## Ultra Low Profile 0805 Power Divider 50Ω to 50Ω

### Description

The PD1722J5050D2HF is a low profile, sub-miniature Wilkinson power divider in an easy to use surface mount package. The PD1722J5050D2HF is ideal for high volume manufacturing and delivers higher performances than traditional printed and lumped element solutions. The PD1722J5050D2HF is matched to 50 Ω and has a height profile of 0.5 mm which is ideal for high level integrations in the following markets: WCDMA, and GSM, The PD1722J5050D2HF does not include the resistive element and therefore, requires an external resistor for operation. The PD1722J5050D2HF is available on tape and reel for high volume manufacturing pick and place.

### Detailed Electrical Specifications: Specifications subject to change without notice.

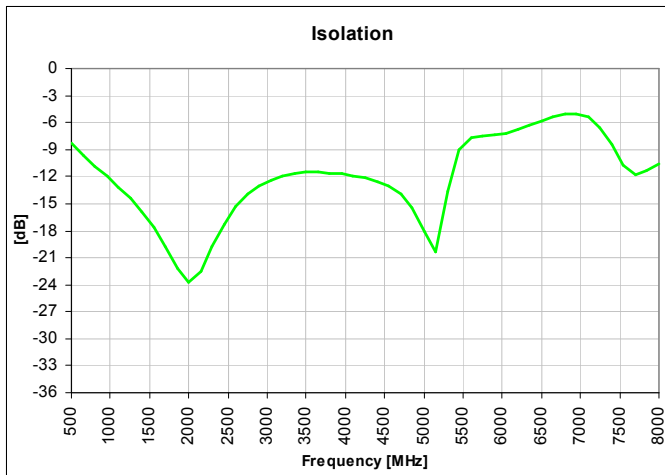

Features:	Parameter	ROOM (25°C)			Unit
		Min.	Typ.	Max	
<ul style="list-style-type: none"> <li>• 1700-2200 MHz</li> <li>• 19 dB Isolation (output ports)</li> <li>• 0.5mm Height Profile</li> <li>• 50Ω Input / 50Ω Outputs</li> <li>• Low Insertion Loss</li> <li>• Surface Mountable</li> <li>• Tape &amp; Reel</li> <li>• Non-conductive Surface</li> <li>• RoHS Compliant</li> <li>• External resistors required</li> <li>• Halogen Free</li> </ul>	Frequency	1700		2200	MHz
	Input Port Impedance		50		Ω
	Output Port Impedance		50		Ω
	Return Loss	11	14		dB
	Insertion Loss*		0.5	0.7	dB
	Amplitude Balance		0.1	0.3	dB
	Phase Balance		1	3	Degrees
	Isolation (Output Ports)	17	19		dB
	Power Handling			2	Watts
	Operating Temperature	-55		+85	°C

\* Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at +85 °C)

### Outline Drawing

## Typical Broadband Performance: 500 MHz. to 6.0 GHz.

### Typical Performance: 1600 MHz. to 2300 MHz.

## Mounting Configuration:

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from organic PTFE based composites which possess excellent electrical and mechanical stability. Xinger components are compliant to a variety of ROHS and Green standards and ready for Pb-free soldering processes. Pads are Gold plated with a Nickel barrier.

An example of the PCB footprint used in the testing of these parts is shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances. In addition, since the PD1722J5050D2HF is a Wilkinson power divider, external 0402 100Ω and 200Ω resistors must be mounted in locations R1 and R2 respectively, as shown in the Figure below.

### Pad Footprint w/ 0402 Resistor Locations

### Packaging and Ordering Information

Parts are available in reel and are packaged per EIA 481-2. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel. See Model Numbers below for further ordering information.
