

OX-046

VHF low g-Sensitivity Oven Controlled Crystal Oscillator

Helping Customers Innovate, Improve & Grow

Features

- Ultra Low G-Sensitivity
- Low Phase Noise
- Very High Frequency
- Frequency Range: 50 MHZ to 250 MHZ
- Standard Frequency: 100 MHz
- Vibration Compensation

Applications

- Military Avionics
- Airborne Radar
- Test Equipment
- Frequency Synthesizers
- Position Location
- Satellite Communications

Additional Ordering Options

Additional ordering options available include custom temperature ranges, custom temperature stabilities, custom phase noise requirements, low profile, custom supply voltage, hermetic option and improved g-sensitvity. These modifications require a custom dash number - please contact the factory for additional information.

Notes:

- 1. Unless otherwise stated, all values are valid after warm-up time and refer to typical conditions for supply voltage, frequency control voltage, load, and temperature (25°C).
- 2. Retrace is defined as the frequency difference between the end of two 24 hour on power periods with a 24 hour off period in between while at a constant temperature.
- 3. Phase noise degrades with increasing output frequency.
- 4. Not all options and codes available at all frequencies.
