

DESCRIPTION

This "fast recovery" surface mount rectifier diode series is military qualified to MIL-PRF-19500/429 and is ideal for high-reliability applications where a failure cannot be tolerated. These industry-recognized 1.0 Amp rated rectifiers for working peak reverse voltages from 200 to 1000 volts are hermetically sealed with voidless-glass construction using an internal "Category I" metallurgical bond. These devices are also available in axial-leaded package configurations for thru-hole mounting (see separate data sheet for 1N5615 thru 1N5623). Microsemi also offers numerous other rectifier products to meet higher and lower current ratings with various recovery time speed requirements including fast and ultrafast device types in both through-hole and surface mount packages.

IMPORTANT: For the most current data, consult MICROSEMI's website: <http://www.microsemi.com>

NOTE 1: From 1 Amp at T_A = 55°C, derate linearly at 5.56 mA/°C to 0.75 Amp at T_A = 100°C. From T_A = 100°C, derate linearly at 7.5 mA/°C to 0 Amps at T_A = 200°C. These ambient ratings are for PC boards where thermal resistance from mounting point to ambient is sufficiently controlled where T_{J(max)} does not exceed 175°C.

NOTE 2: T_A = 100°C, f = 60 Hz, I_O = 750 mA for ten 8.3 ms surges @ 1 minute intervals

NOTE 3: I_F = 0.5A, I_{RM} = 1A, I_{R(REC)} = 0.250 A
