

Miniature Hall-Effect Through-Shaft Rotary Position Sensor

KEY FEATURES

True, contactless operation
Without any gears or mechanical
interfaces the sensor is easily

interfaces the sensor is easily assembled and calibrated and subject to limited wear and tear over lifetime.

Fits in the smallest of spaces

With a footprint of less than 18 x 18mm, height of 5.9mm and less than 3g this rotary sensor can be used in even the most space-constraint application.

Through-hole design

Allows shaft insertion from top or bottom, simple assembly and makes it even more suitable in applications where space is limited.

360 degree absolute position feedback

Endless mechanical rotational angle without dead band, keeps the position on power loss with programmable electrical angles from 15 to 360 degrees.

Durable and robust design

The non-contacting design allows for an extra-long product lifetime of up to 50 million cycles.

Adaptable to your requirements

Programmable transfer function and switch outputs as well as different output protocols and redundancy levels available.

DESCRIPTION

The MTS-360 provides a true breakthrough in contactless sensor technology by combining a through-shaft design with 360° absolute position feedback in an ultra miniature size. The result is the smallest fully featured rotary sensor on the market with reliability up to 50 million cycles.

With its tiny size, engineers can now integrate a fully featured rotary sensor directly on their PCB without the packaging issues that typically accompany encoders or other absolute position devices. The exceptionally low profile fits easily in places that were previously too small for pre-packaged rotary sensors.

The MTS-360 PCB package enables time and costsavings by easily mounting a fully featured rotary sensor including connector without the need to design a printed circuit board for the sensor.

APPLICATIONS

Industrial

- ▶Optical image stabilization
- ▶Precision biomedical devices
- **▶**Instrumentation
- ▶Autonomous warehouse robotics
- ▶Robotics and automation feedback

Home and Building Automation

►HVAC systems

Transportation

- ► Valve monitoring
- ► Conveyor operation

HVOR

- ►Autonomous steering
- ▶ Joystick controls
- ► Hand throttle position

Miniature Hall-Effect Through-Shaft Rotary Position Sensor

MECHANICAL SPECIFICATIONS		
Rotational life	Up to 50.000.000 cycles	
Mechanical range	360° (endless rotation)	

ELECTRICAL SPECIFICATIONS				
Linearity ^{1,2}	±1% absolute (±0.5% upon request)			
Electrical angular range ¹	Programmable from 15° to 360°			
Output protocols	Analog (Ratiometric), PWM Serial Protocol (SPI)			
Output	Simple Redundant Full-redundant (on request)			
Switch output	Yes, programmable			
Switch accuracy ¹	±3°			
Resolution Analog, PWM SPI	Up to 12 bit Up to 14 bit			
Supply voltage ¹	5V ±10%			
Supply current Single version Redundant version	Typ 8.5 mA Typ 17 mA			
Voltage protection	+20V / -10V			
Self-diagnostic features	yes			

ENVIRONMENTAL SPECIFICATIONS

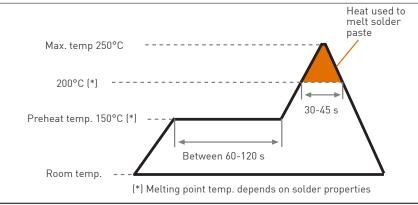

Model	MTS-360	MTS-360PCB
Operating and storage temperature ¹	-40° to +125°C	with connector: -40° to +105°C without connector: -40° to +125°C
Shock	50g	
Vibration	5-2000 Hz; 20g; Amax 0,75 mm	
Sealing ¹	IP50	

¹Other specifications available

Sensitive to Electro Static Discharge (ESD). Observe control procedures whenever handling semiconductor products.

RECOMMENDED REFLOW PROFILE

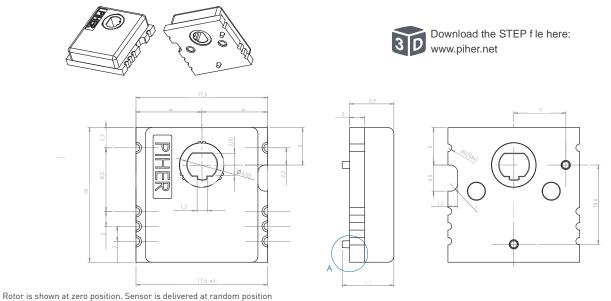

The recommended reflow profile is provided as a guideline. Optimal profile may differ due to oven type, assembly layout or other design or process variables. Customers should verify actual device performance in their specific application and reflow process. Please contact Piher if you require additional support.

