Voidless Hermetically Sealed Bidirectional Transient Voltage Suppressors Data Sheet

1N6103A-1N6137A

MICROCHIP

Product Overview

This series of industry-recognized, voidless, hermetically sealed bidirectional Transient Voltage Suppressors (TVS) is military qualified per MIL-PRF-19500/516 and is ideal for high-reliability applications where a failure cannot be tolerated. They provide a working peak standoff voltage selection from 5.7 V to 152 V with a 500 W rating for a 10/1000 μs pulse. They are very robust in hard-glass construction and use internal "*Category 1*" metallurgical bonds. These devices are available as both a non-suffix part and an "A" version providing different voltage tolerances as described in the nomenclature section. These devices are also available in a surface-mount MELF package configuration.

Features

- High surge current and peak pulse power provides transient voltage protection for sensitive circuits.
- Double-layer passivation
- Internal "*Category 1*" metallurgical bonds
- Voidless, hermetically sealed glass package
- JAN, JANTX, and JANTXV, JANS qualified versions are available per MIL-PRF-19500/516. (See Part Nomenclature for all available options).
- RoHS compliant versions available (commercial grade only).

Applications

- Military and other high-reliability applications
- Extremely robust construction
- Extensive range in working peak "standoff" voltage (V_{WM}) from 5.7 V to 152 V
- 500 W peak pulse power (P_{PP}) for a 10/1000 μs pulse
- ESD and EFT protection per IEC6100-4-2 and IEC61000-4-4 respectively
- Protection from the secondary effects of lightning per select levels in IEC61000-4-5
- Flexible axial-leaded mounting terminals
- Non-sensitive to ESD per MIL-STD-750 method 1020
- Inherently radiation hard as described in MicroNote 050.

Figure 1. "B" Package

1. Maximum Ratings

Maximum ratings are taken at T_A = 25 °C unless otherwise noted.

| Parameters/Test Conditions	Symbol	Value	Unit
Junction and storage temperature	T_J and T_{STG}	–55 to +175	ºC
Thermal resistance junction-to-lead[1]	$R_{\Theta JL}$	33.5	ºC/W
Peak pulse power at 25 ºC (10/1000 µs)	P_{PP}	500	W
Steady-state power at T_L = 75 ºC[1]	P_D	3.0	W
Steady-state power at T_A = 25 ºC[2]	P_D	2.0	W
Impulse repetition rate	df	0.01	%
Solder temperature at 10 seconds	T_{SP}	260	ºC

Notes:

1. At 3/8 inch lead length from body.
2. Steady-state power ratings with reference to ambient are for PC boards where thermal resistance from mounting point to ambient is sufficiently controlled where maximum rated T_J is not exceeded (also see Figure 3-4).

1.1 Mechanical and Packaging

- Case: Hermetically sealed voidless hard glass with tungsten slugs
- Terminals: Axial-leads are tin/lead over copper. RoHS compliant matte-tin is available on commercial grade only.
- Marking: Body paint and part number
- Polarity: No polarity marking for these bidirectional TVSs
- Tape and reel option: Standard per EIA-296. Consult factory for quantities.
- Weight: Approximately 750 milligrams
- See Package Dimensions.

1.2 Part Nomenclature

Applicable to entire series:

JAN   1N6103   A   (e3)

Reliability Level
JAN = JAN Level
JANTX = JANTX Level
JANTXV = JANTXV Level
JANS = JANS Level
Blank = commercial

JEDEC type number
See Electrical
Characteristics table

RoHS Compliance
e3 = RoHS compliant (available on commercial grade only)
Blank = non-RoHS compliant

Voltage Tolerance
A = Standard
Blank = 5% higher V_C, 5% lower min. $V_{(BR)}$ and 5% lower I_{PP}

Microchip

2. Symbols and Definitions

Symbol	Definition
$\alpha_{V(BR)}$	Temperature coefficient of minimum breakdown voltage: The change in breakdown voltage divided by the change in temperature that caused it expressed in %/°C or mV/°C.
$V_{(BR)}$	Minimum breakdown voltage: The minimum voltage the device will exhibit at a specified current.
V_{WM}	Working peak voltage: The maximum peak voltage that can be applied over the operating temperature range. This is also referred to as standoff voltage.
I_D	Maximum standby current: The maximum current that will flow at the specified voltage and temperature.
V_C	Maximum clamping voltage at specified I_{PP} (Peak Pulse Current) at the specified pulse conditions.
P_{PP}	Peak pulse power: The peak power dissipation resulting from the peak impulse current I_{PP}.

