# DW2 Series

## (UL Recognized Product)

CONNECTOR  
 MB-0266-1  
 January 2014

**RoHS Compliant**

Drawing when DW2 is mounted

Receptacle (DW2R002ZH1)

Plug (DW2P002ZH1)

### <<Out Line>>

The DW2 Series is a rack and panel connector with 2 contacts for high-current (200A). It enables the connection of the 2 contacts for power supply and 20 contacts for signal at once. The DW2 Series is suitable for use in a wide range of applications such as storage battery systems, power supply systems, UPS, and other power supply control equipments. The DW2 Series is a UL recognized product.

### Features

- UL Recognized Product: File No.E67741 
- High-current: compatible with 200A
- Electrical Shock Prevention: structure that prevents a person's fingers from touching the terminals on receptacle side.
- Floating Amount:  $\pm 2.75\text{mm}$
- Robust housing integrating complex power supply and signal area.
- Signal connector can be attached to the main unit using an exclusive jig.
- Signal area has a 2-point contacting structure contact.
- Connection of receptacle side power supply can be made at once using the bus bar.

### General Specifications

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**Notice:**

1. The values specified in this brochure are only for reference. The products and their specifications are subject to change without notice. Contact our sales staff for further information before considering or ordering any of our products. For purchase, a product specification must be agreed upon.

2. Users are requested to provide protection circuits and redundancy circuits to ensure safety of the equipment, and sufficiently review the suitability of JAE's products to the equipment.

3. The products presented in this brochure are designed for the uses recommended below. We strongly suggest you contact our sales staff when considering use of any of the products in any other way than the recommended applications or for a specific use that requires an extremely high reliability.

(1) Applications that require consultation:

(i) Please contact us if you are considering use involving a quality assurance program that you specify or that is peculiar to the industry, such as:

Automotive electrical components, train control, telecommunications devices (mainline), traffic light control, electric power, combustion control, fire prevention or security systems, disaster prevention equipment, etc.

(ii) We may separately give you our support with a quality assurance program that you specify, when you think of a use such as :

Aviation or space equipment, submarine repeaters, nuclear power control systems, medical equipment for life support, etc.

(2) Recommended applications include:

Computers, office appliances, telecommunications devices (terminals, mobile units), measuring equipment, audiovisual equipment, home electric appliances, factory automation equipment, etc
