Jig Board Clamps

Amphenol Pcd’s Jig Board Clamps are made for pre-installation wire harness assembly. Made of Acetal, our durable clamps maintain their original shape after continuous use and their smooth edges diminish wear on the harnesses as they are being assembled. Developed in multiple sizes, Amphenol Pcd’s Jig Board Clamps can accommodate a wide range of cable diameters, while the one-piece design enables efficient inventory management.

Specifications

- Designed with Acetal: Strong durable; long life-time
- Various Sizes: Accommodates wide range of wire diameters
- One-Piece Design: Simple and easy to use
- Smooth Edges: Limits wire chaffing and reduces wear and tear
- No elastic band or straps required: Minimizes installation time

Material: Acetal

Power Feeder Spacer

Power Feeder Spacers separate and provide a constant spacing between the power feeders. The custom design of this product allows a six degree rotation on the power feeder bundle and doesn’t fight against the natural flow of the cable. It is designed to sit within Omega Clamps which can be used as anchor points.
