Description

The MAAL-010704 is a high dynamic range single stage MMIC LNA with excellent linearity and low noise figure designed for operation from 0.1 to 3.5 GHz. The LNA is packaged in an RoHS compliant SOT-363 package and requires no external matching components.

This MMIC has an integrated active bias circuit allowing direct connection to 3 V supply and minimizing variation over temperature and process. The bias current can be set with an external resistor to allow the user to customize the current value to fit the application.

The MAAL-010704 offers less than 1 dB noise figure and 34 dBm OIP3 at 2 GHz. The broadband match and single supply operation makes this LNA easy to use and simplifies its implementation while maintaining excellent performance. The low thermal resistance and integrated ESD protection significantly enhances the quality, reliability and ruggedness of this product.
