DESCRIPTION

The HOA1397 series consists of an infrared emitting diode and an NPN silicon phototransistor (HOA1397- 001, - 002) or photodarlington (HOA1397- 031, 032) encased side-by-side on parallel axes in a miniature black thermoplastic housing. The detector responds to radiation from the IRED only when a reflective object passes within its field of view. The HOA1397 series employs plastic molded components. For additional component information refer to SEP8507 and SDP8407.

Housing material is polyester. Housings are soluble in chlorinated hydrocarbons and ketones. Recommended cleaning agents are methanol and isopropanol.
