CEL

LDMOS FIELD EFFECT TRANSISTOR

NE55410GR

N-CHANNEL SILICON POWER LDMOS FET
FOR 2 W + 10 W VHF to L-BAND SINGLE-END POWER AMPLIFIER

DESCRIPTION

The NE55410GR is an N-channel enhancement-mode LDMOS FET designed for driver 0.1 to 2.6 GHz PA, such as, cellular base station amplifier, analog/digital TV-transmitters, and the other PA's. This product has two different FET's on one die manufactured using our NEWMOS technology (our WSi gate lateral MOS FET), and its nitride surface passivation and quadruple layer aluminum silicon metalization offer a high degree of reliability.

FEATURES

- Two different FET's (Q1 : P_{out} = 2 W, Q2 : P_{out} = 10 W) in one package
- Over 25 dB gain available by connecting two FET's in series
  : $G_{L\ (Q1)}$ = 13.5 dB TYP. (V_{DS} = 28 V, $I_{Dset\ (Q1)}$ = 20 mA, f = 2 140 MHz)
  : $G_{L\ (Q2)}$ = 11.0 dB TYP. (V_{DS} = 28 V, $I_{Dset\ (Q2)}$ = 100 mA, f = 2 140 MHz)
- High 1 dB compression output power : $P_{O\ (1\ dB)\ (Q1)}$ = 35.4 dBm TYP. (V_{DS} = 28 V, $I_{Dset\ (Q1)}$ = 20 mA, f = 2 140 MHz)
  : $P_{O\ (1\ dB)\ (Q2)}$ = 40.4 dBm TYP. (V_{DS} = 28 V, $I_{Dset\ (Q2)}$ = 100 mA, f = 2 140 MHz)
- High drain efficiency : $\eta_{d\ (Q1)}$ = 52% TYP. (V_{DS} = 28 V, $I_{Dset\ (Q1)}$ = 20 mA, f = 2 140 MHz)
  : $\eta_{d\ (Q2)}$ = 46% TYP. (V_{DS} = 28 V, $I_{Dset\ (Q2)}$ = 100 mA, f = 2 140 MHz)
- Low intermodulation distortion : $IM_{3\ (Q1)}$ = –40 dBc TYP. (V_{DS} = 28 V, $I_{Dset\ (Q1+Q2)}$ = 120 mA, f = 2 132.5/2 147.5 MHz, P_{out} = 33 dBm (2 tones))

<R>
- Single Supply (V_{DS} : 3 V < V_{DS} ≤ 32 V)
- Excellent Thermal Stability
- Surface mount type and Super low cost plastic package : 16-pin plastic HTSSOP
- Integrated ESD protection
- Excellent stability against HCI (Hot Carrier Injection)

APPLICATION

<R>
- Digital cellular base station PA : W-CDMA/GSM/D-AMPS/N-CDMA/PCS etc.
- UHF-band TV transmitter PA

Caution Observe precautions when handling because these devices are sensitive to electrostatic discharge.

