SWITCHSTICK

The Switchstick is a 2, 4, or 8-way joystick with 4 keyboard switches mounted at the end of the X and Y axis travel. This self-centering, center off joystick activates once the joystick handle is moved 8° from center.

Ideal for keyboard placement, the Switchstick can also be used for any other application requiring simple 2, 4, or 8 way movement.

The Switchstick is supplied with a square mounting bezel for panel mounting.
