

#### 330W Single Output Battery Charger

### GC330 series

Video

User's Manual

<u>7</u>88

#### GTIN CODE

MW Search: https://www.meanwell.com/serviceGTIN.aspx

#### Features :

- Charger for lead-acid batteries (flooded,Gel and AGM) and Li-ion batteries (lithium iron and lithium manganese) (Note.1)
- 2 stage charging characteristicUniversal AC input / Full range
- Built-in active PFC function. PF>0.95
- 3 pole AC inlet IEC320-C14
- Class I power ( with earth pin)
- Protections: Short circuit / Over voltage / Over temperature
- Fanless design, cooling by free air convection
- Fully enclosed plastic case
- \* No load power consumption<1W
- 2 color LED indicator for charging status
- \* Approvals : UL / CUL / TUV / EAC / CB / FCC / CE / UKCA
- 2 years warranty

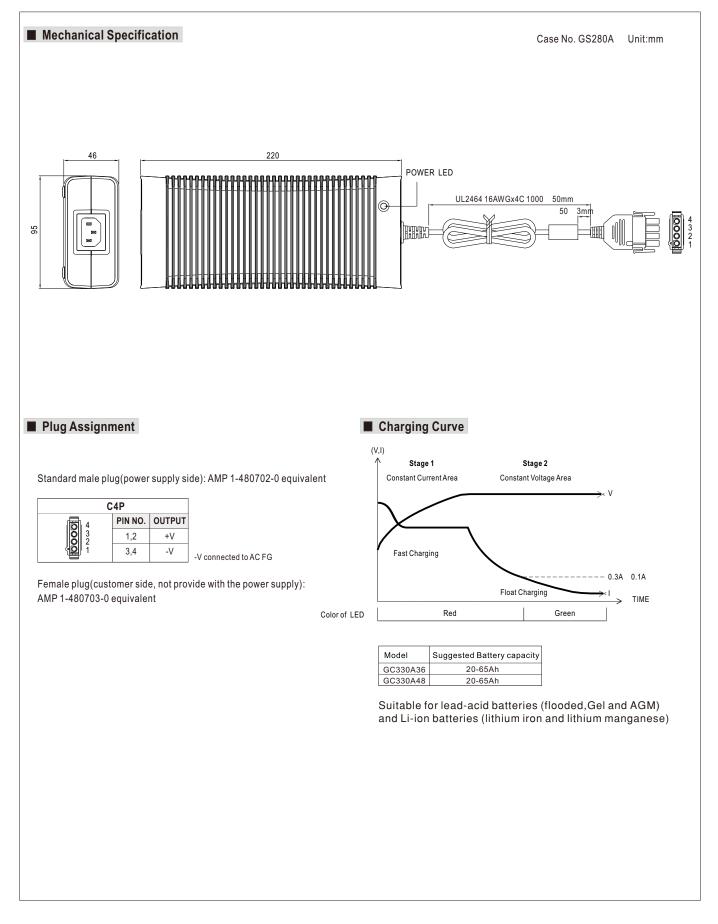

#### SPECIFICATION

| SPECIFICATION    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | BS EN/EN62368-1 UL62368-1 P1C004 IEC62368-1                                                                                   |                |

| NOTE             | <ol> <li>Modification for charger specification may be required for different battery specification. Please contact battery vendor and MEAN WELL for details.</li> <li>All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.</li> <li>This is MeanWell's suggested range, please consult your battery manufacturer for their suggestions about maximum charging current limitation.</li> <li>Derating may be needed under low input voltage. Please check the derating curve for more details.</li> <li>Test condition is at 25°C the charging current vary with the ambient and components temperature. The lower temperature, the higher charging current.</li> <li>Maximum charging current will be in the range of 85~110% rated output current.</li> <li>The power supply is considered as an independent unit, but the final equipment still need to re-confirm that whole system complies with the EMC directives.(as available on https://www.meanwell.com//Upload/PDF/EMI_statement_en.pdf )</li> <li>The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft).</li> <li>Product Liability Disclaimer : For detailed information, please refer to https://www.meanwell.com/serviceDisclaimer.aspx</li> </ol> |                                                                                                                               |                |
|                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                               |                |

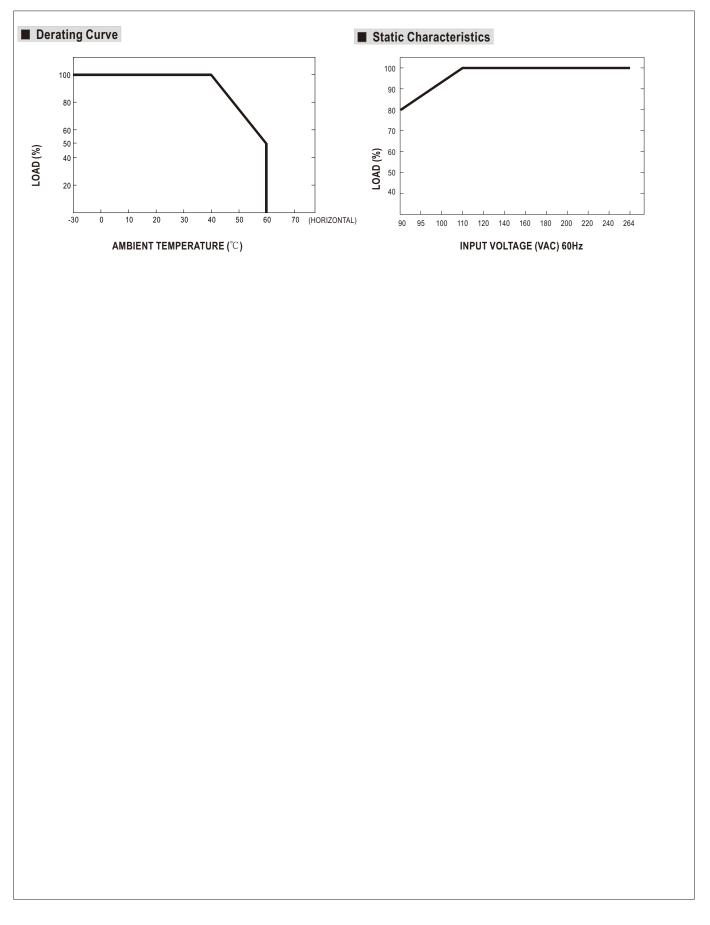

# GC330 series

### 330W Single Output Battery Charger

## GC330 series
