contact system, which has been successfully used in industrial sectors for a number of decades. The symmetrical annular contact, which has been optimized in all areas, is comprised of a contact grid made of a beryllium-free copper alloy and features a radially-twisted lamella layout for self-cleaning. This design enables the contacts to achieve the best possible contact resistance and high corrosion resistance. The RADSOK® R8S contact system withstands temperatures up to 170°C. The new and improved contact system also boasts a high power density in proportion to its weight.

Applications: Industrial, Automation, Harsh Environment

Key Features

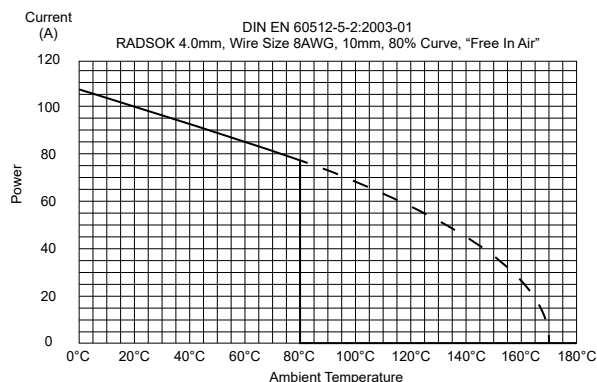

- Low contact resistance
- Contact Area Extends 360° Around Pins
- Withstands temperatures up to 170°C
- Higher amperage in a compact design
- Radially-twisted lamella layout for self-cleaning
