QR/P4 SERIES

Small Rectangular Multi-electrode Solderless Connectors for Racks and Panels

General

QR/P4 Series is a series of small connectors for rack and panel application. This is a smaller-size version of the QR/P and QR/P1 Series, whose rectangular multielectrode plug in connectors for racks and panels have been well received in the market.

Six models with different numbers of contacts are available: 8, 12, 16, 24 32 and 40. Wires are connected to the connectors without solder for easier connection and higher reliability.

Features

- (1) The pins can be smoothly inserted into the receptacle, and give stable contact pressure beause of their point contact with the receptacle blades. Furthermore, they have a larger allowance for the variation of connection length - a characteristic of plug-in connections.
- (2) The connector size has been made smaller by separating the terminals for signals from those for voltage supply.
- (3) The pitch of the signal terminals inside the housing is 2.54mm. Tow pairs of diametrically opposed electrodes (four electrodes in total) on the two sides are arranged with a pitch of 5.08mm so that they can

- withstand high voltage, and can be used for power supply. In addition, a nonflammable material (UL94V-0) is used as the insulating housing of the connectors.
- (4) Guide pins and the housing body are molded as one piece to achieve a smaller connector size.
- (5) Since the connectors are mounted on racks or panels with stepped screws, connection and disconnection can be done easily.
- (6) The contact for female terminals in the housing is deeper than the fitting surface of the housing which conforms to the finger test (UL Standard 1950).
- (7) The connectors of this series have passed UL, CSA and TÜV standard.

Application

PPC, Transmission and reception equipment, Data Communication, Vending Machine, Measuring Instruments, Automatic Equipment, Switchboards, etc.

Specification

Item	Specifications	
Contact Resistance	Power	Max. 15m Ω at DC1A
Contact Resistance	Signal	Max. 15m Ω at DC1A
Insulation Resistance	Min. 500	00MΩ at DC500V
Withstand Voltage	Power	AC 2000V
(for 1 minute)	Signal	AC 500V
Rated Current	Power	3A
Kated Current	Signal	1A
Poted Voltage	Power	AC 300V
Rated Voltage	Signal	AC 250V

Item	Material	Finish
Insulator	PBT resin *:UL94V-0	Black
Contact	Phosphor Bronze	Selective Gold plating over Nickel
