

## DESCRIPTION

This series of surface mount diodes are specifically design for high volume surface mount applications. The GigaMite design is optimized for improved electrical and thermal performance over standard plastic package technology. Our patented dual orthogonal lead frame provides both exceptionally low thermal impedance and series inductance. Microsemi utilizes only the highest quality dielectric materials resulting in low loss tangent and physical stability even in harsh environments. The result is higher frequency coverage and greater stability than comparable plastic packages.

This series of devices meets RoHS requirements per EU Directive 2002/95/EC.

## KEY FEATURES

- Low Parasitics  
 $L_P = 0.5 \text{ nH Typical}$   
 $C_P = 0.07 \text{ pF Typical}$