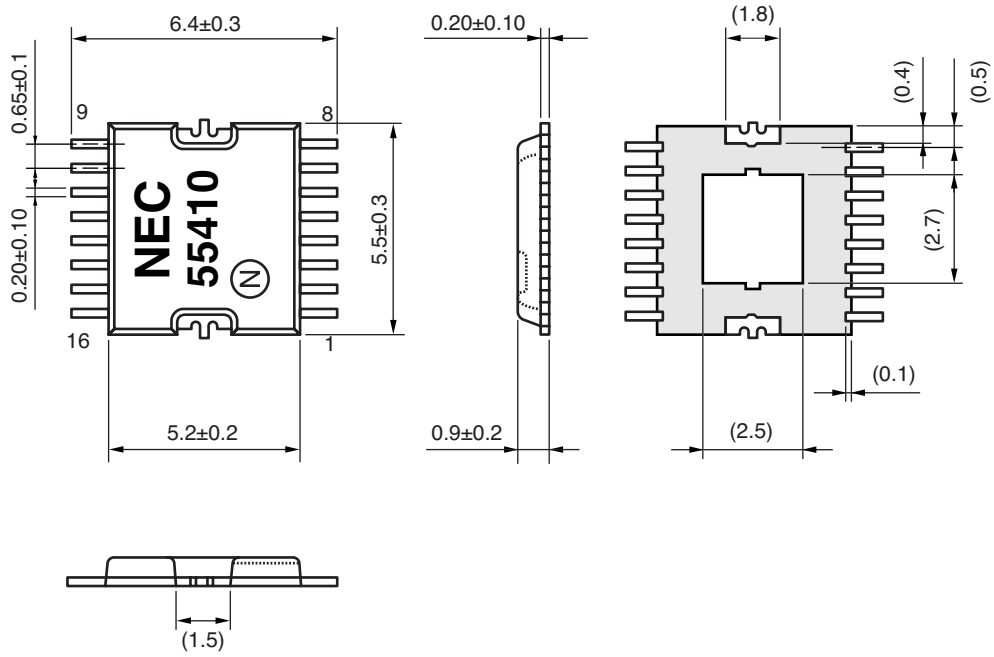
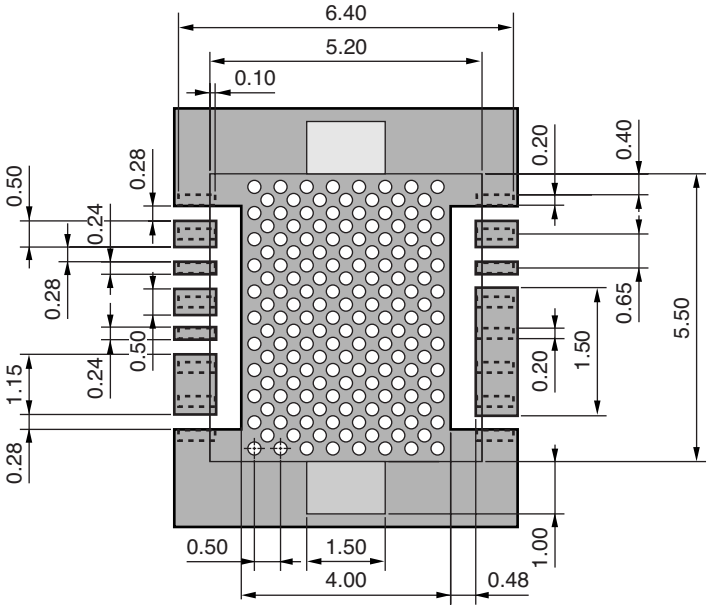
PACKAGE DIMENSIONS

16-PIN PLASTIC HTSSOP (UNIT: mm)



Remark ( ): Reference value

LAND PATTERN (UNIT: mm)



Remarks1. Via holes : 158 holes

<R> **2.** Hole size : ϕ 0.15 mm

3. Min. spacing : 0.354 mm

4. ▭ : Solder resist or etching

RECOMMENDED SOLDERING CONDITIONS

This product should be soldered and mounted under the following recommended conditions. For soldering methods and conditions other than those recommended below, contact your nearby sales office.

Soldering Method	Soldering Conditions		Condition Symbol
Infrared Reflow	Peak temperature (package surface temperature)	: 260°C or below	IR260
	Time at peak temperature	: 10 seconds or less	
	Time at temperature of 220°C or higher	: 60 seconds or less	
	Preheating time at 120 to 180°C	: 120±30 seconds	
	Maximum number of reflow processes	: 3 times	
	Maximum chlorine content of rosin flux (% mass)	: 0.2%(Wt.) or below	
Wave Soldering	Peak temperature (molten solder temperature)	: 260°C or below	WS260
	Time at peak temperature	: 10 seconds or less	
	Preheating temperature (package surface temperature)	: 120°C or below	
	Maximum number of flow processes	: 1 time	
	Maximum chlorine content of rosin flux (% mass)	: 0.2%(Wt.) or below	
Partial Heating	Peak temperature (terminal temperature)	: 350°C or below	HS350
	Soldering time (per side of device)	: 3 seconds or less	
	Maximum chlorine content of rosin flux (% mass)	: 0.2%(Wt.) or below	

Caution Do not use different soldering methods together (except for partial heating).

