### Description

The MAAL-011111 is a three stage 22 - 38 GHz GaAs MMIC low noise amplifier. This device has a small signal gain of 19 dB with a noise figure of 2.5 dB.

This lead-free, 3 mm QFN package requires only a single positive bias supply. The device uses MACOM's GaAs transistor technology, ensuring high repeatability and uniformity.

The device is well suited to multiple receiver applications which require broadband performance with simple bias requirements and the ease of volume manufacturing with 3 mm QFN packaging.

### Absolute Maximum Ratings<sup>5,6</sup>

Parameter	Absolute Maximum
Supply Voltage	7 VDC
Supply Current	70 mA
Input Power	12.0 dBm
Storage Temperature	$-65^\circ\text{C}$ to $+165^\circ\text{C}$
Operating Temperature	$-40^\circ\text{C}$ to $+85^\circ\text{C}$
Channel Temperature <sup>7</sup>	$+150^\circ\text{C}$

5. Exceeding any one or combination of these limits may cause permanent damage to this device.  
 6. MACOM does not recommend sustained operation near these survivability limits.  
 7. Channel temperature directly affects a device's MTTF. It is recommended to keep channel temperature as low as possible to maximize lifetime.

### Handling Procedures

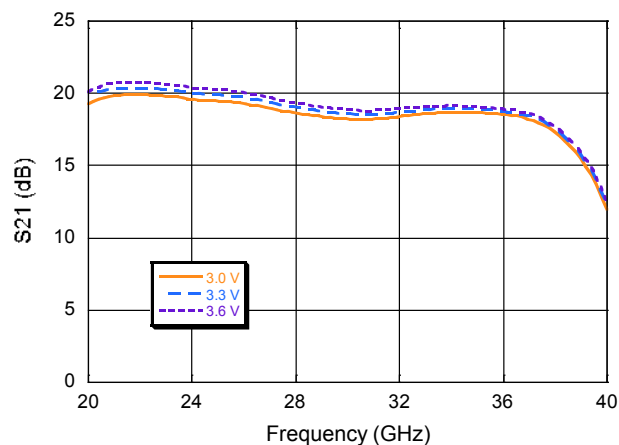

Please observe the following precautions to avoid damage:

### Static Sensitivity

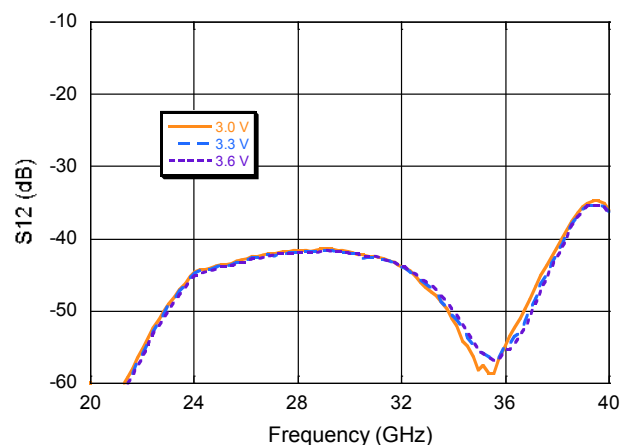

Gallium Arsenide Integrated Circuits are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these Class 1A devices.

## Recommended Board Layout<sup>8</sup>

(DXF file available from website)

