

Ultra Low Profile 0805 Balun 50Ω to 200Ω Balanced

Description:

The BD0826J50200AHF is a low profile sub-miniature balanced to unbalanced transformer designed for differential inputs and output locations on next generation wireless chipsets in an easy to use surface mount package covering the GSM, DCS, PCS, UMTS, CDMA and 802.11 b+g+n frequencies. The BD0826J50200AHF is ideal for high volume manufacturing and is higher performance than traditional ceramic and lumped element baluns. The BD0826J50200AHF has an unbalanced port impedance of 50 Ω and a 200 Ω balanced port impedance. This transformation enables single ended signals to be applied to differential ports on modern integrated chipsets. The output ports have equal amplitude (-3dB) with 180 degree phase differential. The BD0826J50200AHF is available on tape and reel for pick and place high volume manufacturing.

Detailed Electrical Specifications:

Specifications subject to change without notice.

Features:

- 800 – 2600 MHz
- 700 – 2800 MHz
- 0.7mm Height Profile
- 50Ω to 2 x 100Ω
- GSM/DCS/PCS/UMTS/CDMA
- Low Insertion Loss
- Input to Output DC Isolation
- Surface Mountable
- Tape & Reel
- Non-conductive Surface
- RoHS Compliant
- Halogen Free

Parameter	ROOM (25°C)			ROOM (25°C)			Unit
	Min.	Typ.	Max	Min.	Typ.	Max	
Frequency	800		2600	700		2800	MHz
Unbalanced Port Impedance		50			50		Ω
Balanced Port Impedance		200			200		Ω
Return Loss	8.5	13		8.0	9		dB
Insertion Loss*		1.2	1.5		1.5	1.6	dB
Amplitude Balance		0.4	1.3		0.4	1.3	dB
Phase Balance		3	7		4	8	Degrees
CMRR		30			25		dB
Power Handling @85°C			2			2	Watts
Operating Temperature	-55		+140	-55		+140	°C

*Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at +85 °C)

Outline Drawing:

Typical Performance: 700 MHz to 2900 MHz

Wide Band Performance: 10 MHz to 8010 MHz

Mounting Configuration:

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from organic PTFE based composites which possess excellent electrical and mechanical stability. Xinger components are compliant to a variety of ROHS and green standards and ready for Pb-free soldering processes. Pads are Gold plated with a Nickel barrier.

An example of the PCB footprint used in the testing of these parts is shown below. An example of a DC-biased footprint is also shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances.

Packaging and Ordering Information:

Parts are available in reel and are packaged per EIA 481-D. Parts are oriented in tape and reel as shown below. Minimum order quantities are 10,000 per reel.

TABLE 1 REEL DIMENSIONS (inches [mm])	
ØA	13.0 [330.0]
B	.315 [8.0]
ØC	7.0 [177.8]
ØD	.512 [13.0]
