The KP Series pushbuttons have not been tested for UL recognition or CSA certification. These switches are designed for use in a low-voltage, low-current, logic-level circuit. When used as intended in a logic-level circuit, the results do not produce hazardous energy.

### Distinctive Characteristics

KP series offers a complete switch solution for all broadcast panel needs, including the newest line of RGB LED options with four terminals.

Distinct, long total travel of .177" (4.5mm) for KP01 or shorter stroke of .138" (3.5mm) for KP02.

The super bright RGB LED provides vibrant full color spectrum in unlimited color combinations.

Unique actuation guide gives positive indication of circuit transfer as well as smooth and silent operation.

Choices of tactile, nontactile or tactile/audible actuation.

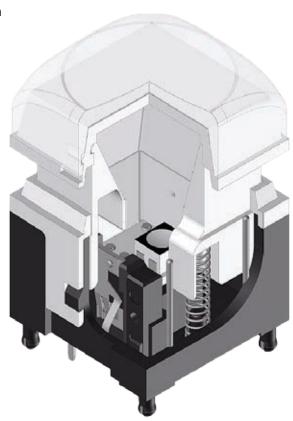

Compact design with height of .906" (23.0mm) from PC board to top of cap. (Same height as programmable SmartSwitch™.)

Flat, sculptured or home key square caps in three common sizes for design flexibility in audio/video applications.

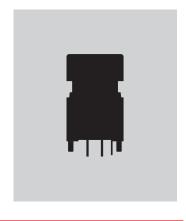

Twin contacts with gold plating assure high reliability and long life of 5,000,000 operations minimum.

Improved profile for soldering specifications.

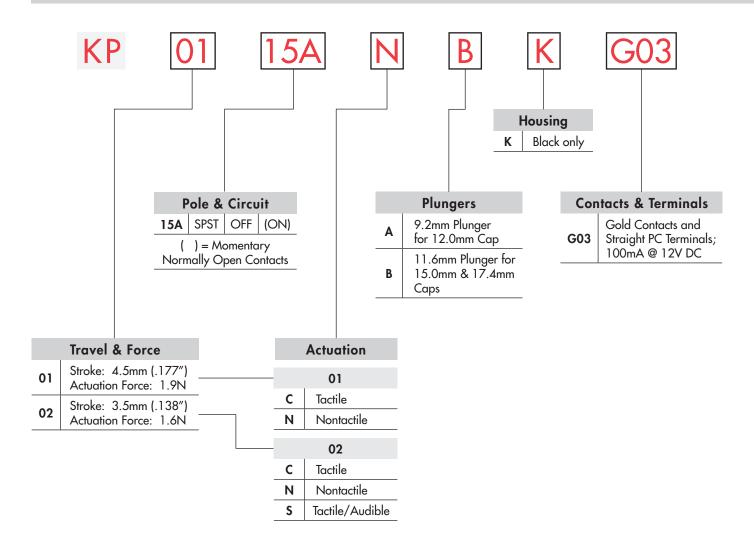

Custom legends are available.

#### **RGB LED SPECIFICATIONS**

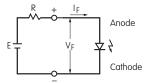

The electrical specifications shown are determined at a basic temperature of 25°C. LEDs are an integral part of the switch and not available separately. LED circuit is isolated and requires an external power source. If the source voltage exceeds the rated voltage, a ballast resistor is required. The resistor value can be calculated by using the formula shown here.

ELECT	ENTION ROSTATIC VE DEVICES	RGBP			
Anode (+) Blue	Color	Red	Green	Blue	Unit
Maximum Forward Current	I <sub>FM</sub>	50	30	30	mA

#### ASSEMBLY INSTRUCTIONS FOR SQUARE CAPS

#### Cap Orientation

As shown in the accompanying illustration, the cap and plunger are designed with tabs and notches to assure proper orientation of the cap on the switch.

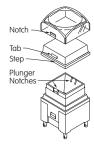

#### Removal of Cap Assembly & Separation of Lens & Diffuser

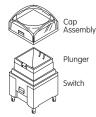

Holding the switch tightly, pull the cap off the switch. Once the cap assembly is released from the plunger, the lens and diffuser can be separated. Pry up the lens with fingernail or flat tip screwdriver inserted at the step on the diffuser.

#### Installation or Replacement of Cap

After aligning notches with tabs, join the lens and diffuser. Hold the switch tightly without touching the terminals. Firmly press the cap onto the plunger by applying pressure from one side to the other until both are snapped together.