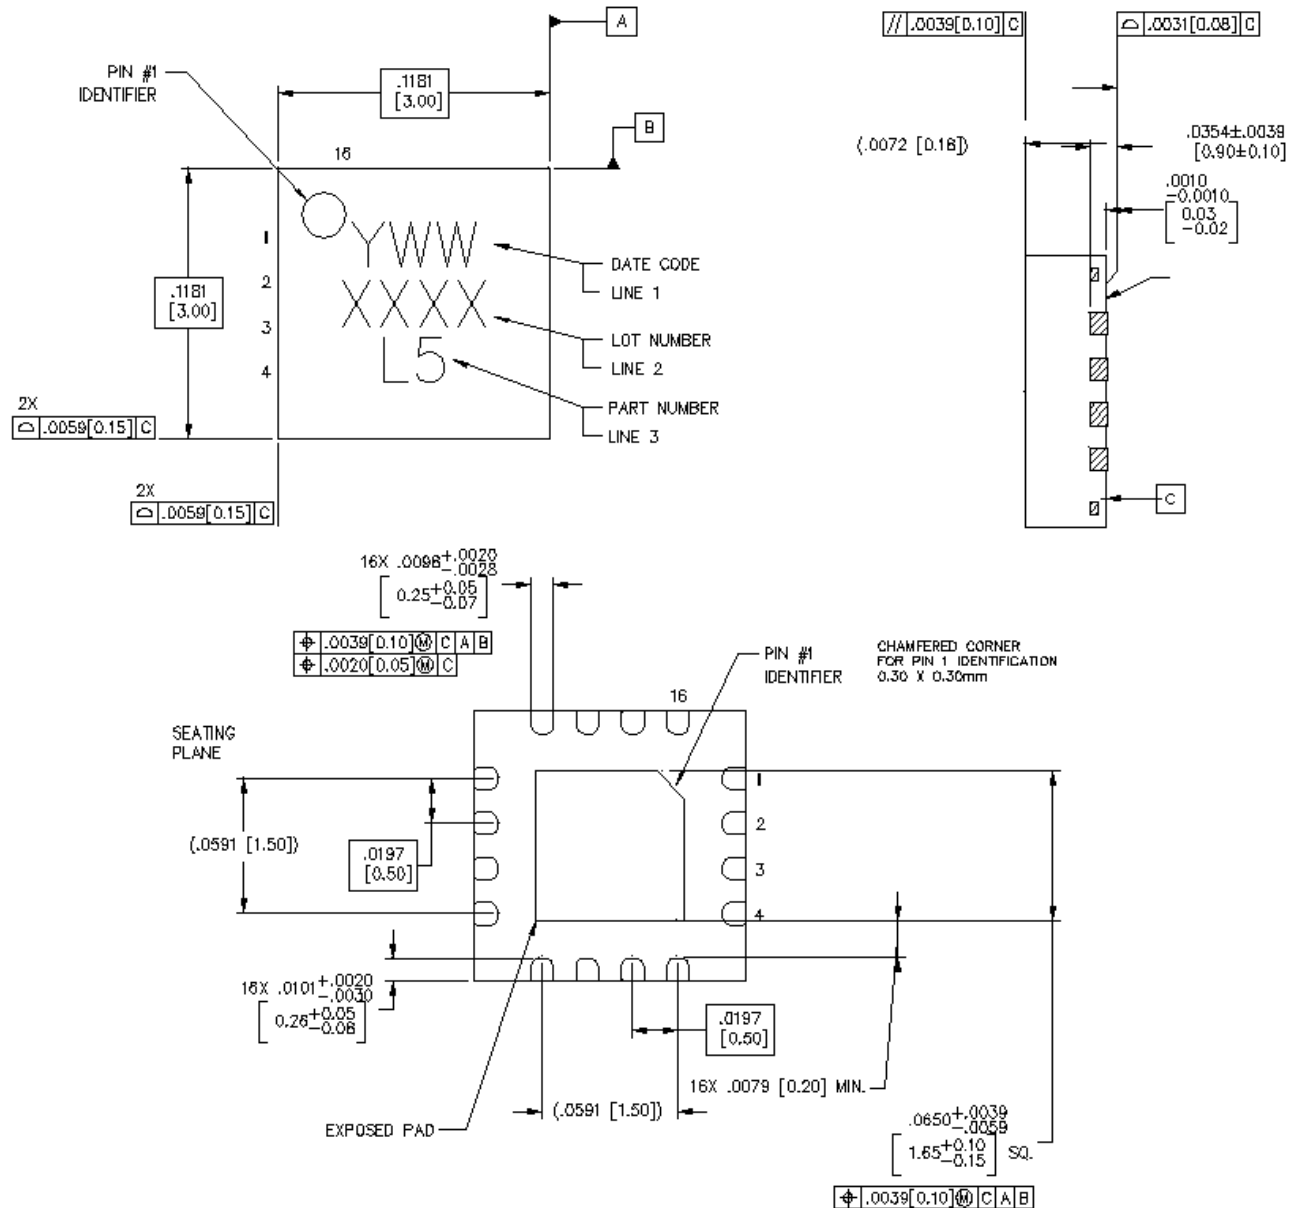

8. Ground plane conductor should be removed under the corners of the package, as shown.

**Biasing** - The device is operated with a single, positive bias supply. The device performance is insensitive to changes in bias condition; however, gain and power handling can be slightly improved with higher bias conditions without significantly affecting the noise figure performance. Typical biasing conditions within the specified performance ranges are  $V_D = 3\text{ V}$ , 50 mA,  $V_D = 3.3\text{ V}$ , 55 mA,  $V_D = 3.6\text{ V}$ , 60 mA.
