

Touchless Hall-Effect Linear Position Sensor

True touchless operation

Without any internal or external gears or linkages the sensor is easily assembled and calibrated and free from wear and tear over lifetime

Unlimited mechanical life

The separation of electronics and magnet module allows for a virtually Virtually unlimited lifetime ınder unlimited life number of revolutions. unlimited lifetime independent of

Compact and low profile package

Without the need for a shaft the sensor is provided in a exceptionally compact and low profile package that fits in space contraint applications.

Made for harsh environments

IP69K sealing, high operating temperature range as well as shock and vibration resistance allow the use in the most demanding environments.

Adaptable to your requirements

Custom mechanical design, programmable transfer function and switch outputs as well as different output protocols and customizable redundancy levels available.

Configurable measurement range

Accurate linear displacement feedback of up to 25mm. Other/higher ranges are available upon request.

DESCRIPTION

Piher Sensing Systems' PS2P-LIN compact linear position sensor delivers true touchless sensing for harsh industrial and vehicle environments in a low profile and robust magnetic design.

Magnet and sensor module are placed in separate housings without the need for any gears, bearings or linkages and can be placed anywhere on the moving object. This allows for easy mounting, thereby delivering additional cost reduction on the production line. Furthermore, without wear and tear of radial forces product reliability and lifetime are increased significantly.

The PS2P-LIN measures changes in linear position relative to the sensor by detecting the movement of a magnetized magnet that is located in a separate housing and is only sensitive to the flux density coplanar with the IC surface.

The PS2P series is complemented by touchless rotary (PS2P-CON) and variable airgap arc (PS2P-ARC) position sensors. All sensors of the series are absolute sensors and will deliver the same level of precision and stability throughout their lifetime as on the first day they are installed - despite extremes of vibration, shock, temperature and contamination.

APPLICATIONS

Off-Highway

- ▶ Bucket position
- ► Pedal / throttle position
- ► Hitch position
- ▶ Bus suspension / kneeling position
- ► Transmission systems

Automotive

- ► Transmission systems
- ► Gear shift position
- ▶ Park lock sensor

Home & Building Automation

► HVAC damper actuator monitoring

Marine

► Trim / tilt position

Industrial

- ► Machinery
- ► Monitoring of hydraulic valves and controls
- ▶ IoT modules

- 1 The analog output is ratiometric, proportional:

- for supply voltage "5V" to input voltage;
 for supply voltage "RE" to 5V.

 2 Other output functions available, please check availability. Enter LXXXX as long as the new output function is not defined.

 3 ELS is measured in steps of 0.1mm, min. ELS050 = 5mm effective electrical stroke, max. ELS250 = 25mm effective electrical stroke. Larger strokes available on request.
