Amphenol's Helios H4 is the #1 Ranked Solar Connector in the World

Beating out 26 worldwide competing connectors, Amphenol's Helios H4 Solar connectors achieved the top two ranked positions in an independent annual test comparison of solar connectors performed by Photon lab. The test results were published in *Photon - The Solar Power Magazine* (September, 2011).

PowerLink solar cable

Halogen free photovoltaic cables are used as the interconnection wiring for photovoltaic power systems.

Features:

- Flexibility at low temperature
- Thermoset-insulated conductor
- Thermoplastic jacket
- Long-term insulation resistance to moisture
- Range from 1.5mm² to 25mm²

Certificate:

TÜV and UL certified according to the latest regulations

Structure:

Conductor: Stranded bare or tinned copper
 Insulation: XLPE material (white and black)
 Jacket: XLPE material (Black, Red and Blue)

Temperature range:
 -40 °C to +125°C
 Environmental influence resistance:
 Acid, alkalinity, UV, ozone and hydrolysis-resistant.

ArmorLink Solar Cable

Advantages:

- Rodent resistant
- Extra protection layer

Made using UL4703 and TÜV 2Pfg 1169 as guidelines.

PowerLink solar cable application:

Used in heavy-duty and harsh environment interconnection wiring, can be easily combined with our Helios H4 PV connector and junction box series for photovoltaic system applications.

HelioLug

The only UL2703 certified grounding lug on the market.

Included Components:

- 1) Lay in lug (tin-plated), solid copper lay-in lug with a stainless-steel set screw)
- 2) Stainless star washer
- 3) Stainless star bolt
- 4) Stainless serrated lock nut

Features:

- The only UL 2703 certified grounding lugavailable
- Meets all new NEC 2008 requirements
- Quick and easy installation
- For use with virtually all module frames and racks, (0.09 inches (2 mm) to 0.25" (6.35 mm) thick)
- Capable of accepting 4-12 AWG solid copper conductors
- Code compliant "first make - last break" grounding system
- Compatible with all module grounding holes, (0.16" (4mm) to 0.295" (7.5mm))
- Certified reusable hardware for servicing without replacement

INSTALLATION INSTRUCTIONS:

- Place the lug to the designated module grounding hole with the star washer between the grounding lug and the module frame in order to break through the anodizing and establish electrical contact with the aluminum. Torque the bolt and nut to 30 in-lbs. NOTE: These instructions provide guidelines for general use. If available, the specific module manufacturer's instructions for the location of the star washer are to be followed.
- For the attachment to the racking, slide the bolt into the mounting channel of the extrusion or into a ¼" Hole drilled through the extrusion. Place the star washer between the racking and lug and secure the nut and bolt to 30 in-lbs. NOTE:
- Insert a 4 to 12 AWG copper wire into the lug and tighten the lug set screw to the copper wire to the torque based on the wire size. (4-6 AWG at 35 in-lbs and 8-12 AWG at 30 in-lbs). Do not exceed the maximum rated overcurrent protection, 20 A (12 AWG), 40 A (10 AWG), 90 A (8 AWG), 150 A (6 AWG), and 200 A (4 AWG).

ModLink Junction Box

Features:

- Modular concept; only add what you need, when you need it
- “Future proof” : Ready to accept future smart modules
- Base unit is a complete junction box
- Base unit thermally separated from panel
- Uses industry standard connections
- Plug-and-play; no additional components needed
- No wasted materials when upgrading
- Smart module snaps into base; no drilling, no additional cabling.
- Cost effective on every level: For panel OEM, distributor, installer, Owner/operator
- Can be upgraded at any time

Helios ModLink Modular Junction Box

The ModLink Modular Junction Box provides PV panel manufacturers an advanced junction box that enables cutting edge smart technology at no additional cost. Built-in industry standard connectors mate directly to Amphenol Industrial Helios H4 connectors or to a wide range of “Smart” modules. These include DC/AC converters/optimizers, performance monitoring and DC/AC microinverters.

The ModLink Junction Box consists of a base unit that is firmly attached to the back sheet of the panel. The base unit already contains protective diodes and built-in connectors; ready to be used as a basic junction box from the start. When it's time to upgrade just disconnect the connectors, snap-in the smart module, reconnect the connectors and you're done.

This modular technology provides instant plug-and-play versatility. Smart modules can be added (or removed) at any time without any additional materials needed or wasted.

The base module retains the basic junction box functionality and protection, no matter if there are smart modules attached or not. This allows for exchange or removal of smart modules if repairs or upgrades are needed, without losing the basic function of the PV module.

There is no longer a need for “pigtailed” attached to the photovoltaic module, making manufacturing and handling easier.

The Helios ModLink Modular Junction Box is just one of the many solar solutions Amphenol Industrial has to offer.

HelioLink™ PV Junction Box

- Features:**
- Hermetically sealed design; no moisture ingress, no condensation
 - Patented, finger-type heat exchanger protects diodes from thermal destruction, even under adverse conditions
 - Thermal separation from backsheet prevents formation of hot-spot
 - Designed for automatic placement and termination
 - Compact design
 - Built to last, maintenance free

Technical Data	
Rated current	Up to 30A
Rated operating voltage	1000V DC (TÜV) , 600V DC (UL)
Rated max. reverse voltage per diode	45 VDC (standard) 120 VDC (optional)
