# 0.4mm Pitch/1.5mm Height, Positive Lock, Shielded Board to Board/Board to FPC Connector

### **DF40GL Series**

### ■Features

#### 1. Positive lock

Positive lock with blade lock design. Prevents offset mating due to impact.

#### 2. Supports high speed transmission Meets USB Type C and PCIe Gen3 standards.

#### 3. Shield and grounding design Excellent EMI shielding.

### 4. Long effective mating length

The world's longest effective mating length of 0.45mm, producing high contact reliability.

#### 5. Smooth mating operation

Guidance ribs ensure 0.4mm self-alignment range In addition, secure mating with clear tactile click.

## ■Usage

Suitable for devices which require high mating reliability and shock-resistance, such as on-board, medical and portable devices etc.

#### Environmental

·Halogen-free\*

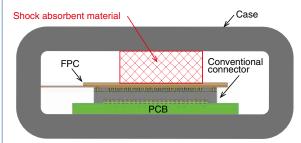

\*As defined by IEC 61249-2-21

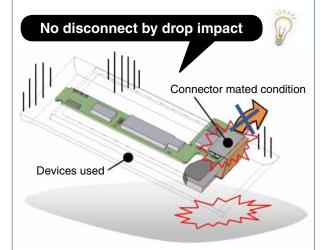

Br: 900ppm max, Cl: 900ppm max

Br+Cl: 1500ppm max

#### <Advantages of positive lock design>

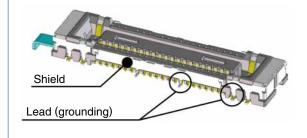

Conventional connectors needed shock absorbent material to prevent offset mating due to impact. DF40GL Series eliminates the need for the shock absorbent material with a positive lock design.

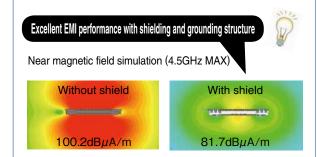

#### <Advantages of shielding and grounding design>

DF40GL Series has shield and lead ground producing excellent EMI performance.

# Operating Precautions

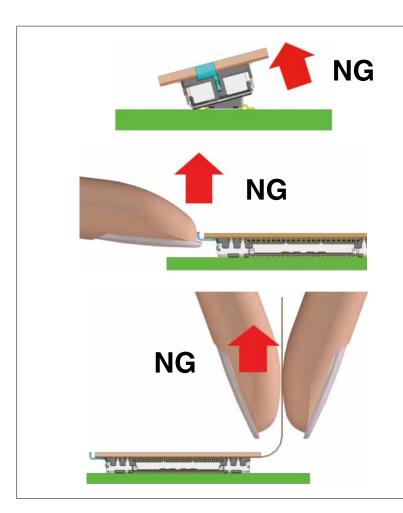

### Handle with care when mating a connector

#### ● Handle with care when un-mating connectors

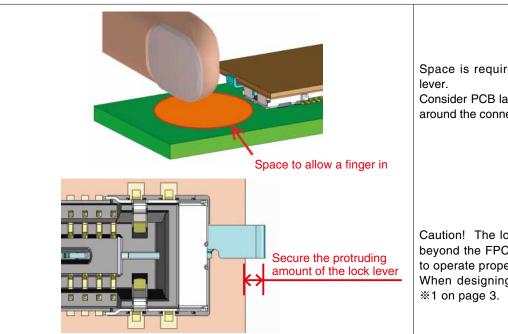

Caution! If unmated forcefully, the connector may be damaged.

Attempting to unmate the connector without releasing the lock could cause damage.

Pulling the FPC without releasing the lock could cause damage.

### PCB layout

Space is required to operate the lock

Consider PCB layout when placing parts around the connector.

Caution! The lock lever must protrude beyond the FPC to allow the lock lever to operate properly.

When designing FPC, please refer to