3.   Performance Curves

Figure 3-1. Peak Pulse Power vs. Pulse Time
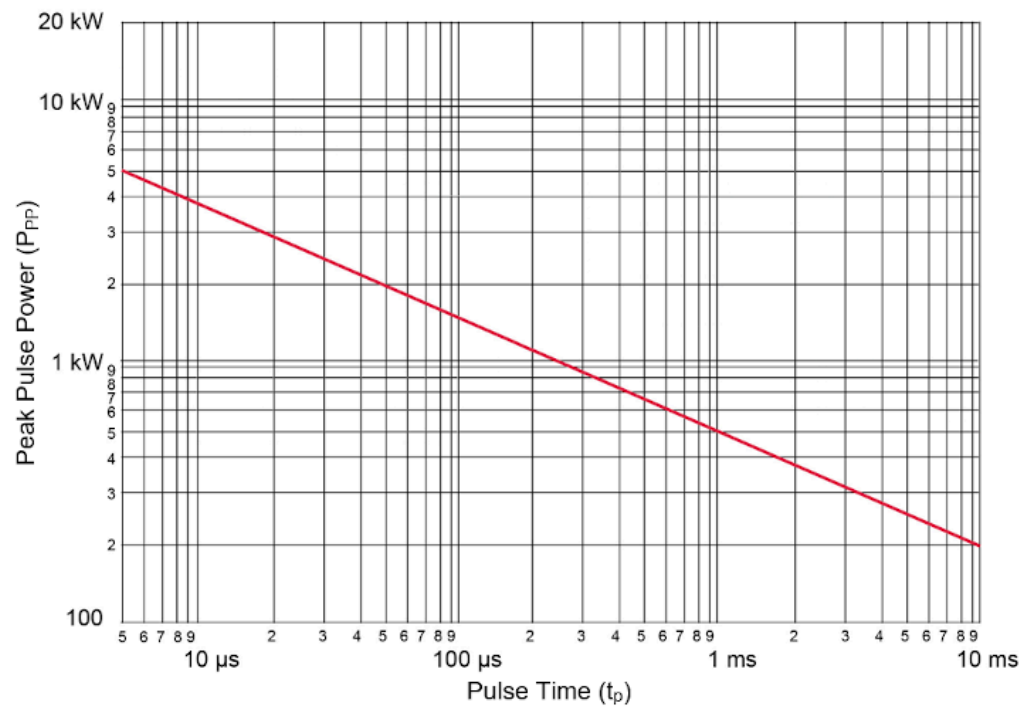

Figure 3-2. Pulse Derating curve (Not Applicable to JANHC/JANKC Die)
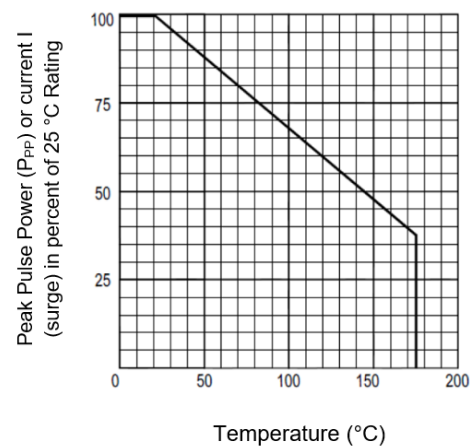

