

## VOID-LESS HERMETICALLY SEALED ULTRAFAST RECOVERY GLASS RECTIFIERS

**Qualified per MIL-PRF-19500/477**

Qualified Levels:  
JAN, JANTX,  
JANTXV and JANS

### DESCRIPTION

This "Ultrafast Recovery" rectifier diode series is military qualified and is ideal for high-reliability applications where a failure cannot be tolerated. The industry-recognized 6.0 amp rated rectifiers with working peak reverse voltages from 50 to 150 volts are hermetically sealed with void-less glass construction using an internal "Category 1" metallurgical bond. These devices are available in both leaded and surface mount MELF package configurations. Microsemi also offers numerous other rectifier products to meet higher and lower current ratings with various recovery time requirements including standard, fast and ultrafast device types in both through-hole and surface mount packages.
