

# VSC8522

#### 12-Port 10/100/1000BASE-T PHY with QSGMII MAC Interfaces

Microsemi's next-generation triple-speed PHY delivers the industry's lowest power Gigabit Ethernet physical media solution.

The VSC8522-02 and VSC8522-04 devices contain 12 integrated Gigabit Ethernet (GbE) PHYs with a power efficient voltage-mode design, all within a single package. They leverage Microsemi's 65 nm technology, resulting in one of the most cost-effective and lowest power consumption solutions in the industry. They include the most advanced Ethernet energy efficiency features for bringing green technology solutions to market.

The devices employ the latest QSGMII MAC interfaces to reduce PCB routing to a MAC, switch, or ASIC chip. Ideal for high-density switch and router applications, these devices enable Ethernet multiport systems to achieve very low system Bill of Material (BOM) costs, reducing overall production costs for more cost-effective deployments.

The devices use field-proven, fully adaptive equalization and innovative timing recovery algorithms for unparalleled noise tolerance performance. In addition, they are based on patented, fully balanced voltage-mode line driver technology, which allows lower cost magnetics to be used.

#### **Highlights**

- 12 GbE PHYs in a single package
- QSGMII MAC interfaces
- Simplified design requires only two voltage planes

#### Applications

- Blade servers
- Edge and Access platforms
- Ethernet switches and routers
- Industrial/IoT

VSC8522-04 in a 1-Gigabit industrial switch application

Microsemi makes no warranty, representation, or guarantee regarding the information contained herein or the suitability of its products and services for any particular purpose, nor does Microsemi assume any liability whatsoever arising out of the application or use of any product or circuit. The products sold hereunder and any other products sold by Microsemi have been subject to limited testing and should not be used in conjunction and together with miscion-critical equipment or applications. Any performance specifications are believed to be reliable but are not verified, and Buyer must conduct and complete all performance and other testing of the products, alone and together with, or installed in, any end-products. Buyer shall not rely on any data and performance specifications or parameters provided by Microsemi. It is the Buyer's responsibility to independently determine suitability of any products and to test and verify the same. The information provided by Microsemi hereunder is provided "as is, where is" and with all faults, and the entire risk associated with such information is entirely with the Buyer. Microsemi described on grant to grant to grant to grant to any party any pattring the rights, licenses, or any other IP rights, whether with regard to such information its provided by such information provided in this document is proprietary to Microsemi, and Microsemi reserves the right to make any changes to the information in this document or any products and services at any time without notice.

### VSC8522 12-Port 10/100/1000BASE-T PHY with QSGMII MAC Interfaces

#### **Best-in-Class Power Consumption**

- One of the lowest power per-port GbE PHY in the industry
- Green energy efficiency modes including ActiPHY™, Perfect-Reach™, and IEEE 802.3az
- Programmable direct drive LED outputs with adjustable brightness levels
- Optimal power consumption for all link speeds

#### **Features**

- 12 integrated 10/100/1000BASE-T full and half duplex Ethernet transceivers with VeriPHY<sup>™</sup> cable diagnostics
- QSGMII SerDes MAC interfaces
- Patented line driver with low EMI voltage mode and integrated line side termination resistors
- Jumbo frame support up to 16 kB with programmable synchronization FIFOs
- Extensive test features including loopbacks, packet generators, and CRC counters
- HP Auto-MDIX support

#### **Key Specifications**

- 1.0 V core power supply
- 2.5 V I/O power supplies
- 3.3 V-tolerant 2.5 V inputs
- 24 mm × 24 mm thin quad flat package (TQFP)
- Supports QSGMII v1.2, IEEE 1149.1 JTAG boundary scan, and IEEE 1149.6 AC-JTAG
- Compliant with IEEE 802.3 (10BASE-T, 100BASE-TX, and 1000BASE-T)
- 0 °C to 125 °C temperature range for VSC8522-02
- –40 °C to 125 °C temperature range for VSC8522-04
