2. Soldering the headers

Before using your click board[™], make sure to solder 1x8 male headers to both left and right side of the board. Two 1x8 male headers are included with the board in the package.

Turn the board upward again. Make sure to align the headers so that they are perpendicular to the board, then solder the pins carefully.

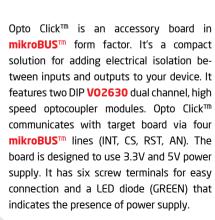

4. Essential features

Opto Click[™] with it's DIP **V02630** modules results in support for high speed (10 Mbd) between it's input and output with galvanic isolation. It has common mode transient immunity of 100 V/µs and low input current capability of 5 mA. All these features make this board ideal for PLC and ATE I/O isolation. high speed A/D and D/A conversion, Digital control power supply, computer peripherals, microprocessor interface and more.

bottom side is facing you upwards. Place shorter parts of the header pins in both soldering pad locations.

Opto click[™]

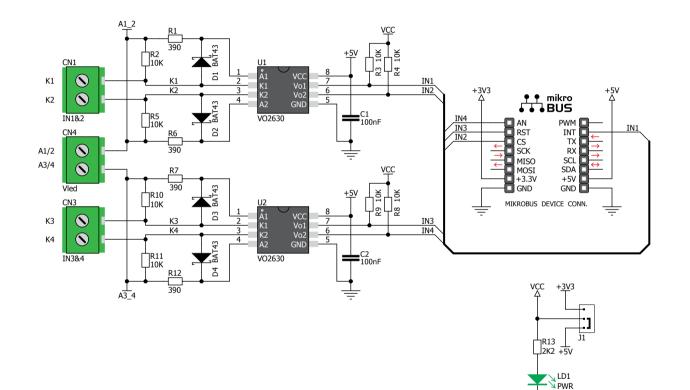

1. Introduction

Turn the board upside down so that

Once you have soldered the headers your board is ready to be placed into desired mikroBUS[™] socket. Make sure to align the cut in the lower-right part of the board with the markings on the silkscreen at the mikroBUS[™] socket. If all of the pins are aligned correctly, push the board all the way into the socket.

5. Opto Click[™] Board Schematic

MikroElektronika assumes no responsibility or liability for any errors or inaccuracies that may appear in the present document. Specification and information contained in the present schematic are subject to change at any time without notice. Copyright © 2012 MikroElektronika. All rights reserved.

6. SMD Jumper

There is one zero-ohm SMD jumper **J1** which is used to select whether 3.3V or 5V power supply is used. Jumper **J1** is soldered in 3.3V position by default.

7. Code Examples

Once you have done all the necessary preparations, it's time to get your click board up and running. We have provided the examples for mikroC, mikroBasic and mikroPascal compilers on our **Libstock** website. Just download them and you are ready to start.

8. Support

MikroElektronika offers **Free Tech Support** (www.mikroe.com/esupport) until the end of product lifetime, so if something goes wrong, we are ready and willing to help!
