D–SUBMINIATURE MIXED AND FULL POWER DW SERIES

Amphenol's D–Subminiature connectors are part of an industry standard for applications requiring robust and reliable connectors. These proven D–Subminiature connectors are one of the most popular Input/Output interconnects, addressing a wide variety of applications in Telecommunications, Data, Consumer, Industrial, Military, Instrumentation and Medical. Since many years Amphenol has been offering a wide range of D–Subminiature connectors to meet various design requirements including those in harsh environment.

Amphenol offers full power and mixed power versions which has been specifically developed for power applications in industrial and telecom market segment. PC board connectors are delivered with preloaded power contacts (10 – 40A). Cable crimp and solder power contacts are delivered with colour code plastic clips for an easy wire gauge identification.

TARGET MARKETS

FEATURES

- Power connectors available in various layouts from 2V2 to 36W4
- Power connectors available in full power and in mixed layout (signal + power)
- Contacts available from 10A to 75A
- Available in Straight, Angle, Solder Bucket, Crimp terminations
- Various PCB and Panel mounting accessory options available
- Hoods available in plastic, metalized and metallic form with locking screws
- Lead–free and RoHS compliant

BENEFITS

- Various layout options with in the standards shell size
- Can meet both standard and Power connector requirements
- Can meet medium to high power requirements
- Support both PCB & Cable mounting requirements
- Wide variety of choices for secure connection
- Supports cable connection; Prevents risks of pulling up and accidental un–mating
- Meets environmental, health and safety requirements

µTCA – HIGH POWER I/O PCB CONNECTORS

OVERVIEW

This power module I/O connectors for 48V applications are designed in accordance with µTCA specifications. The robust D–Subminiature concept based on simplified and cost effective Delta D design combines power contacts able to handle up to 24A with signal contacts. PCB connectors are proposed in traditional solder–to–board and Pin–in–Paste versions for optimized applied cost. Specific to the design of FCI is the fact that the connector's compact footprint allows for more space on the PCB for other components.

FEATURES

- 48V / 24A (shell size A)
- FMLB (First Mate Last Brake) functionality for hot plugging
- Field reparable
