Voidless Hermetically Sealed Unidirectional Transient Voltage Suppressors Data Sheet

1N5610-1N5613

Product Overview

This series of industry-recognized voidless hermetically sealed unidirectional Transient Voltage Suppressor (TVS) designs is military qualified per MIL-PRF-19500/434 and are ideal for high-reliability applications where a failure cannot be tolerated. They provide a working peak "standoff" voltage selection from 30.5V to 175V with 1500W ratings. They are very robust in hard-glass construction and also use an internal metallurgical bond identified as "Category 1" for high reliability applications. These devices are also available in a surface-mount MELF package configuration as a special order. Microchip also offers numerous other TVS products to meet higher and lower peak pulse power and voltage ratings in both through-hole and surface-mount packages.