¹ Other specifications available ² Ferromagnetic materials close to the sensor (i.e. mounting surface) may affect the sensor's linearity.

Miniature Hall-Effect Through-Shaft Rotary Position Sensor

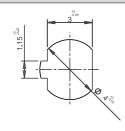

DIMENSIONS MTS-360

Outer Dimensions

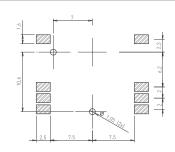

Notor is shown at zero position. Sensor is delivered at

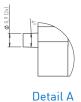

Recommended shaft dimensions

Shaft should be ferromagnetic material. If you want to use a non-ferromagnetic shaft please contact Piher.

Recommended footprint

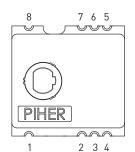

Scale 8:1

CONNECTION SCHEME

PIN	Simple Output	Redundant Output	SPI Output	
1		Switch output 2*	Power Supply	
2	Supply voltage	Signal output 2**	Power Supply	
3	C '1 1 1 1*	Ground	//SS	
4	Switch output*	Ground	SCLK	
5	C. 1 1 1**	Power supply	MOSI	
6	Signal output**	Power supply	MOSI	
7	Ground	Signal output 1**	Ground	
8	Ground	Switch output 1*	Ground	

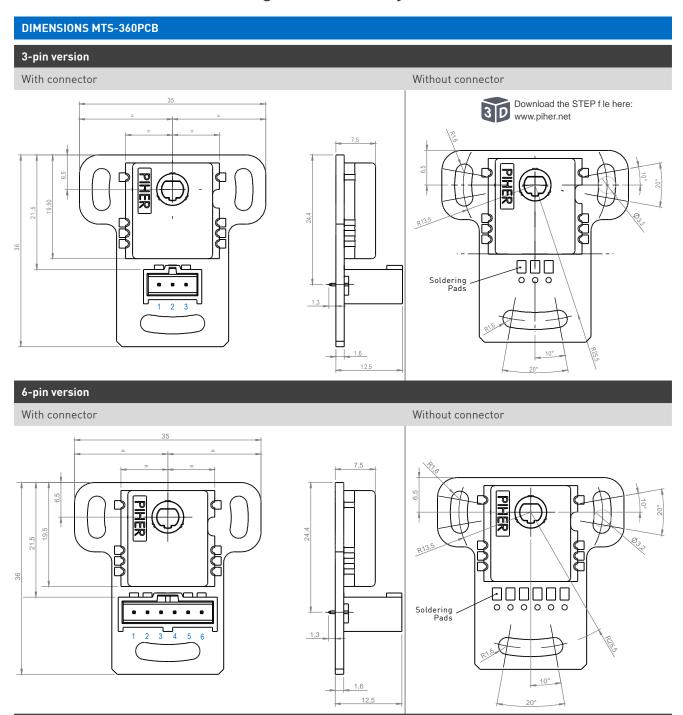

- * If the feature is not used in the application, please connect to ground.
- ** Piher can supply the recommended wiring diagram.

Box dimensions (mm): 250x160x95

OPTIONAL FEATURES AVAILABLE ON REQUEST

- ▶Special output slopes and protocols
- ▶Full redundant version with switches
- ▶ Fast versions
- ▶Energy harvesting versions
- ▶IP sealing
- **▶**Connectors
- ▶Shaft interfaces

OUR ADVANTAGE

- ▶Leading-edge innovative position sensing solutions
 - ▶ Contactless (Hall-effect and Inductive Technology)
 - Contacting (Potentiometers, Printed Electronics)
- ▶Engineering design-in support
- ▶All our products can be customized to fit target application and customer requirement
- ▶Capability to move seamlessly from development to true high-volume production
- A global footprint with global engineering and commercial support
- ▶One-stop shop not limited to position sensors (temperature, pressure, gas,...) through group collaboration
- Flexibility and entrepreneurship of a medium-sized company with the backing of Amphenol Corporation

Please always use the latest updated datasheets and 3D models published on our website.
