

## THERMAL IMAGING MONOCULAR

# FLIR Scout II

Offering clear thermal imaging in a compact monocular, Scout II quickly detects humans, animals, and objects in low visibility environments—day or night. Generating images based on heat, rather than visible light, thermal imaging gives users increased situational awareness in complete darkness and haze, providing reliable vision for surveillance and safe navigation. A rugged IP67 housing allows on-demand thermal imaging in the most trying conditions.

### RELIABLE 24/7 VISION

Thermal imaging offers clear vision in complete darkness or glaring light.

- Quickly detect humans and animals in challenging environments
- See in complete darkness, bright light, and haze
- Sharp, clear 640 × 480 display screen

### POWERFUL, YET SIMPLE

Starts up in seconds, no training required.

- Intuitive and straightforward thermal imaging
- Large, easy-to-use buttons for quick image adjustments
- Single hand operation

### COMPACT AND RUGGED

Fits in any pocket, weather and impact-resistant.

- Light weight, only 12 oz
- Ergonomic, IP67-rated design
- Up to 5 hour rechargeable battery life