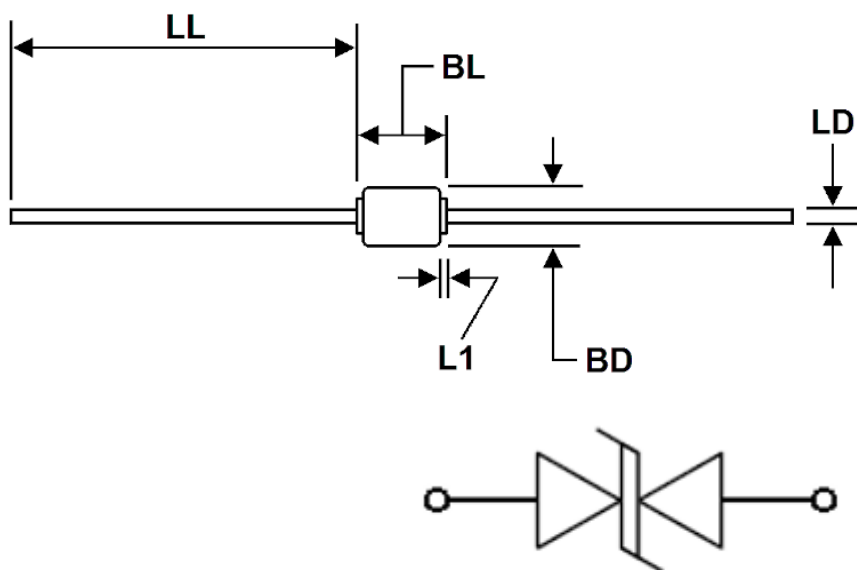

Figure 3-3. Pulse Wave Form
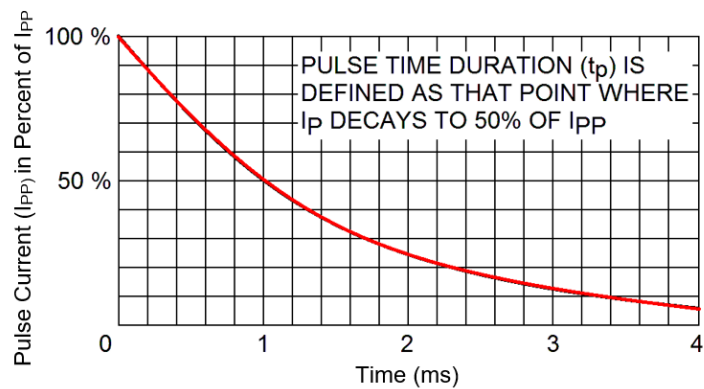

Figure 3-4. Temperature-Power Derating Curve
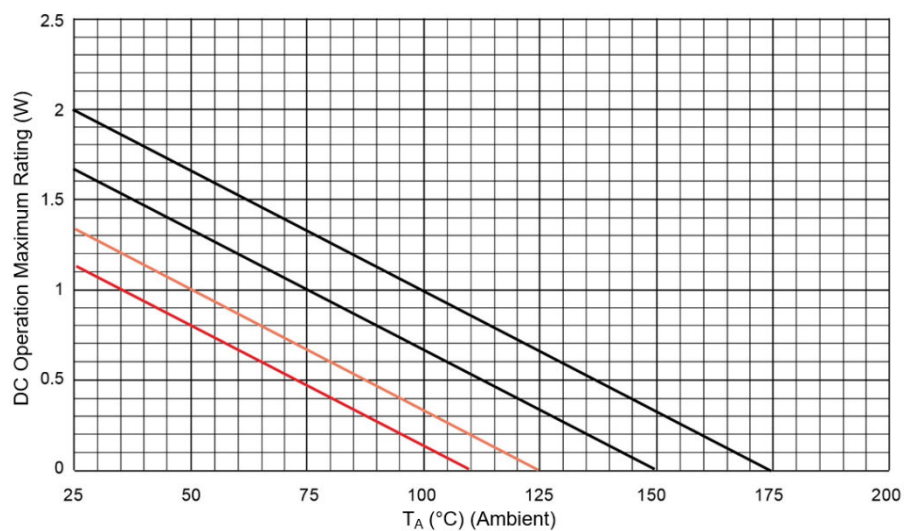

4.   Package Dimensions

Dimensions are in inches. Millimeters are given for general information only. In accordance with ASME Y14.5M, diameters are equivalent to Φx symbology.

Schematic Symbol

Ltr	Inches		Millimeters		Notes
	Min	Max	Min	Max	
BD	0.085	0.140	2.16	3.56	1
BL	0.140	0.185	3.56	4.70	
LD	0.026	0.033	0.66	0.84	
LL	1.00	1.30	25.40	33.02	
L1	-	0.030	-	0.76	2

Notes:
1. Dimension BD shall be measured at the largest diameter.
2. Dimension L1 lead diameter uncontrolled in this area.

5. Revision History

The revision history describes the changes that were implemented in the document. The changes are listed by revision, starting with the most current publication.

Revision	Date	Description
A	06/2023	Converted document to Microchip template.

Microchip Information

The Microchip Website

Microchip provides online support via our website at www.microchip.com/. This website is used to make files and information easily available to customers. Some of the content available includes:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip design partner program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

Product Change Notification Service

Microchip's product change notification service helps keep customers current on Microchip products. Subscribers will receive email notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, go to www.microchip.com/pcn and follow the registration instructions.

Customer Support

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Embedded Solutions Engineer (ESE)
- Technical Support

Customers should contact their distributor, representative or ESE for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in this document.

Technical support is available through the website at: www.microchip.com/support

Microchip Devices Code Protection Feature

Note the following details of the code protection feature on Microchip products:

- Microchip products meet the specifications contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is secure when used in the intended manner, within operating specifications, and under normal conditions.
- Microchip values and aggressively protects its intellectual property rights. Attempts to breach the code protection features of Microchip product is strictly prohibited and may violate the Digital Millennium Copyright Act.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of its code. Code protection does not mean that we are guaranteeing the product is "unbreakable". Code protection is constantly evolving. Microchip is committed to continuously improving the code protection features of our products.

Legal Notice
