SPI SRAM PICTail™ Daughter Board

Overview

The AC164151 is a PICTail™ and PICTail Plus development board for the 23LCV1024 1Meg Serial SRAM with battery backup.

Key Features of the Board

- PICTail and PICTail Plus connector to interface with all Microchip development boards
- Supports battery backup (battery included)
- Follows recommended usage guidelines

Getting Started

The SPI Serial SRAM Daughter Board allows you to get started right out of the box. By using the daughter board and one of the MCU development boards that support the PICTail or PICTail Plus connector, code can be developed quickly on known good hardware. All of the application notes written for the SPI Serial SRAM family are designed around the AC164151 daughter board.

Additional information