- **The information in this document is current as of January, 2007. The information is subject to change without notice. For actual design-in, refer to the latest publications of NEC Electronics data sheets or data books, etc., for the most up-to-date specifications of NEC Electronics products. Not all products and/or types are available in every country. Please check with an NEC Electronics sales representative for availability and additional information.**
- No part of this document may be copied or reproduced in any form or by any means without the prior written consent of NEC Electronics. NEC Electronics assumes no responsibility for any errors that may appear in this document.
- NEC Electronics does not assume any liability for infringement of patents, copyrights or other intellectual property rights of third parties by or arising from the use of NEC Electronics products listed in this document or any other liability arising from the use of such products. No license, express, implied or otherwise, is granted under any patents, copyrights or other intellectual property rights of NEC Electronics or others.
- Descriptions of circuits, software and other related information in this document are provided for illustrative purposes in semiconductor product operation and application examples. The incorporation of these circuits, software and information in the design of a customer's equipment shall be done under the full responsibility of the customer. NEC Electronics assumes no responsibility for any losses incurred by customers or third parties arising from the use of these circuits, software and information.
- While NEC Electronics endeavors to enhance the quality, reliability and safety of NEC Electronics products, customers agree and acknowledge that the possibility of defects thereof cannot be eliminated entirely. To minimize risks of damage to property or injury (including death) to persons arising from defects in NEC Electronics products, customers must incorporate sufficient safety measures in their design, such as redundancy, fire-containment and anti-failure features.
- NEC Electronics products are classified into the following three quality grades: "Standard", "Special" and "Specific".
  The "Specific" quality grade applies only to NEC Electronics products developed based on a customer-designated "quality assurance program" for a specific application. The recommended applications of an NEC Electronics product depend on its quality grade, as indicated below. Customers must check the quality grade of each NEC Electronics product before using it in a particular application.
  "Standard": Computers, office equipment, communications equipment, test and measurement equipment, audio and visual equipment, home electronic appliances, machine tools, personal electronic equipment and industrial robots.
  "Special": Transportation equipment (automobiles, trains, ships, etc.), traffic control systems, anti-disaster systems, anti-crime systems, safety equipment and medical equipment (not specifically designed for life support).
  "Specific": Aircraft, aerospace equipment, submersible repeaters, nuclear reactor control systems, life support systems and medical equipment for life support, etc.

The quality grade of NEC Electronics products is "Standard" unless otherwise expressly specified in NEC Electronics data sheets or data books, etc. If customers wish to use NEC Electronics products in applications not intended by NEC Electronics, they must contact an NEC Electronics sales representative in advance to determine NEC Electronics' willingness to support a given application.

(Note)
(1) "NEC Electronics" as used in this statement means NEC Electronics Corporation and also includes its majority-owned subsidiaries.
(2) "NEC Electronics products" means any product developed or manufactured by or for NEC Electronics (as defined above).

CEL California Eastern Laboratories

4590 Patrick Henry Drive
Santa Clara, CA 95054-1817
Telephone: (408) 919-2500
Facsimile: (408) 988-0279

Subject: Compliance with EU Directives

CEL certifies, to its knowledge, that semiconductor and laser products detailed below are compliant with the requirements of European Union (EU) Directive 2002/95/EC Restriction on Use of Hazardous Substances in electrical and electronic equipment (RoHS) and the requirements of EU Directive 2003/11/EC Restriction on Penta and Octa BDE.

CEL Pb-free products have the same base part number with a suffix added. The suffix –A indicates that the device is Pb-free. The –AZ suffix is used to designate devices containing Pb which are exempted from the requirement of RoHS directive (*). In all cases the devices have Pb-free terminals. All devices with these suffixes meet the requirements of the RoHS directive.

This status is based on CEL's understanding of the EU Directives and knowledge of the materials that go into its products as of the date of disclosure of this information.

Restricted Substance per RoHS	Concentration Limit per RoHS (values are not yet fixed)	Concentration contained in CEL devices	
Lead (Pb)	< 1000 PPM	-A	-AZ
		Not Detected	(*)
Mercury	< 1000 PPM	Not Detected	
Cadmium	< 100 PPM	Not Detected	
Hexavalent Chromium	< 1000 PPM	Not Detected	
PBB	< 1000 PPM	Not Detected	
PBDE	< 1000 PPM	Not Detected	

If you should have any additional questions regarding our devices and compliance to environmental standards, please do not hesitate to contact your local representative.
