

# RF Wireless Two-Color LED-Mixer from Inspired LED

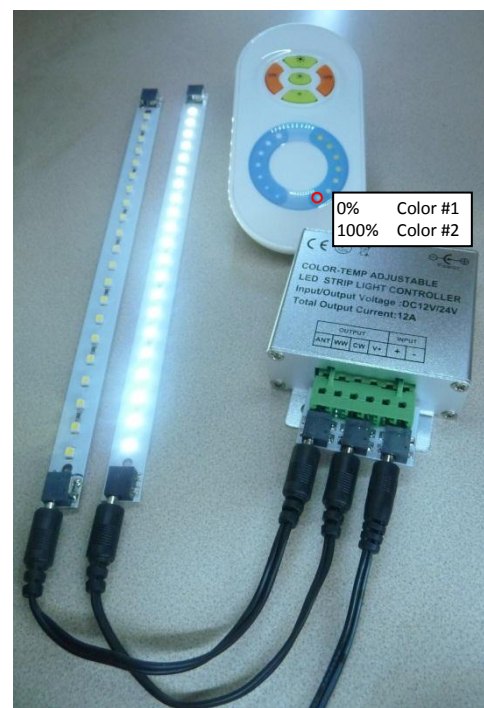

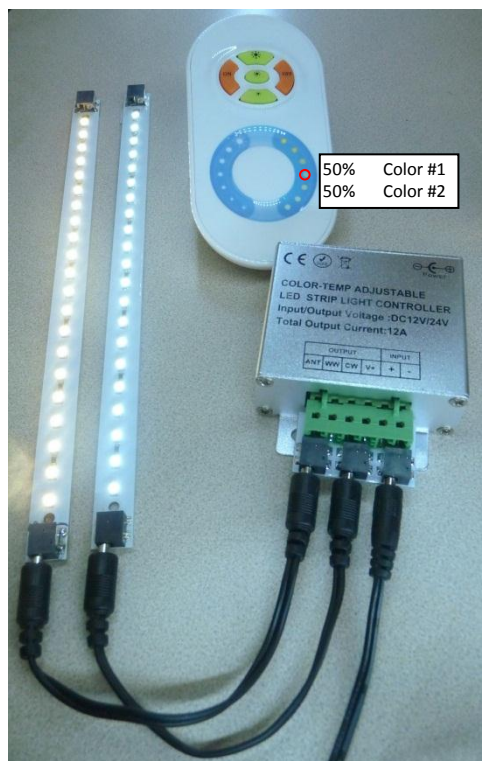

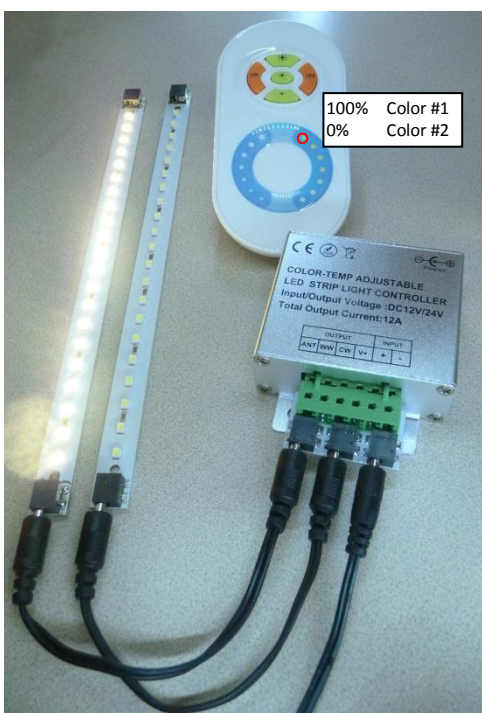

The two-color LED-mixer is ideally suited for lighting areas with multiple personalities. Connect cool and warm white lighting to achieve crisp functional lighting for work and warm lighting when it's time to relax. Connect warm white and blue light to add a little mood lighting for special occasions. Any combination of two lighting arrays can be controlled with this color mixer. The included touch-sensitive remote controls the overall brightness with the left half of the touch wheel, while the right half allows for shifting between the two chosen lights.

Key	Function
1	On
2	Off
3	Highest Brightness
4	Medium Brightness
5	Lowest Brightness

How to Use the Two-Color LED-Mixer	
<b>Connect Power</b>	Plug 12V Inspired LED Power Supply into the connector marked "PWR IN".
<b>Connect Color 1</b>	Plug all lights of color 1 into the connector marked "Color #1".
<b>Connect Color 2</b>	Plug all lights of color 2 into the connector marked "Color #2".
<b>Dimming Control</b>	Select desired brightness from 20 grades using the left half of the touch wheel. Or select "High", "Medium", or "Low" from keys 3, 4, and 5 respectively.
<b>Color Mixing</b>	Select desired color balance from 11 grades using the right half of the touch wheel.
<b>Remote Match</b>	Press 'Key 3' once within three seconds of connecting power to the controller to match the remote to the controller. The connected lights will blink 3 times if successfully matched. One remote may be matched to multiple controllers.
<b>Remote Clear</b>	Press 'Key 3' five times within three seconds of connecting power to the controller to unmatch a remote with a controller. The connected lights will blink 6 times if successfully cleared.
<b>Remote Sensitivity</b>	Please don't touch or press the touch wheel within 3 seconds of loading the batteries to protect the sensitivity of the remote. If the touch wheel loses sensitivity, remove and reinstall the batteries.
